PLO poised to back UN Mid-East peace resolution

LEADERS of the Palestine Liberation Organisation were poised last night to take a major step towards removing the obstacles to their involvement in Arab-Israeli peace negotiations by endorsing a key United Nations resolution on the Middle East conflict. After two days of intense debate at a meeting of the Pal-estine National Council, the estine National Council, the PLO's highest decision-making body, the organisation's leader-ship was preparing to call a vote today on a policy statement approving UN Security Council Resolution 242 of 1967 as the basis for an international Middle East peace conference, and simultaneously calling for guarantees of the calling for guarantees of the Palestinians' national and political rights.

The statement, however, is

almost certain to contain no mention of Israel by name, leaving any recognition of the Jewish state at this stage implicit.
If adopted – and huilt-in

SENIOR ITALIAN bankers and

authorities will meet in Rome

this week to try to agree a res-cue plan for the Cassa di Ris-parmi di Prato, a Tuscan

savings bank that is facing the worst single crisis to befall an

Italian financial institution

since the 1982 collapse of the late Mr Roberto Calvi's Banco

Information on the extent of the crisis has so far been con-fused and partial, but the Financial Times has learned that the bank has L1,400bn

(\$1.08bn) of bad debts on its

sidered unrecoverable.

According to two bank chair-

men involved in rescue talks there has also been a recent

run on deposits that has seen

the bank's deposit base tumble

by a total of 25 per cent.

While the crisis at Prato has been attributed in public mainly to had debts resulting from the bank's heavy expo-

sure to loss-making local tex-

tile companies, it has also been learned that a series of investi-

gations are underway into sus-

Ambrosiano in Milan.

peace negotiations.

Resolution 242, which calls for Israel's withdrawal from territories it occupied during the 1967 war, is regarded by all five permanent members of the Security Council as an indis-pensable element in efforts to resolve the conflict. Unequivo-cal acceptance of it is also one of the main conditions which the PLO must fulfil hefore being allowed to deal with the

The resolution has hitherto been opposed by the PLO on the grounds that it deals with the Palestinian problem merely as one of refugees and does not address their aspirations to an independent state.

The wording of the new policy statement, which is expec-ted to be issued tomorrow along with a declaration of independence, was still the subject of detailed haggling last night between Mr Arafat's mainstream Fatah group and hardline Palestinian factions opposed to making unflateral concessions to Israel.

A spokesman for the Marxist Popular Front for the Liberation of Palestine emerged from the negotiations to deny that his group had accepted 242, but

Italian officials seek deal

on rescue of Tuscan bank

pected fraud and embezzle-

ment. For these reasons the affair is being described by top

Italian hankers as an extremely serious situation.

The meeting this week among leading members of

Italy's new Deposit Guarantee
Fund will try to organise a lifeboat. According to a senior
bank chairman failure to come
up with a rescue plan would

an that the bank could face

The current rescue being dis-

cussed would see the injection of Ll.100bn of capital, which

L300bn of bank reserves would

cover the total L1,400bn of bad

debts. Some L650bn of the new cap-

ital would come from the Guarantee Fund, while a further

L350hn would come from a

group of savings banks and a final L100bn would come from

a pool of six hanks - Banca

Nazionale del Lavoro (BNL), San Paolo di Torino, Monte dei

Paschi di Siena (MPS), Crediop, IMI and Banca Commerciale

he added that the PFLP did not want to cause a split in the organisation – indicating that it would abide by a majority

Another hardline group, the Democratic Front for the Liberation of Palestine, also said it was still opposed to 242, but would not walk out. According to drafts circulating at the conference, the state-

ment will:

Reaffirm the PLO's commitment to a comprehensive peaceful settlement of the Arab Israeli conflict and the Palestinian problem. Reaffirm the Palestinians'

right to an independent state and the right of all states in the region to live in peace, together with the right of exiled Palestinians to return. Call for an international conference under UN auspices with the participation of all parties to the conference, including the PLO, together with the five permanent members of the Security Council. This would be "held on the basis of Resolution 242 with the guarantee of the national rights of the Palestinian people, of which self-determina-tion stands in the forefront."

Nerio Nesi, the BNL chairman, said he found the whole idea of lds. bank's involvement "enormously perplexing." The Bank of Italy, meanwhile, is working behind the scenes to try and groups an orderly received.

ensure an orderly rescue.

The situation is so delicate that the government officials and bankers interviewed for this article asked not to be quoted by name. "We are fac-

ing a very serious matter, what with huge bad debts, possible crime and the first-ever test of

the new Guarantee Fund. The

aim is to avoid a panic among depositors," explained the chairman of one of Italy's big-gest banks, who is actively involved in leading the rescue

Bank of Italy supervisors have conducted three inspec-tions at Prato since 1986. The

central bank first succeeded in getting top executives replaced, then managed to

organise a L200hn emergency Continued on Page 22

Reaffirm the PLO's renunciation of terrorism, as stated in Mr Arafat's 1985 Cairo decla-

The main impetus behind this weekend's deliberations is the 11-month old Palestinian uprising in the occupied terri-tories. The underground lead-ership of the revolt has been pressing for a decisive move by the PLO to advance the Middle East peace process, and Mr Arafat appears to have turned this constituency to his advantage in his struggle with internal opponents.

A high powered Soviet delegation has also been on hand to urge moderation, reflecting

the rapprochement between the superpowers and Mr Mik-hail Gorbachev's drive to collaborate with the US in resolv-

ing regional conflicts.

Mr Arafat's main purpose is to win Western support for the PLO's position - and in partic-ular to influence the incoming us Administration - by going as far as possible to meet the international community's demands ahead of an address he wants to make to the UN General Assembly in a few weeks' time. Likud hit by splits, Page 3

Dubcek cuts back planned speech BNL, the biggest bank in Italy, is reluctant to get involved in the rescue and Mr

By John Wyles in Rome

MR Alexander Dubcek's first public speech since Soviet ianks deposed him as Czecholanks deposed him as Czecho-slovak Communist Party leader 20 years ago appeared yesterday to be an sensitive testimony to the dangers of making frontal attacks on the country's present leadership.
In front of a large audience in the great hall of Bologna University, Mr Dubcek chose to deliver only four of the 12 pages of a speech distributed in As a result, his andience of leading Italian politicians could read in Italian, hut did not hear in Slovak, Mr Dub-cek's brief but weighty criticisms of the Prague regime. During the ceremony, 67-year-old Mr Dubcek frequently wiped tears from his eyes. On paper, his address was an

unambiguous affirmation of human and democratic values with not a tonch of regret Continued on Page 22

is expected to name his top economics team this week in an effort to calm financial mar-kets worried about the next Administration's policies on the dollar and Federal budget deficit. Mr Craig Fuller, a senior

Bush aide, said putting an eco-nomic team in place was a top priority when Mr Bush returns from his post-election vacation in Florida, probably tomorrow. The appointments are likely to be announced "in the next few days," Mr Fuller said. Among those tipped for senior posts are Mr Richard

Darman, a middle-of-the-road Darman, a middle-of-the-road Republican, as head of the Office of Management and Budget, and Mr Nicbolas Brady, the current US Treasury Secretary, who is expected to stay in the joh. But Mr Bush, as he showed with his choice of Senator Dan Quayle as running-mate, is capable of pulling surprises. pulling surprises.

Uncertainty about a future Bnsh Administration's eco-nomic policies bas sent the value of the dollar plunging against other major currencies, while the stock market has fallen 60 points since the Republican presidential victory

last Tuesday.

Mr Fuller ruled out a statement on the dollar, but he disowned remarks hy Professor Martin Feldstein, a Bush adviser, who last week repeated that the dollar must fall between 10 and 20 per cent to maintain a reduction in the trade deficit and ensure contining economic growth.

A senior US Treasury official

also distanced the Reagan Administration from Professor Feldstein, saying the remarks had given "false impressions" that the next Administration would tolerate a decline in the dollar. He suggested that Pro-fessor Feldstein was "not privy to Bush's plans." The major source of concern

in the financial markets also appears to be the Federal hud-get deficit and Mr Bush's abil-ity – given his "no new taxes" on a reduction package with the Democratic majority in Late last week, the Administration conceded that the bud-

get deficit was likely to be \$132hn in the fiscal year 1990, which begins next October 1. This is \$21hn higher than pre-vious official estimates, but almost in line with the Congressional Budget office. Another top Bush aide, Mr Robert Teeter, stressed in a television interview yesterday

Rush: financial markets are concerned about his ability to deficit without imposing new

that Mr Bush was prepared to work together with the Demo-cratic leadership to cut the deficit, a conciliatory message the Bush camp has tried to get across for the past seven days. Mr Fuller disclosed that

Bush advisers had taken soundings with sources on Wall Street to determine finan-cial markets concern. "Raising taxes is not the answer," he

As New York waited for signals from the Bush transition team - which officially begins works today - Washington continued to speculate on the future composition of the Bush Administration.

Already stories have sur-faced that Mr James Baker - Mr Bush's first appointment - will not only serve as the next Secretary of State but will also have strong influence over domestic and interna-tional economic policy, an area he dominated while White House chief of staff and Treasury Secretary in the Reagan Administration. Some are already calling Mr Baker "dep-uty president" or "prime minis-

The other main focus is on the White House where there is a talk of a troika led by Mr Teeter. Mr Fuller and Mr John Sununu, the former governor of New Hampshire.

Mr Sunum would be acceptable to the conservative right wing which is concerned to claim its share of the spoils after the Republican presiden-tial victory. Between 4,000 and 5,000 johs need to be filled. Lex, Page 22

Next Soviet five-year plan will set seal on Gorbachev reforms

By Quentin Peel and John Lloyd in Moscow

THE NATURE and structure of the five-year plans which have governed the Soviet economy over the past 60 years will be radically altered in the 13th plan, now under preparation, and will run from 1990 to 1995. Economists and officials now wrestling with it are proposing no less than a shift from a system which directly intervenes in production and trading deci-sions in the closest detail, to one in which the plan indicates general policies in the style of Western mixed economies. Dr Leonid Abalkin, head of

the economics institute of the Soviet Academy of Sciences and one of the key economic advisers to the Soviet leadership, told the Financial Times that "government will have more the function of regulation than of planning."

than of planning."

This would mark a momentous break with past practice from the Stalin period through to the present, and is intended to set the seal on Mr Mikhail

Gorbachev's economic reforms. However, Academician Abalkin and fellow reformminded economists, like Academician Abel Aganbegyan, who are close to the Soviet leader, are cause to the Soviet leader, still have to persuade an entrenched planning hurean-cracy, and overcome years of ingrained thinking and practice depending entirely on centralised direction, to have their

The present plan, though beginning in 1985, the same year to which Mr Gorbachev assumed leadership, was pre-pared before he was General Secretary and reflects the "command-management" methods now under sustained attack. Dr Abelkin and his colleagues have so far failed to get it scrapped.

The forthcoming 13th plan will thus be the first "Gorbareform-minded economists.

Dr Abalkin said that the new plan "would not run from top to bottom. It must not be vertical, it must be horizontal - the impetus for it would come to the first instance from the con-sumers." He appears to envis-age a sustained colloquy between state enterprises and the public on consumer desires, the results of which would then be fed into production and other decisions. He said the state would

retain control of policy on pricing, taxes, interest rates and other macro-economic levers, other macro-economic levers, and use them as such. The plan would contain "a system of aims and priorities," for example, raising the priority of housebuilding.

It would also be concerned directly with large-scale state investment decisions, such as prospecting for oil in the Arctic Ocean. For much of the rest of the economy — on the hori-

chev" product, and the test of the reform process will be how closely it is shaped by the thinking and proposals of the of the economy – on the hori-Continued on Page 22 CONTENTS Pakistan: Backing all the runners to keep

Kremlin warns Baltic national movements

By Quentin Peel in Moscow RESURGENT nationalist movements in the Soviet Union's three Battic republics were sharply warned by the Kremlin this weekend: stick to the path of Socialism, and do not try to exploit ethnic rival-

ries.
The tough line was laid down in three simultaneous visits to Estonia, Latvia and Lithuania by top members of the ruling Communist Party Politburo. The three were clearly seeking to head off a growing rebellion over consti-tutional reform by the once-in-

dependent republics.
It showed just how seriously Mr Mikhail Gorbachev and the Communist Party leadership is taking nationalist talk in the Baltic region - more seriously than the party propaganda machine - and yet how keen they are to maintain the reformist enthusiasm of the one area in the country where perestroika (restructuring) is

perestroika (restructuring) is working best.

At the same time, the three Polithuro members - the former KGB chairman Mr Viktor Chebrikov, in Estonia; the ideology chief Mr Vadim Medvedev, in Latvia, and Mr Nikolai Slyunkov, economics overlord, in Lithuania - were exposed for the first time to the outgrokenness and often the outspokenness and often sharp criticism of the ruling party which has burst into the

party which has burst into the open in the region.

Their urgent mission comes as the Estonian Supreme Soviet - e once-docile body dominated by the Communist Party - is ebout to hold an emergency session called on to reject Mr Gorbachev's constitutional reforms tional reforms.

Supporters of the Estonian Popular Front for Perestroika say that far from providing more democracy, the reforms would reinforce the power of Moscow over its far-flung

regions.
In a bid to head off the criticism, the Central Committee in Moscow has announced that its long-promised plenum on national relations, including the balance of power between the USSR and the individual

republics, would definitely be held in mid-1989.

None the less, all three Polit-buro members faced tough questioning in factory and farm collective meetings this weekend, and heard harsh crit-icism both of the former party

Rome and Brussels at odds on surplus milk fines

A POLITICAL row is coming to the boil in Brussels over allegations that the Italian Government owes the European Community up to Ecu 200m (£131m)

in surplus milk fines.

The problem — likely to flare up at a meeting of EC agriculture ministers in Brussels this week - has arisen because of the early failure of the Rome authorities to apply

the Rome authorities to apply the tough system of dairy quotas introduced throughout the Community in 1984.

Under the rules of the regime, EC farmers are permitted to produce only a fixed quantity of milk and have to pay e stiff penalty if they exceed their limit. The superlevy, as the sanction is known, is currently set at 100 per cent is currently set et 100 per cent of the market value of the milk and in recent years has proved a highly effective means of curbing over-production in the

The European Commission has long been unhappy about Italy's refusal to edminister the quota scheme properly and has already shown its concern by taking the matter up in the European Court of Justice. The

sels in a ruling last year and specifically called on Rome to mend its ways and meet its obligations under EC law.

The question at the moment, however, is the amount of accumulated superlevy which should have been paid in the early years of the system. Recent calculations by the Commission are understood to have been hampered by a lack of reliable information on the extent of over-production in Italy since 1985 and the figure of Ecu 180m-200m has been deliberately based on some fairly harsh assumptions.

Discussions between Brussels and Rome have so far failed to resolve the issue, which some say has become Commission are understood to

railed to resolve the issue, which some say has become linked to quite separate political negotiations among the member states over how to compensate tens of thousands of northern European milk farmers (known quaintly as SLOM producers) unfairly deprived of milk quotas at the outset of the scheme in 1984. In an attempt to meet the

In an attempt to meet the claims of these farmers the Commission tabled proposals over the summer for the creation of an additional 500,000

tonnes of milk quota, to be financed by a 2 per cent cut in the guaranteed intervention price for butter.

Along with other Mediterra-nean states, Italy opposes this solution on the grounds that its producers should not have to "pay" for the SLOM problem when it was not of their making Much to the irritation of the Commission and other member states, the Italians have been hinting that they could overcome their reserve at this week's meeting in return for et least a partial waiving of their unpaid fines.

We would certainly like this to be sorted out in parallel with the SLOM issue but we don't see why it should be part of a package." one senior Com-mission official indicated at the weekend. "There is a lot of resentment from those member states which have applied the quota scheme fairly and whose farmers have had to suffer cut-

An Italian government spokesman said last night that milk quotas were not applied in 1985 and 1986 because of the fragmented nature of the local dairy industry.

Bernhard Vogel: setback

Kohl hit by state PM's resignation

By David Marsh in Bonn

MR HELMUT KOHL, the West German Chancellor, has suf-fered another political setback with the resignation of Mr Bernhard Vogel, Christian Democrat (CDO) Prime Minis-ter of Mr Kohl's home state of Rhineland Palatinate.

Rhineland Palatinate.

Mr Vogel, who has been premier of the state in south-west Germany since 1976, said he would stand dewn next month after being ousted from the Christian Democrats' party chairmanship in Rhineland-Palatinate by dissatisfied CDU delegates on Friday evening.

Mr Vogel's decision to quit

Mr Vogel's decision to quit came hard on the heels of the departure on Friday of another long-time Kohl stalwart. Mr Philipp Jenninger, the presi-dent of the Bundestag, forced out of office after the nproar over his speech on anti-Jewish persecution on Thursday. Mr Vogel, who had chaired the CDU in the state since

1974, was outgraned at a CDU party conference by Mr Hans-Otto Wilhelm, the Rhineland Palatinate Environment Minister. The vote against Mr Vogel
- the first time in the history
of the Federal Republic that a state premier has been removed by a conference deci-sion — was a surprisingly large 258 to 189.

Mr Vogel's successor as Prime Minister has yet to be decided, as Mr Wilhelm, the new chairman of the party, has insisted that the jobs of party chairman and state premier should be separated. The SPD opposition in Rhineland Palatinate meanwhile called

for new elections.

The palace coup reflects growing discontent at Mr Vogel's leadership. It also comes as a personal blow to Mr Kohl, whose success as the CDH's national leader has been built above all on his deft opinion. Both Mr Kohl and Mr Heiner Geissler, the CDU national secretary-general,

supported Mr Vogel against Mr Wilhelm. The Chancellor, who left Bonn at the weekend for a short visit to the US, is now preoccupied by the need both to replace Mr Jenninger and to smooth over the upset in his home state.

The CDU registered a sharp fall in the Rhineland Palatinate vote in state elections in 1987, losing an absolute majority held since 1971.

Court found in favour of Brus-Agreement clears path

for Italian budget By John Wyles in Rome

AN unexpectedly swift agreement with the Communist opposition has sharply improved the Italian Govern-within 60 days. ment's chances of piloting its controversial 1989 budget proposals through Parliament by the end of the year.

Work in the lower house, the

Camera, was virtually paralysed for most of last week as the Communists exploited their right of veto over procedural changes.

Unexpectedly, the two sides came to an agreement on Fri-day which will allow faster passage for the 13 special items of budget legislation needed to achieve the Government's target of a L117,300bn (£50bn) budget deficit next year. Spokesmen for the coalition

said the Communists had climbed down when they realised the Government would

within 60 days. This threat has been given

more potency by the recent abolition of secret voting on the budget, as the Government could be reasonably confident of sustaining the budget-by-decree hroadly as it is written. This would have left little score for the borestrading scope for the horsetrading which can make an opposition feel important.

The Communists claim that concessions already wrung out of the Government include more parliamentary time to discuss budgetary amendments and a government promise to spend up to L2,000bn more on pensions; the environment and

an anti-drugs campaign. The Treasury has denied any

to defuse discontent THE new Algerian government led by Prime Minister Kasdi Merbah has presented the national assembly with an

Algeria acts

emergency programme designed to defuse discontent which sparked rioting last month, Reuter reports from Algiers. The official news agency

APS said the assembly would start debating the programme today. It will be the first time since independence in 1962 that elected representatives will have a chance to express their opinions on policies.
Under a constitutional change adopted by referendum

on November 3, the Prime Minister is now answerable to the national assembly instead of the ruling National Liberation Front party as before.

The programme gives priority to the younger generation and the unemployed, APS said.

Hungary cautious on new parties

By Leslie Coliff in Berlin

HUNGARY will permit new political parties to be estab-lished after 1990, provided they accept the "primary role of socialism", a spokesman for the Hungarian Communication the Hungarian Communist Party said yesterday. He emphasised that the

authorities had not reached any "concrete decision" on the conditions for founding new parties. The spokesman, Dr Ist-van Degen, said a lot of misunderstanding existed about a statement made last week by Mr Kalman Kulcsar, the Hun-

garian Justice Minister.

The Minister was widely quoted as saying that passage by parliament next month of a new law on the right of assembly and association would imply recognition of the imply recognition of the

multi-party system.
Dr Degen explained that the
Justice Minister actually had
referred to a future law which
would determine the "place and role" of political parties, This law was to be part of a new constitution to be worked

out by 1990.

The party spokesman said that instead of the "leading role" of the Communist Party a phrase which is likely to be dropped from the new constitution - the political parties could be said on the communist Party. be called on to accept the "pri-mary role of socialism".

Asked whether the Commu-Asked whether the Commu-nist Party would be guaranteed a majority in a future multi-party system, Mr Degen said that if several parties were working for socialism, then it was not a question of "who has a majority". He also noted that an alliance or cralition of par-

an alliance or coalition of par-ties could be created. The Hungarian leadership appears to be contemplating a parliamentary arrangement similar to that being considered in Poland. It would give Poland's existing United People's Party and Democratic Party greater representation in parliament under the "guid-

ance" of the Communist Party. Mr Imre Pozsgay, the leading political reformer in the ruling Politburo, noted recently that introduction of a multi-party system by means of a spontaneous social movement would dangerously destablise Hungary. He said this did not applied the land terminal termin exclude the long-term prospect of a multi-party system but in an "organic manner".

mbers of the increasingly active Hungarian opposition said yesterday they were not surprised by the Justice Minis-ter's statement.

Mr Ferenc Koszeg, publisher of the political magazine Beszelo, said the leadership apparently wanted to allow

political parties to discuss and influence decisions, but not to act against the Communist

Party.

He said that a draft electoral law published three weeks ago marked e step towards a corporate parliament in which trade unions and various groups had representatives.
Mr Koszeg said the new elec-

toral law was all important, as it would stipulate who could propose candidates for elec-tions. The draft law, he noted, was a step back from the one in force in the 1985 elections, as it excludes nominations by individuals. Another important test of the government's intentions, he added, would come in Janu-

ary. Several independent new associations which in effect were acting as quasi-political parties would have to be approved or turned down in the courts under the new law on assembly and association.
In addition to the Hungarian
Democratic Forum which was

given a clean bill of health by the party, two independent trade unions and a rival youth league were recently formed. Yesterday an opposition organ-isation calling itself Network was formally constituted, thus presenting the authorities with yet another headache.

Likud hit by splits in Israeli Orthodox parties

DEEP divisions within the DEEP divisions within the ultra-Orthodox religious parties appear to have dashed the right-wing Likud's chances of forming Israel's next coalition government without its main rival, the Labour Alignment.

tstions with all 15 of the par-ties which won seats in the parliamentary election on November 1, President Chaim Herzog is expected this week to call formally on either Prime Minister Yitzhak Shamir, the Likud leader, or his Labour counterpart, Foreign Minister Shimon Peres, to form a gov-

ernment.
However, the reformation of the broad coalition which has governed Israel for the past four years, and has lately been a by-word for stalifying deadlock, is most unlikely to be on the same basis as in the past. For a start, Mr Shamir is insisting that he, as head of the largest party, should lead the government for its entire term. According to Likud poli-ticians, here would be no "rots. tion" with Mr Peres, or equal weighting in the Cabinet or

Knesset committees: Labour is believed to be pressing for the Deputy Pre-miership, the Defence portfolio, alist Agudat Yisrael faction

and control over the Financa Ministry - now in Liknd hands - so as to be able to save the large number of Labour-linked industries and farms in acute financial diffi-

But the biggest price that Mr Peres would almost certainly have to pay, if he is to join a Likud-led government, would be the abandonment of his cherished Middle East peace plan. Its centreplece – an international conference – is hitterly opposed by the right and commands barely luke-warm support within his own

who gets the President's Who gets the President's who gets the Fresident's nod, Mr Shamir or Mr Peres, was last night still in doubt, waiting on the outcome of a meeting of the Council of Torah Sages, the chief spiritual authority of the upstart Shas party. On the strength of its six seats in the Knesset, Shas has been playing Labour and lived off against seath other. Likud off against each other,

demanding a string of impor-tant official posts.

In turn, the Shas demands have infuriated the second largest ultra-Orthodox party, Agudat Yisrael, and the smaller Degel Hatorah. While-Degel Hatorah's twn seats appear firmly pledged to Labour, on the basis of its spir-itual leader's dovish views. where the five parliamentar-

will eventually fall remains in Agudat Yisrael professes dis-illusionment with the Likud,

illusionment with the Likid, its natural ally, because of broken past promises over the tightening up of religious ar social legislation. It has, like other ultra-Orthodox parties, been shocked by the hostile response their election success has aroused among secular tracks. Israelis, and another reason
being considered for siding
with Labour rather than Likud
is to lessen the public reaction.
Whichever way "the
schwartzers" ("those in
hlack"), as other Israelis detign

atorily refer to the ultra-Ortho-dox, decide to swing, both Labour and Likud have committed themselves to supporting e change in the country's Law of Return, or else in the role of the rabbinical courts, which would discriminate against Diaspora Jews from the Reform and Conservative branches of Judaism.

Horrified at the prospective changes, which could open up changes, which could open up an enormous split hetween Israel and the Diaspora, a dele-gation of US Jewish leaders is due in Israel this week to appeal in person to Mr Shamir-and Mr Peres not to go along with the ultra-Orthodox. If the tentative contacts of the part tentative contacts of the past few days between the two leaders' aides come to fruition, they could find themselves pushing on an open door.

Koor recovery plan calls for Israeli banks to write off \$94m

A NEW recovery plan being presented by Israel's Koor Industries, the deeply troubled conglomerate, to its creditors calls for a two-year write-off by Israell banks of loans equiva-lent to \$94m (£52m). No similar debt cancellations

are being requested of foreign

Copies of the 250-page turn-around programme, essential to Koor's survival in its present form, will land on the desks of its US and West European bankers this morning, just 72 hours before the group's lawyers return to the Tel Aviv District Court, to respond to a liquidation request made by Bankers Trust of New York.

Despite the high demands being made of them, the first response from the Israeli banks has been one of relief. "It looks like a logical mix of internal changes and external

demands," one senior banker commented last night. Among its other key points

• The shedding of 7,200 more employees over the next two years, partly through redundancies and partly through the disposal of unwanted units. A concentration of Koor's activities on five core areas: electronics, chemical products, foodstuffs, construction materi-

als and metals.

The immediate provision by the Government of \$50m in new working capital, in the form of a capital note. Given hy Koor to the Finan-cial: Times yesterday, the recovery plan highlights the

heavy, non-recurring expenses which will be required if it is to succeed. These are forecast to reach the shekel equivalent of \$250m over the next two years, of which half would be

accounted for by severance payments.

In consequence, anticipated net losses over the same period are being revised upwards. For 1988, the after-tax loss is now forecast at Shekels 221m (£77m), compared with \$253m (£140m) last year. If all goes well, the leading Israeli group hopes to show a healthy oper-ating profit in 1989 and to be back in the black the year

Buoyed by the unexpected welcome he received on Friday
from the presidents of the big
israeli banks, Mr Benjamin
Gaon, Koor's chief executive, is
-hopeful-of a similar vote of
confidence from most of his foreign creditors before Thurs-

day's court appearance.
If this is forthcoming, Koor

Semiconductor sales 'to slow'

By Terry Dodsworth, Industrial Editor

THE growth rate of the European semiconductor mar-ket is expected to slow-sharply next year, after showing an increase of almost 25 per cent in 1988.

Figures from Motorola, the US semiconductor maker with a big base in Western Europe, indicate a 10.7 per cent increase in chip sales next year, with the Italian market showing a particularly sharp expansion of 20.6 per cent, fol-lowed by the UK with 13.7 per

Total European sales are expected to reach \$9bn (£5bn), against \$8.1bn in 1968. The figures underline the growing importance of Japanese and other Far Eastern

semiconductor makers in the

European market. In 1988, Japanese producers will account for about 14 per cent of Euro-pean sales against 10.2 per cent four years ago, while other Asian-Pacific manufacturers, mainly the South Koreans, will have captured a little more than 1 per cent of sales against virtually nothing in 1984.

Indigenous European pro-ducers maintained their market share last year, with 41 per cent of total sales, while Amer-ican-owned producers lost almost 8 points to register 44

per cent of sales. A significant proportion of the Japanese increase, how-ever, was attributable to the steep rise in the price of memory chips. With these prices. likely to moderate later this

year, the market share of the Far Eastern producers may

Mr Jan Calen, Motorola's European marketing director said the high rate of growth in UK consumption of semicon-ductors was heavily infinenced by the presence of several big multinational chip users in Britain.

Britain had particularly ben-efited from the high level of activity among computer makers, in which a number of USowned companies were active, he said. In addition, UK demand had been stimulated by the growth of consumer electronics production, where output in Britain was now dominated by the Japanese.

Return to strict apartheid looms Second minister By Anthony Robinson in Johanneaburg resigns

in Greece

GREECE'S Minister of Justice, Mr Agamemnon Kontsogior-gas, has resigned over the scandal involving fugitive banker and press baron Mr George Koskotas, who was charged last month with ent and foreign cur-

By Andriana Jerodiaconou

He is the second Socialist Government minister claimed by the affair. Last week the Minister of Public Order stepped down after the 34-year old magnate disappeared.

Mr Andreas Papandreon, the Prime Minister, announced yesterday that he would carry out a full cabinet reshuffle this week.

Greece's opposition parties dismissed Mr Kontsogiorgas' move as a tectical manoeuvre. They are pressing for the whole Government to resign

and for early elections.

The Bank of Greece, meanwhile, rejected a request by
the Justice Minister for an investigation of the efficiency of past central bank inspections of the Koskotas-con-trolled Bank of Crete.

Mr Dimitris Chalikias, the Bank of Greece governor, said the central bank had repeatedly called for changes in the banking laws to let it pene-trate Mr Koskotas' affairs, but the government had ignored or responded inadequately Mr Koskotas invoked a con-identiality law to deap canfidentiality law to deny central bank investigators information about his personal account at the Bank of Crete, the suspected conduit of irregularities. The Bank of Greece eventually persuaded the Gov-ernment to suspend Mr Koskotas from the Bank of Crete and

BIGOTRY is alive and well and open racism is about to be restored to the status of public policy in the Conservative Party-ruled towns and rural dorps of South

Africa.

This is the outcome of a summit meeting of newly elected CP local councillors in Pretoria over the weekend. More than 600 councillors were elected on the CP ticket at last month's municipal

At the closed session, Dr Andries Treurnicht, the Conservetive Party leeder, reportedly underlined the party's determination to return to old-style apartheid in the 90 or so town and village councils the CP now controls in the Transvaal and the Orange Free State. Indian-owned stores.

Orange Free State.

As councils prepare to put up the "slegs blankes" or "whites only" signs on municipal property, including toilets and park benches, the newly CP-controlled town council of Boksburg in the Johannesburg industrial suburbs is preparing to close the town's parks and lakeside boating and recreational facilities to non-whites. They were formally onered only two years. Since these districts in many cities were were formally opened only two years

Many municipal enterprises, such as swimming baths and parts of the public transport system, have never been de-seg-regated, even in big cities such as Johan-nesburg controlled by the ruling national

party.
Other privately owned facilities like cinemas, were opened to all races only after

international film distributors threatened to cut off the supply of new films to South African cinema audiences.

Apart from restoring so-called "petty apartheid", local CP councils are prepar-ing to challenge the recently approved law permitting non-whites to do business in central business districts. The aim is not to prevent blacks coming into "white" city centres to shop at white-owned stores but to reduce competition, especially from

opened to all races, many Indian traders, who formerly ran businesses bidden behind white "front men", moved in to provide a better service and work longer

In many cities like Johannesburg, up to 90 per cent of total husiness is done with

mack consumers who either work in the city or flock into the big shops at the weekend in black-owned mini taxis.

Now many white traders face the risk of a black consumer backlash if their councils go shead with plans to turn the clock back to the days of the classic apartheid of Dr Hendrick Verwoerd.

Under the emergency regulations it is illegal for blacks to call for consumer boycotts of white-owned stores. Several white businesses were crippled by black consumer boycotts before the emergency was re-introduced, especially in the Eastern

Many of the boycott leaders are still in

detention without trial. But underground black community leaders believe the new race restrictions could ers believe the new race restrictions could age in raise tension, especially in the decaying industrial and mining towns east and west of Johannesburg, where the last bleck revoit began in 1984. Towns on the East rand like Springs and Boksburg, which are surrounded by large black townships, have now fallen to the CP and are in the forefront of moves to turn back the

Hopes high on southern Africa

By Michael Holman in Geneva

HOPES continue to rise for a successful ontcome to the south-western Africa peace talks, as delegates have agreed to hold the first plenary session of the four-country talks seeking independence for Namibia and the withdrawal of Cuban troops from Appela

Cuban troops from Angola.

The plenary, to be chaired by
Dr Chester Crocker, the US
Assistant Secretary of State for African Affairs, will be attended by delegations from Angola, Cuba and South

It is scheduled to begin today, although at one stage delegates were preparing to meet last night.

One delegate described nego-tiations as bringing the parties closer to a settlement than at any time since the US began playing the main mediating

role nearly eight years ago, when President Reagan took

Since then the US and South Africa have made the granting of independence to Namibia conditional on the withdrawal of Cuban troops from Angola, now numbering 50,000.

Differences among South

Africa and Angola and Cuba over the terms of the withdrawal was the main obstacle to a settlement.

Delegates to the Geneva meeting are discussing a US compromise proposal. South African officials have already said they are prepared to respond "flexibly" to the US terms, which call for the depar-ture of four fifths of the Cuban forces within 18 months. Although most delegates express optimism about the eventual outcome, they now believe a further round of talks may be necessary before e formal conclusion to the negotiations, which would take place in the Congolese capital of Brazzaville.

Since the talks began on Friday, Dr Crocker has been hold-ing a series of bileteral exchanges with the three delegations.

Delegates heve also been meeting Mr Martti Ahtisaari, the Finnish diplomat who will head the 7,500-strong UN team which would preside over Namibia's seveu-month transition to independent elections. South Africa has already

agreed in principle to the terms of this transition, set out in UN Resolution 435, drawn up in 1978. Observer, Page 28

Venezuela's oil export revenues to fall by \$2bn

By Joseph Mann in Caracas

VENEZUELA's oil export revenues will fall this year by around \$2bn (£1.1bn) as a result of lower oil prices on international markets, according to the Venezuelan Minister of Energy and Mines, Mr Julio Cesar Gil.

Last year Venezuela's petro-leum exports totalled \$9.1bn, and \$13.1bn in 1985.

One of Venezuela's nationalised oil companies, Corpoven, has revealed it had made an important discovery of crude oil in the eastern state of Monagas. Corpoven said an exploratory well called Carite Norte 1-X was producing over 10,000 b/d of 25 degree API crude oil

into a complex of interdependencies. Institutional investment strategies and private portfolio management today call for a global perspective. And a bank of international

The world's capital markets have evolved

If you want to do well on Wall Street, you better be there.

That is why BHF-BANK is right at home on all the world's major stock exchanges - not as an observer, but as a market force. BHF Securities Corporation in New York, for example, is registered as a Broker/Dealer and Investment Advisor, with seats on both the New York and the Boston Stock

There as in London and Zurich, Singapore and Tokyo, BHF-BANK is engaged in largescale securities trading. For the customer's benefit it is on the scene, obtains market intelligence from the source, and can take action instantly.

An active presence on the world's stock markets is only part of what it takes to make a bank a partner for the discerning investor. Equally important are a serviceminded approach and customized problem solutions - the style of a merchant bank, which BHF-BANK has cultivated for more than 100 years.

WE SUPPLIED 15 BILLION GALLONS OF WATER TO ETHIOPIA, AND ALL IT TOOK WAS ONE DISH.

Everyone feels for the suffering of the Ethiopians. But sympathy alone doesn't save lives.

So when the Overseas Development Agency came to us, Wimpey was glad to help.

We perfected a computer system that uses satellite data combined with contour maps to find underground water faster and more accurately than ever before.

Having located the water, we send over teams of experts to do the drilling and development work, before teaching the locals how to maintain the wells.

All this extra effort is paying off.

Water supplies in the Welo Province are now greatly improved, along with the quality of life.

Across all our business areas—Contracting, Minerals, Homes & Leisure, Property and Consultancy — Wimpey goes to more trouble than anyone else.

That's because we set ourselves higher standards.

Which is why, by looking to the heavens, only Wimpey could expect to answer so many prayers.

WIMPEY
Breaking new ground.

OVERSEAS NEWS

Italy, Belgium move to cut back Gulf presence

ITALY and Belgium have become the latest countries to reduce their presence in the Gulf in the aftermath of the Iran-Iraq war. This leaves just 50 Western ships to patrol the region, down from 70 at the height of hostilities.

The last Belgian minesweeper left the Persian Gulf

yesterday, ending a one-year mission which involved three ships and 275 men, the Minis-try of Defence announced. The Crocus and its 50-man

crew left Muscat, Oman, to reach Belgium on December 23. Italy will withdraw all of its Guif fleet – two frigates, two minesweepers and a supply ship – by the end of this month, a senior Italian naval officer said in Abu Dhabi last week. Eastern and Western fleets will still maintain a presence, however, as doubts per-sist on the durability of the ceasefire. Mr Hashemi Rafsanjani, Iran's Parliamentary Speaker and acting command-er-in-chief, said in Tehran on Friday that the "no war, no peace" situation was unaccept-able, and that without peace the fighting would resume.

In view of these doubts, Britain's presence has remained the same. Commander Neil Law, chief staff officer of Britain's Armilla Patrol said in Duhai last week that there had been "no change in force levels," of the British naval presence.

The three British warships which make up the patrol will be replaced when they com-plete their tour of duty shortly. The US has started to dismantle one of two artificial off-shore landing and supply plat-forms in the northern Gulf, but still maintains 26 ships in the area, according to General George Crist, commander of the US Central Command. France plans no cuts in its fleet of 13 ships, Mr Jean-Pierre Chevenement, French Defence Minister, said in Riyadh earlier this month. It did withdraw the circumstance of the control of the aircraft carrier, Clemen-ceau, in September, however – a month after the ceasefire. The Soviet Union maintains

five ships in the region.
The Western ships which remain will concentrate on mine-clearing operations, which have taken on a new urgency. US officials estimate there are between 150 and 200

The Joint Mine Counter-Measures Operations, operated by the UK, Bslgium and the Netherlands, is clearing mines further south, in areas where the Armilla Patrol "accompan-ied" British flag carriers until

mines floating in the northern

Eight Gulf states, including Iran and Iraq, which comprise the Regional Organisation for the Protection of the Marine Environment (Ropme), held an emergency session in Kuwait earlier this month to discuss ways to clear the Gulf of mines, shipwrecks, unexploded bombs and chemical pollution.

Dr Abdul-Rahman al-Awadi, Ropme's acting executive sec-retary and Kuwaiti Minister of

Planning, said 657 ships and tankers had been "caught in the crossfire" of the war.

He urged the international community to continus its efforts to help clean up the area, at the same time insisting the community to continue the area, at the same time insisting the continue of the clean up the area, at the same time insisting the continue of the clean up the clean u that such an operation was the responsibility of the regional countries.

Riyadh, Peking to open commercial relations

SAUDI Arabia and China are to open commercial offices in each other's capitals following an agreement signed in Washington on Friday by their respective ambassadors to the US, Prince Bandar Bin-Sultan, the son of the Kingdom's defence minister, and Han Xu, writes Robert Allen from

Dubai.
The offices will be the first between the two and a possible prelude to full diplomatic recognition.

Saudi Arabia and Bahrain are the only two members of the six-nation Gulf Co-operation Council - which also includes Kuwait, Oman, Qatar, and the UAE - not to have diplomatic relations with either of the two major com-munist powers.

A possible sweetener on the part of the Chinese could have been the reported increase in

the Chinese quota - from 3,000 to 4,000 - of Chinese Moslems permitted to make the pilgrimage to Mecca.

The npgrading of relations comes at a time when Saudi Arabia is broadening its relations with a number of foreign countries, including the Soviet

Union.
The establishment of official commercial ties with China also reflects the increased warmth between the two countries since the start of general trade talks at the end of last year culminated in the Saudis' purchase last April of Chinese ntermediate-range missiles. It is understood in Riyadh

that these discussions, initiated by the Chinese through Han Xn and the Saudi embassy, were followed up in Peking between Prince Bandar and other Sandi emissaries.

Saudi Arabia's acquisition of the missiles drew an indignant response from the US, particularly from Congress, though the deal was seen in Riyadh to be an extension of Saudi Arabia's general broadening of foreign and defence links.

Britain and Argentina to hold talks at UN

BRITAIN and Argentina will hold talks shortly at the United Nations for the first time since Nations for the first time since the 1982 Falklands War but the agenda will be UN matters rather than a restoration of relations, the Foreign Office said yesterday, AP-DJ reports.

Mr Dante Caputo, Argentina's Foreign Minister, who is currently president of the UN General Assembly, requested the meeting with Sir Crispin Tickell, Britain's ambassador to the United Nations, the British Foreign office said.

ish Foreign office said. .

"No date has been agreed for this meeting," a Foreign Office spokesman said. Mr Caputo's request was made in his capacity as president of the General Assembly.

It was "completely unremarkable" because in that post he would be expected to hold

lations' Security Council.
"It is inconceivable for our

talks with Britain and all other members of the United

ings with the president of the General Assembly, who just happens to be the foreign min-ister of Argentina," the spokes-

The Foreign Office dismissed a report in The Sunday Times weekly newspaper which said that "each side will use the opportunity to sound out the other on ways of advancing towards a restoration of diplomatic and commercial relations

Britain severed diplomatic relations with Argentina after the South American country invaded the British-ruled Falk-land Islands in 1982.

Argentina claims the islands as part of its territory. A British expeditionary force recaptured the south Atlantic islands after a 74-day war. Mrs Margaret Thatcher's Conservative government has refused to discuss Argentina's demand for sovereignty over the Faiklands.

Pakistan's politicians hedge their bets

MY MOTHER told me never to trust a politician. Mothers are not stupid; neither are the peo-ple of Pakistan. In a recent survey, almost half those asked said the nation's political leaders were not dependable.
This reaction is hardly sur-

prising. Almost a third of the candidates of the main opposition party (PDP) joined it in the past three months. Many signed up on the last day that tickets were issued.

One man attracting hig crowds these days is Mr Rana Nacem, Defence Minister in the last Cabinet. They are curious to hear him attack his former Cabinet colleagues and shout slogans praising Bhutto — the man for whom he never had a good word. If Naaem loses in next Wednesday's election, his

Voters remain sceptical, Christina Lamb writes

seat will still be in the family because his main opponent from the Moslem League is his

All over Pakistan, brothers and cousins are standing against each other. To retain the local influence necessary for the survival of feudal families, it is crucial for them to have someone in politics. Shah-zada Sultan-i-Rum, brother of the last Wali of Swat, explained: "Our family is field-ing several opposing candi-dates for each of the four seats in Swat. That way we make sure we win. It's just like back-ing all the horses in a race".

Only those concerned with labels care which party wins Pakistan's first free (and, hopefully, fair) election in 18 years The same faces and families will be prominent. Even the country's leading politicians hedge their bets by contesting

large numbers of seats.

Ms Benazir Bhutto, the PPP leader, and her mother, Nusrat, are fighting five national seats between them. The Moslem League has Nawaz Sharis contesting four national and five provincial seats, while General Fazle Haq is a candi-date for two national and three provincial seats.

After initial doubts, the people of Pakistan are enjoying the election. Politicians get no radio or television access. This means their message has to be carried on whistle-stop, fleshpressing tours where people, long frustrated by Pakistan's total lack of entertainment, get a chance to dance, sing, release balloons and let their hair down in a way that normally would end in arrest.

To contest the election you must be rich, and many workmust be rich, and many work-ers see the campaign as their chance to effect a redistribu-tion of wealth. While the offi-cial limit on spending is Rupees 500,000, most candi-dates estimate that they spend more than that each day much slipping into the pockets of everyone from the man printing the posters to the rickshaw driver paid to display

In the tribal areas, the pro-cess is much more blatant. Only tribal chieftains, Maliks and agency councillors have the right to vote. They number between 900 and 8,500 in the between 900 and 8,500 in the eight constituencies. Pathans will sell anything — including their children, for the right price — and those privileged with a vote expect a hafty sum for their support, at least Rupecs 10,000. Sailad Mahsud, a journalist, explained: "Trib. a journalist, explained: "Trib-als don't consider it immoral to accept money for their votes as this is a once-in-a-decade

this is a once-in-a-decade chance to cash in".

Addressing a rally in a village in Punjab, Nawaz Sharif, Chief Minister of Punjab and aspiring prime minister, raised loud cheers by announcing plans to huild a school and a road, plus a large contribution to the town funds.

One old man leapt up and asked for his village school to be upgraded. Beaming, Nawaz Sharif agreed. Immediately the crowd was in uproer, all yelling their demands, while the red-faced Chief Minister had to be smuggled from the stage.

Bofors row haunts Gandhi

A major clash is likely today, writes K.K. Sharma

Gandhi: charges resurface

boycotted the inquiry, three members of parties with which the Congress-I had an alliance

were part of the parliamentary

committee.
The dissenting note said that
Mr Gandhi had shown
"extraordinary interest" in
favour of the Bofors deal. Nev-

ertheless, it admitted that the

Last June's newspaper alle-gations, now repeated by Mr Singh, showed that the "wind-

ing up" charges said to have been paid hy Bofors to its

agents were recurrent payments running concurrently with deliveries of howitzers

under the deal. The documents

stablished.

THE \$1.4bn deal between Bofors of Sweden and the Indian Government in 1986 for the sale of howitzers for the Indian Army continues to haunt Mr Rajiv Gandhi, India's

Prime Minister.
Mr V.P. Singh, the opposition Isader, resurrected the subject last week and it is unlikely to die before the next general elections. general elections.

What Mr Gandhi must have hoped had been buried last

April with the completion of an inquiry by a parliamentary committee into charges of payoffs, has now been given fresh life by Mr Singh's claims that the prims minister was the recipient of at least some of the commissions said to have been paid by Bofors, and that he allegedly stashed these away in a numbered Swiss bank

Congress-I leaders and senior Indian ministers have claimed that Mr Singh's "disclosures" were politically motivated. Mr Singh has admitted that the documents he released last week were, in fact, first pub-lished by a Madras newspaper in June. A major row in Parliament is

A major row in Parliament is certain today, when the two houses meet again after a week's recess. Congress-I members are preparing to challenge Mr Singh to repeat his charges before parliament so that they can seek to censure him.

The opposition will wadenby.

The opposition will undoubt-edly retaliate by repeating the charge that Mr Gandhi is the recipient of the pay-offs. The battle for the next general elec-tion has been joined and allegations of corruption will clearly be a central issue.

The Bofors deal was never really closed by the parliamen-

tary committee's report, since it confessed its helplessness "to reach any conclusion in regard to the identity of recipients" of what Bofors called "winding-up costs" to its agents and what others allege were huge kick-

published by the newspaper also showed that the amounts involved were substantial -Rs1.6bn rather than the Rs640m determined by the par-The report said Bofors had expressed its "inability to furnish copies of initial as well as termination agreements with the three companies to whom winding-up costs were paid". This was hardly conclusive and suspicions have remained.

liamentary committee.

The payments were said to have been made to three companies which Mr Singh has alleged are fictitious and that at least one of them - Svenska and suspicions have remained.

These were increased by a dissenting note appended to the report by an opposition member whose political loyal-ties changed while the committee was in session. Although the major opposition parties of Panama - was a front for Mr Gandhi. The two others are said to be A. E. Services of Britain and the anonymous PITCO, and payments alleged to have been made into Swiss accounts, to have borne such code names as "lotus", "tulip" and "Mont Blanc". The rest is

conjecture.
Although the Bofors case will remain in the news in the run-up to the elections, the full truth may never become

known.
The only other source would be the Swiss banks, and their secrecy is legendary. Finance ministry officials say that efforts are being made to enter into an agreement with Swiss anthorities for mutual assis-tance, but progress is slow. Until a treaty is signed, the Indian Government plans to enter into a memorandum of

understanding with Switzer land for assistance in specific cases of Indians having accounts in Swiss banks. This is the result of a mission sent to Switzerland which found that although the Swiss anthorities do not permit generalised inquiries about customers' accounts, they would, under certain condi-tions, entertain requests for

Cynics say these requests will probably never be made, since people in authority are believed to have been involved in innumerable cases of corruption. More allegations of pay-offs have surfaced in the past few years, but the feeling is widespread that these are the tip of the iceberg.

In the Anglo-Sazon world,

managers must prove them-

selves capable of running an enterprise or else face expul-

acquisitions gather pace in Europe, Dutch companies risk isolating themselves behind notoriously protective anti-takeover defences.

These ramparts are designed to fend off hostile takeovers and protect management so the company's "identity and continuity" can be preserved. Dutch managers oppose unfriendly acquisitiens because of the perceived threat to leng-term thinking, and focus on short-term consider-

ations.

But Dutch captains of industry do not hesitate to declare war on companies abroad. In 1984 they took over 35 per cent more companies abroad than foreigners did in the Netherlands. Last year they purchased four times as many. In overall foreign investment the Dutch rank among first in the world. The Netherlands tovested \$47bn in the US alone in 1987, second only to Britain. This lack of reciprocity is provoking charges of protectionvoking charges of protection-ism and threatening to staunch capital flows into the Nether-

lands.

It raises questions about
Amsterdam's ambitions to join
the big league of international
financial centres. The virtual
absence of risk from contested
takeovers is blamed in part for Amsterdam's historically low share prices when compared to international etandards. The Amsterdam stock exchange has been eclipsed by Milan and Madrid.

"I'm particularly concerned that if the Netherlande and other countries on the Continent don't make it easier to invest in them, the capital will simply go elsewhere," warns Mr Jehn Cutts, who recently joined Samuel Montagu in Londam. "If the Dutch won't listen

don and has worked in Amsterte reasoned argument, there will be trouble." The Amsterdam bourse has

sion. Anti-takeover defences in the Netherlands go back to a time when shareholders first last year the big Dutch publisher, Elsevier, tried to buy a Philippines rebel army chief walks out of jail

By Richard Gourley in Manila

THE HEAD of the communist THE HEAD of the communistrebel army in the Philippines walked away from a maximum security prison at the weekend, after being allowed to attend the birthday party of his former warden. It is the third embarrassing escape of a high-ranking opponent of the Philippine government this year. pine government this year.

An angry President Corazon Aquino immediately berated Major Gen Ramon Montano, the police chief in charge of the Constabulary headquarters where Mr Romulo Kintanar was being held in a high secu-rity stockade on charges of

Three efficers have been relieved of their dnties and three guards arrested but it was too late to prevent another damaging blow not just to the government's credibility hut also to army efforts to undermine the communist move-

ment's political leadership.

The dismay over the failure of the security measures was heightened by knowledge that Mr Kintanar, a hard-liner who advocates increased military activity, set up the urban guer-rilla hit squads that the army says have killed more than 100

police and soldiers over the past two years. Mr Kintanar and his wife, who also escaped, were cap-

tured in March with seven communist leaders in raids that showed considerable infiltration of the party's top ranks Mrs Aquino has recently used these captures as proof that the Philippine army is winning the 20-year struggle against the 25,000-strong New People's Army.

The escape had another bizarre twist. The couple were attending the birthday party of Col Robelito Comilang, the camp warden who last month was relieved of his duties after a leader of a failed coup in August last year was shot dead while trying to escape.

The leader of that coup, Col Gregorio Honasan, who retains a degree of support within the 165,000-strong military, suc-cessfully escaped from a prison ship in April by sailing ashore.

Daye later, another coup leader, Col Eduardo Matillano, was allowed to leave his prison cell to visit a dentist and escaped. The latest embarrasement for the Manila government coincides with a visit by Senator Robert Dole of the US, who is talking to Philippine leaders about the future of American military bases after 1991, and familiarising himself with the problems facing the

The Kluwer battle focused the doors can deprive share-holders of rights, impede effi-cient capital formation, coddle management and depress equity prices. The leading employers association retorted that Dutch corporate defences were no stronger than in other countries, including the UK, where nationalism plays a larger role Besides such prowhere nationalism plays of larger role. Besides, such pro-tections give management time te censider hostile bids and thus foster efficient capital for-

mation, it asserted.

But the bourse went ahead and announced plans to curtail corporate defences. For companies seeking an initial listing, the curbs would have taken effect quickly, and for the rest on January 1 1991. Protective measures would have been limited. the US. Today, the most popular devices include priority shares, which give holders veto rights over decisions such as capital increases and statute ited to two at a time and pre-ferred shares limited to a maxi-mum of half the outstanding Priority chareholders are usually "foundations" whose directors are company manag-ers. Preferred shares also con-fer latitudinal powers and are tucked into managementshare capital without shareholder approval.

"Administration offices" would have been required to act in shareholders' interests and investors would have been forced to announce when a threshold percentage of shares had been acquired. No such reporting requirement exists new. But listed companies revolted, and the plans were postponed indefinitely. Other kinds of shares limit voting rights to a certain number regardless of size of the holding. Finally, companies can incorporate in a legal

Baron van Ittersum hopes to send revised proposals to the finance minister for approval soon, hnt they are widely expected to be watered down. Meanwhile, captains of indus-try have bended together to lobby against disarmament. Four of the Netherlands'

most powerful financial institutions have formed a "white knights" fund to rescue companies under assault by a hostile bid thet is deemed too low.

smaller rival, Kluwer, against Called "Winter Palace", it will buy a targeted company's shares, but only at its request, then resell them at a profit. The Kluwer battle locks on then resell them at a prout. The venture comprises Amsterreform. Baron van Ittersum The venture comprises Amsterdam bank, the second thank in the countries of the cou ond largest bank in the country, Nationals-Nederlanden and Aegon, the top two insurers, and Philips' pension fund.
Since "Winter Palacs" will act only at victims' behest, it

differs from a conventional arbitrageurs' fund and raises several questions of practicality. It is unclear how the ad hoc group can rally quickly enough during volatile bid battles since it may invite different partners for each manoeuvre and must jointly decide whether a bid is too low. It is concluded the partners how "Winter the conclusion of the conclusion o

whether a bid is too low. It is equally unclear how "Winter Palace" can operate commercially when it must top a competing offer, then hold the acquired shares longer than the hostile bidder.

Share prices often fall after a bid battle. Some bankers contend fair battles can enly be waged if shares are registered. Mr Win Bischoff, chairman of J. Henry Schroder Wagg, the London merchant bank, said London merchant bank, said recently in Amsterdam: "Bid battles can only come into play when there is access to share-holders and they can respond. It is important not only to know who they are but who

know who they are but who advises them."

As European integration prompts more corporate consolidation, Mr Cutts hepes Dutch managers will listen to clearly defined strategies and reasoned arguments when confronted with suitors. "The best way to change is te be approached by a high-quality buyer with proper financing and well-considered plans," he says. The EC merger code now under discussion in Brussels sidesteps the question of antisidesteps the question of antitakeover defences hut more uniform rules seem inevitable if a level playing field is to be

BEDSPRING OR EGGCUP?

One in a million sees it as an eggcup. His name is Nick Munro.

umpus

He first encountered said bedspring while rummaging in the attic of his Chester home. Eureka!

Suddenly, in Nick's mind's eye, the rust encasing the bedspring seemed to peel away. He peered at the erstwhile humble object and saw it in a new light.

Burnished and silvery it was, adorning a tasteful breakfast table with a delicious, fresh boiled egg nesting neatly on top.

As alternative uses for other humble objects began to crowd his mind, so did the thought that people might actually buy them.

Nick wrote to Livewire, a scheme set up by Shell in 1982. Its aim is to help young people get their new business ideas off the ground. At Livewire, Nick found practical advice on the nitty-gritty of premises, production, finance and marketing, the perfect counterweight to his flight of imagination.

Now Nick is in business as Munro & Co. Designer Tableware, numbering Harrods and The Design Centre among his outlets.

He's also this year's winner of the Livewire award as creator of the most enterprising new business idea we've encountered.

The Livewire scheme is open to people aged 16 to 25.

So, if you're another Nick Munro (or you know someone like him) write to Livewire, Freepost, Newcastle-upon-Tyne NEI IBR.

If the idea is everything you think it is, you can be sure we'll provide a springboard.

YOU CAN BE SURE OF SHELL

If your five-year-old son were asked to draw a picture of his family, would you be in it?

'I WAS really choked. He gave it to me at breakfast one Saturday. Really proud of it, he was. There was his mother, his big sister and him. I just wasn't in the picture.'

Most people would agree that time is the one thing we could all do with more of.

What most people don't realise is that the right communications package is one of the shorter routes to saving time at work.

Unfortunately, given the complexity of business communications today, getting one's hands on the right package isn't exactly easy, is it?

To help you identify the most timesaving technology for your particular business, British Telecom has compiled a comprehensive guide to the latest in telecommunications.

It's called Workplan and it's available free to anyone in business.

Workplan will help you evaluate your requirements and explain the communications options that we believe would be most likely to save you time.

(At British Telecom, we can offer everything from simple radio pagers to thirdgeneration fax machines to digital data systems.)

To receive your copy of Workplan, call us free on 0800 800 840, 24 hours a day, seven days a week. Don't let the pressure of work put you off, will you? In business, time is money. In your personal life, it can be priceless.

CBI/FT survey says mortgage rates may be depressing sales

Consumer spending slows down

signs of a marked moderation last month in British retail sales growth and consumer spending come in a survey released today — the first of a series of figures this week on the UK economy.

The Confederation of British Industry/Finerated

Industry/Financial Times dis-tributive trades survey shows retailers reported sales volumes increased at a much slower pace in October than in the previous month. Sales were also below retailers expecta-

The results suggest that the steep rise in mortgage rates since the summer may be beginning to have an impact

on consumer spending.

However, the slowdown is from exceptionally high levels during the summer and the

survey shows that retailers remain fairly optimistic about sales this month.

The survey also shows a hig slowdown in the rate of growth of sales by motor traders after exceptionally strong growth during the summer.

It is likely to prove of some

comfort to financial markets which have been looking for signs of a slowdown in eco-nomic growth.

Lower retail sales growth in coming months may help reduce imports, easing the UK's big current account defi-

Later today the Department of Trade and Industry will release its figures for retail sales in October. Figures for September showed a fall com-pared with the previous month

although the year on year rate remained high.

Other figures this week include the retail price index on Friday which is expected by analysts to show Britain's inflation rate rising above 6

inflation rate rising above 5 per cent.
Figures for average earnings, which have also been rising strongly recently, are released on Thursday.

Mr Nigel Whittaker, CBI/FT survey chairman, said this was the second month in succession that the survey had indicated slower growth in retail sales. He said: "Consumer confi-

dence seems to have been fur-ther hit by October's mortgage

rate increase, coming on top of earlier interest rate rises. Although retailers are still

optimistic, the reality is that we may now be in for a period of significantly slower growth in the retail sector." The survey shows that in

October, 54 per cent of retailers reported sales volumes were higher than the same month a year before and 22 per cent said they were lower. The dif-ference between those report-ing increases minus those not-

ing falls was the lowest for any month since April. For November, 59 per cent of retailers expected sales to be higher than the corresponding month a year before while 8 per cent forecast a fall. This was the least optimistic predic-tion since retailers were ques-tioned on expectations for

£400m pollution contract first stage in power stations' refit

By Andrew Taylor, Construction Correspondent

THE UK Central Electricity Generating Board will decide shortly whether John Brown or FKI Babcock will win a £400m contract to combat air pollution at Drax power station

in North Yorkshire It is expected to be followed by further orders worth up to £1bn from other British power

biggest coal-fired power sta-tion. At least three other groups of British, American and West German companies were bidding for the £400m contract to reduce its sulphur dioxide pollution.

Other companies invited by the CEGB to bid for the work included a consortium involv-ing Costain Engineering of the UK and Deutsche Babcock of West Germany. A second group included Balfour Beatty of the UK, and Lodge Cottrell of the US, under licence from Saarberg-Hoelter of West Ger-

The winner of the Drax contract is expected to be in a strong position to bid for a further £800m to £1bn of orders from British power stations. These are expected to emerge as a result of a European Com-munity decision in June to reduce sulphur dioxide emis-

sions from power stations by 60 per cent by 2003. John Brown the power engi-neering subsidiary of Trafalgar House and FKI Babcock the electrical and engineering group have been asked sepa-rately by the CEGB if they would be prepared to provide the technology and act as man-aging contractors for the entire

The board has estimated that a further 6,000 MW of existing coal fired capacity will need to be treated to meet the new European Community require

This would be in addition to the 4,000 MWat Drax and a further 2,000 MW for which the board has already committed itself to treating. It will also fit sulphur removal plant to all new coal fired power stations. The orders will need to go ahead irrespective of the priva-tisation of the electricity indus-

Just to meet the minimum requirement laid down by the EC will be very costly. Around 35,000 tonnes of steel, for instance, is likely to be required at Drax, about a third of the steel used to build the power station.

Babcock International,

which was acquired last year

for £416m by FKI Electricals, supplied the boilers for Drax and also built part of the power station. It has already claimed success for an experimental pilot model gas treatment

FKI Babcock, however, has been seeking a purchaser for its energy interests. Talks have taken place with GEC of Britain and with Westinghouse of the US but have failed to produce a

The company's sulphur dioxide removal process uses Japanese technology under licence from Babcock-Hitachi, a Japanese company which shares the same Babcock name but has no equity connection.

John Brown uses an American system under licence from General Electric which it says has been very successful in treating gases from very large US power stations, similar in size to Drax.

Both processes involve lime-stone which is turned into a slurry and sprayed over exhaust gases as they pass through a large tower. The residue is processed to create gyp-sum which the CEGB proposes should be sold to building material companies to make plaster board.

BA offers bonus to stem brain drain

By Philip Bassett, Labour

BRITISH AIRWAYS is offering to pay scarce computer pro-grammers a bonus of a year's pay if they agree to remain with the company for a threeyear period.

The bonus is a direct attempt by BA to prevent poaching of its headquarters staff skilled in transaction processing facility (TPF), a particular form of computer pro-

Other European and Ameri-can airlines have been offering BA's TPF staff pay increases of £5,000-£6,000, and in some cases a straight doubling of salary, BA has about 200 TPF staff

working on the Galileo project,

a large-scale computer reserva

a large-scale computer reserva-tions system currently being developed by the Galileo con-sortium of European airlines. BA is asking its TPF staff to agree to work with the com-pany for a two or three-year period. Those signing for three years will receive 10 per cent of a year's pay every six months, with the balance of 40 per cent of a year's pay due at the com-pletion of their contract.

All the gold ever mined would only make up an eighteen-metre cube. It's easy to see why gold has historically been a sound and inflation-proof investment.

And why, in times of economic uncertainty, it has thrived. (In the Wall Street crash of 1929 the price of gold actually went up.)

Now, Bank von Ernst's Swiss Bank Gold Account can provide you with an even surer investment.

By purchasing gold on a regular basis we can help you to buy at a lower average price than the market average throughout a given period. You will physically own gold, which you will be welcome to view or collect at any time. And you will pay no VAT or Turnover Tax on gold purchased in Switzerland.

THE CLOSURE of North East

Shiphuilders (NESL) is expec-ted to be announced by the

Government today after four loog-standing bids from the private sector for Britain's last

state-owned merchant shipyard failed to eatisfy Trade and Industry Department condi-

Mr Tony Newton, Industry Minister, is expected, however, to tell the Commons that a

last-ditch private bid, submit-ted in writing to the DTI late last week, will be considered

before the shippard closes. Those involved in the new bid

are reported to have access to half the capital required and to be confident of gaining further

Gordon Brown: "Fresh and disturbing accounts"

Mr Brown said further justification for Labour's demand lay in reports that a new scheme to assist pensioners who were worse off had previously been temporarily shelved by social security ministers.

That was because the reports said the scheme had been revived to "provide some relief for the difficulties the Chancellor had created for himself," he explained

explained.
But officials at 10 Downing
Street and the Treasury
insisted last night that no new information had emerged to require a statement from Mr

Lawson.
"The Chancellor made the

Move expected to close NESL

Mr Bryan Gould, Labour's trade and industry spokesman, said he expected Mr Newton to

announce that none of the four

existing bids was acceptable and that, with no action intended to secure orders, the yard would close. He added that Mr Newton was likely to

the local economy.

DTI officials confirmed privately that Mr Newton would

make a Commons etatement today but would not comment

on its likely content. They added that Mr Newton was under considerable pressure to

end the uncertainty surrounding the future of NESL, which

employs 2,000 people.

Labour MPs were critical of

position as regards pensions perfectly plain . . . We have nothing to add," a senior Trea-

sury spokesman said.
Labour intends to maintain pressure on the Government over its plans for the welfare state and the state of the economy. The pensions row is seen as making Mr Lawson vulnerable on both counts.

The newly shuffled Shadow Cabinet is to meet in Rotting-dean, East Sussex, later this week to work out its strategy for the new parliamentary ses-

It will focus on exposing what it regards as the twin threats of present government policies to Britain's standard of policies to Britain's standard of living and to the quality of life.
Labour feels it can build on growing public concern about the state of the economy as increased mortgage repayments, coupled with higher inflation and the continuing high interest rates and trade deficit, begin to bite.
On the quality of life, Labour will broaden the attack on what it sees as decliming cohesion in society and deteriorating public services to embrace

ing public services to embrace environmental issues. Those issues are expected to be high-

lighted in a speech by Mr Neil Kinnock, the party leader, to the Association of County

the timing of the announce-ment because there were signs

that agreement was close on financing that might secure a £120m cargo-vessel order from the Cuban state shipping line, Mambisa, after talks in Havana last week

last week.

Mr Bob Clay, Labour MP for Sunderland North, said it was "quite ludicrous" to announce the closure, given the possibility of successful negotiations with Mambisa and the newlysubmitted bid.

Mr Could said the announce.

Mr Gould said the announcement's timing "could hardly be more inappropriate," adding that the closure would leave Britain without significant merchant shipbuilding capac-

Rally over handling of Belfast yard sale

By Our Belfast

THE Government's handling of the proposed sale of Har-land and Wolff, the Belfast shipbuilder, is expected to be attacked at a rally of the work-

force today.

Hundreds of workers have pledged support for the protest called by shop stewards to highlight what they see as the Northern Ireland Office's mismanagement of the company's

affairs.

Morale among employees at the Belfast yard is said to be at an all-time low over what-trade union officials have condemned as a government policy of "starving the company to death."

Today's protest comes amid speculation that Sealink, part of Sea Containers Group, has asked Harland and Woiff to compete for contracts worth

compete for contracts worth about £250m to build five fer-ries as part of its fleet-replacement programme. Harland and Wolff is report-

Harland and Wolff is reportedly the only UK yard approached. Crucially, however, Sealink's proposal would rely on the Government providing the standard subsidy.

Last week Mr. Peter Viggers, Northern freiand Industry Minister, said that availability of public-intervention funds for orders could not be determined until the company was privatised.

He said it was essential that any new orders complemented a new owner's development plans. That has been interpreted by Harland and Wolff as meaning that the company cannot accept new shipbuilding orders at present.

An £8m dredger order offered to the yard by South Coast Shipping of Southampton seems likely to be lost through lack of public subsidy.

sidy.

Mr Viggers has made clear that the Government is having detailed talks with several potential buyers for the yard.

Mr John Parker, company chairman, is investigating the feasibility of a management and employee buy-out. No comment was available last night from Harland and Woiff on whether Scalink had formally approached it.

Bluebird Toys buys 'white elephant' factory in S Wales

By Anthony Moreton, Welsh Correspondent

BLUEBIRD TOYS, one of Britain's leading toy manufacturers, is to to buy a Ranks has become known as the big-BLUEBIRD TOYS, one of Britain's leading toy manufac-turers, is to buy a Ranks Hovis McDougall factory in Merthyr Tydfil, South Wales, for just more than £5m.

The deal is expected to cre-ate between 500 and 600 jobs on

the site during the next three years and is a double success for Merthyr. Not only will it provide work in a high-unemployment area but it also takes off the market the largest single property in Wales—the plant covers 280,000 sq ft.

The Bluebird move is expected to be followed in the next

few days by an announcement from a leading high street bank that it is to move one of its back-up operations from London into a prominent

London into a prominent South Wales site, creating several hundred jobs.

It follows the recent decisions of National Provident Institution, the TSB bank, Rothschild and others to establish a presence in eastern South Wales.

The plant Bluehird will acquire this morning originally amounted to about 750,000 sq ft

amounted to about 750,000 sq ft and was built 10 years ago by the Welsh Development Agency for Hoover to lease. However, demand for washing machines declined and the fac-tory was never occupied by the

gest white elephant in Wales. gest white elephant in Wales.
Two years ago the WDA sold part of the site to Avana Bakeries, which intended to employ 800 people producing confectionery, much of it for Marks and Spencer. However, the plan was dropped before that could start when Avana was taken over by RHM.

was taken over by RHM. was taken over by Krim.

RHM subsequently sold part of the site to Hoover, which moved its European headquarters to Merthyr from Perivale, west London, and Bluebird has heady the remainder.

west London, and Bluebird has bought the remainder.

Bluebird was formed by Mr Torquil Norman, the chairman, in 1981 with its main production base in Swindon, Wiltshire. It has outgrown that site and, with the help of government regional aid, chosen Marthyr for expansion.

Last year the company had a record £20.4m turnover, making a profit of £2.5m. In the first half of this year turnover reached £7.4m, almost double the previous year's £3.9m and pre-tax profits rose to £151,000 against £134,000.

The rise was in part due to

The rise was in part due to two acquisitions. In the middle of 1987 it took over Peter Pan Playthings, of Peterborough. In April it bought Merit Toys.

National Savings sluggish

By Our Financial Staff

THE COMPETITIVENESS of existing National Savings products is being seriously eroded while its capital bond is being prepared for launch in January. The total net contribution to government funding was only £32.1m last month, showing no more than a slight rise against the exceptionally poor

September figure.
National Savings says the result shows little evidence that investments not made during the September postal dispute came through in the subsequent month.

Money is pouring out of the fixed-interest National Savings Certificates, which showed a deficit of £155.5m on the month. However, income bonds

pulled in a net £73.8m, recovering from £35.3m in September.
The recent revival of interest in index-linked savings certificates continued, with a net contribution of £51.4m. The prospect of a rise in inflation to 7 per cent during the next few months has stimulated buying of such "granny bonds."
The National Savings Bank Investment Account brought in

g 🛁 🕬

Apricot reaps fruit of new labours

Alan Cane on a computer company's successful change of direction

today expects to reinforce its position as the UK's leading manufacturer of today expects to reinhigh-performance workstations with the launch of a machine thet provides the power of the fastest workstations et the price of a personal computer. The secret is a microproces-

or this secret is a microprocessor chip made by Intel of the US which has most of the advantages of Intel's top-of-the-line 80/386 chip but is simpler, and thus cheaper to manufacture.

In developing a workstation based on this 2003 prigroups

cessor, Apricot follows the example set by Compaq Com-puter of the US, the undisputed leader in the high-performance personal computer market, which iaunched ite own 386SX-based machine earlier this year.

There the resemblance ends.
There is a significant difference in size. Compaq is likely to turn over \$2bn (£1.1bn) this year while Apricot, based in Edgbaston, Birmingham, will

computer maker - "the building brick manufacturer of the information technology indus-try" as one rival put it - Apricot is steadily making a reputation as a systems integrator, providing the bricks and the electronic mortar that holds

growing area of the computing services business. Analysts see an almost unlimited demand from companies taking their first steps in using technology for competitive advantage. Apricot, in pushing towards systems integration, is going through its third reincarnation. It started as a computer

companies without their own, before becoming a manufac-turer of personal computers in

Edgbaston, Birmingham, will be pushed to reach £100m. However, while Compaq is

PRICOT Computers set ou remaining a personal new machines from scratch, a London, The Apricot systematical set of the computers and the computers are computers and computers are computers and computers are computers and computers are computers and computers are computers are computers. stage two years ago. Its latest half-year figures, published last week, underline

them together. Systems integration is generally reckoned to be the fastest

bureau, a company that sold computer time and software to

the early 1980s.

By 1985, however, it was saddled with products that were incompatible with the industry

diversion that forced it \$4.6m into the red at the interim

its steady return to health with pre-tax profits of £4.15m for the six months ended September 30, compared with £3.02m for the same period last year.

With the move to systems integration and its emphasis integration and its emphasis on software and service, Apri-cot is returning to its origins

- an advantage, according to Mr Roger Foster, its chief exec-utive, in that the company is expanding from a base it knows well rather than explor-ing uncharted waters. The principal areas of Apri-cot's strength, Mr Foster says, are finance, government and

Mr Foster points to the con-tribution made by the financial systems division whose Quasar accounting (back office) system and Citydesk dealing workstat-ion are winning orders from brokers anxious to bring their dealing technology up to date in mainland Europe as well as

use high-performance (80/386) microprocessors and advanced screen graphics and represent a different generation of equipment from most of the technol ogy installed for the City of London's Big Bang in 1986. Less glamorous but just as

important to the business is the computer services division, now generating about a third of the group's profits. It carries out computer maintenance and instals cabling systems for computer networks.

Mr Foster reckons the ies-sons of 1985-86 have been well learnt.

The company will never again build computers that are not compatible with those from IBM. That is why Apricot, almost alone in the industry, is marketing computers featuring IBM's controversial new microchannel architecture (MCA) design, which most other personal computer manufacturers have spurned. Sales, he says, are fantastic. "The bigger customers are going for MCA and apart from IBM, we have the market to ourselves."

Inquest opens into IRA men shot at roadblock

By Our Belfast Correspondent A SECURITY operation was

A SECURITY operation was being mounted in Northern Ireland today for an inquest into the deaths of three IRA men which formed part of Mr John Stalker's inquiry into allegations that the RUC operated a shoot-to-kill policy in South Armagh six years ago.

Mr James Elliott, Ulster's only full-time coroner, is conducting the inquest, which will focus on the deaths of Gervaise McKerr, 31, Sean Burns, 21,

McKerr, 31, Sean Burns, 21, and Eugene Toman, 21, who were shot dead at an RUC roadblock near Lurgan on November 11 1982. Provision has been made for s to be screened from the public if the coroner deems

responsibility for the deaths. The coroner's task will be to hear the evidence, establish the identity of the deceased, when, where and how the deaths occurred, and to establish the details which have to be registered with the Regisbe registered with the Regis-trar of Deaths.

Tory chosen for Brittan seat

THE Conservative Party has at the 1977 Tory Party confer-selected Mr William Hague, a ence calling for individual ini-tiative and effort to be sultant, as its prospective par-liamentary candidate for the by-election in the safe Tory seat of Richmond, North York-shire. The election was caused by the appointment of Mr Leon Brittan as Britain's carrier Brittan as Britain's senior

European Commissioner.

Mr Hague won praise from
Mrs Margaret Thatcher for a
speech he made as a schoolboy

The date for the by-election has yet to be announced.

Earl Attlee, 61, son of the former Labour Prime Minister, has been selected by the Social nemocrats to fight the Euro-pean by-election in the Hamp-shire Central constituency on December 15, caused by the U.S. \$200,000,000

City institutions attack council investment curbs

By Barry Riley

Sent and the sent

bours

LEADING City institutions have protested that the Government is being too restrictive in its plans to control the way in which local authorities invest their surplus funds.

They have responded to a government consultative paper suggesting that local authorities should be permitted to invest their excess balances only in bank deposits and gilt-edged (government) securities.

According to the latest available figures, local authorities in June held £7.9bn of invest-ments. The total has been rising, partly because of receipts from council house sales, coupled with the effects of spending curbs.

There has been concern that

soma anthorities may have bought risky investments and may for instance have lost money during last year's stock market crash. Those surplus funds are held

for the authorities own accounts and are quite sepa-rate from the £26hn local authority pension funds which are administered under differ-

Ten fund management houses including County Nat-West, Hambros, Lloyds, Mercury. Asset Management, Schröders and Scrimgeour Citi-corp, have combined to submit a response to the consultative

paper. They say that with professional management local authorities may safely invest in a wider range of investments than those proposed.

According to Mr Les Komaromy of Scrimgeour Citicorp (Investment Management), spokesman for the group, a broad hrush approach is not appropriate. "One has got to look at each case and apply prudent professional techniques," he said.

The institutions argue that local authorities should be per-

local authorities should be per-mitted to invest in foreign gov-ernment sterling issues and in foreign currency investments on the basis that the currency exposure would be eliminated through hedging. Futures and options con-

tracts should be allowed, but only in a manner that would reduce risk. Equities would often not be suitable invest-ments, but in the longer term they have substantially outperformed gilt-edged investments, so they should not be ruled out where local authorities have a

minimum investment time horizon of five years. The institutions conclude: "We are of the firm belief that with defined strict investment guidelines and prudent profes sional management the conhas expressed with regard to risk may be allayed."

October sales growth fades as interest rate rises hit spending

By Ralph Atkins, Economics Staff

EXCEPTIONAL growth in retail sales during the summer faded last month, according to today's Confederation of British Industry/Financial Times distributive trades survey.

Retailers report that sales growth moderated in October and fell far short of expectations. It suggests that the sharp rise in interest rates from 7% per cent at the end of May to the present 12 per cent may be starting to affect consumers' spending behaviour.

The results show that 54 per

cent of the 298 retailers ques-tioned said sales in October were higher than in the same month last year, but 22 per cent reported falls.

The balance of those reporting a rise minus those noting a fall was plus 32 per cent. That still suggests respectable growth but it was the lowest for any month since April. It compared with balances of plus 59 per cent and plus 54 per cent in August and September

respectively.
For November, a balance of plus 51 per cent expect sales to be higher than in the corre-sponding month a year earlier. This was also the lowest bal-

ance since April. Moreover, retailers in the survey have often been over-optimistic about future sales. In the first 10 months of this year, sales have been below

expectations on seven occasions.

The survey also points to a

marked slowdown in sales growth by motor traders. Vehicle traders reported that

Vehicle traders reported that sales in October were lower than a year ago and expected the decline in sales growth to continue in November.

However, those selling parts and accessories reported a high positive balance last month. They were also optimistic about sales growth in November.

Out of the total of 59 motor traders questioned, a balance of plus 2 per cent reported sales increases in October com-pared with the same month a

year earlier. That was the lowest balance

That was the lowest halance since November 1986 and compared with balances of plus 62 per cent and plus 25 per cent in August and September.

Mr Nigel Whittaker, chairman of the survey panel, said:

"This is the second survey in succession that has, indicated slower growth in retail sales and the summer sales boom and the summer sales boom now appears to be over."

The survey shows that a balance of plus 7 per cent of retailers said sales in October were good for the time of year — again the lowest since

The sectors reporting best sales growth in October

included grocers and confec-tionery, tobacco and newspaper shops. Footwear, leather and specialist food shops reported sales lower last month than a year before.

For November, retailers of benefit of the sales in th

household textiles, furniture and carpets, and footwear and leather shops were most optimistic about sales.

Growth in orders placed by retailers in October was not as fast as expected. A balance of plus 26 per cent ordered more than in the same month a year earlier. For November, a balance of plus 35 per cent expect increased ordering relative to 1987 volumes.

1987 volumes. The survey shows that among wholesalers, growth in sales volumes last month was also below expectations. The balance of the 154 wholesalers questioned reporting increases compared to the cor-

responding month a year ago was plus 35 per cent - the lowest balance since May. However, wholesalers reported sales for the time of year were better in October

than in September.
Slightly faster sales growth
is expected by wholesalers in
November. Builders' merchants were most optimistic about sales increases and only agricultural machinery dealers expected no growth in

Pension schemes' share purchases reach peak

By Our Financial Staff

OFFICIAL statistics for per cent of their assets in the occupational pension schemes in 1987 reveal a record level of at the end of the year. A functional pension of the pear of the year of the pension new investment in UK shares of £7.9bn. During the year the funds sold almost £2hn of gilt-edged securities and about

£750m of overseas equities. Capital gains on equities at home and overseas early in the year were more than wiped out by the effects of the October

A rise in the aggregate mar-ket value of assets from £190bn to £196.3bn during the year did not quite match the £9.4bn ofnew money added. There was therefore a modest deprecia-tion of the original funds. The 1987 statistics show that

pension funds held a record 52

ther 13 per cent was in over seas equities, down from 16 per

cent a year earlier.

A few years ago, more than 20 per cent of pension fund assets wera invested in gilt-edged, but that was down

to 15 per cent last year. The proportion seems cer-tain to continue falling fast in view of the Government's budget surplus and its consequent buying in programme for gov-

ernment stock.

The high level of UK equity purchases last year reflected beavy new issues by companies and by the Government, including its sale of BP shares.

Schroders advances its re-entry to unit trusts

SCHRODERS, THE City merchant banking group, is to re-enter the UK authorised unit trust market earlier than planned. It expects to market Schroder funds from October I next year rather than from the start of 1990.

The change is the result of talks with National Mutual of Australasia, the life assurance company to which Schroders sold its retail investment interests for £99m in 1966 in a capital-raising exercise.

ests for £39m in 1986 in a capital-raising enercise.

Since then, unit trusts, life assurance policies and personal pension products have been sold by National Mutual under the name NM Schroder.

Schroder Investment Man-

agement has continued to man-age the funds under an agree-ment lasting three years, however. Schroders has been bound by

agreement not to compete with National Mutual for retail

SCHRODERS, THE City merchant banking group, is to re-enter the UK authorised unit trust market earlier than planned. It expects to market the general funds at the start the general funds at the start than the general funds would be been agreed that NM. of next year but some of the specialist funds will continue

under Schroders' management Mr David Mumford, a direc-tor of Schroder Investment Management in charge of unit trust business, said: "NM

trust business, said: "NM decided they didn't want to take over the management of all the funds at one go." It has now been agreed that NM will phase out its use of the Schroder nama by next April. From the start of October Schroders will be free to ber Schroders will be free to launch retail products under

its own name.

It already has a group of privately marketed unit trusts, worth £650m, sold mostly to pension funds, as the besis for its new marketing initiative.

Daewoo to set up £18m VCR plant in Ulster

By Terry Dodsworth, Industrial Editor

DAEWOO, the South Koreen industrial and electronics group, is expected to announce an £18m investment in a video cassette recorder manufacturing site in Nortbern Ireland

The greenfield expansion, probably on a site near Belfast, will carry the promise of around 500 jobs when the fac-

tory is complete.
It is the first large-scale investment in Northern Ireland by a Far Eastern electronics nanufacturer and one of the largest job creation projects in the province over the past two

years.
Daewoo's decision to transfer some of its VCR production to western Europe comes only two months after steep antidumping fines were imposed on the group as well as other Far Eastern producers by the European Commission.

The duties of 29.2 per cent levied on Daewoo VCRs were particularly high. They exceeded the penalties on its two large South Korean con-

sumer electronics competitors Goldstar (26.4 per cent) and Samsung (25.2 per cent) - both of which already have manufacturing sites in Europe for a number of electronics prod-ucts. Goldstar manufactures VCRs and colour televisions in Frankfurt, West Germany.

Expansion in the electronics field by Daewoo bas been slower in the past than by Goldstar and Samsung, which have moved aggressively into semiconductor production and a variety of consumer products such as televisions and micro-

Daewoo bas played e signifi-cant role, however, in expand-ing South Korean VCR sales in Europe. They rose to 1.2m last year from 75,000 units in 1985. Daewoo's shipbuilding sub-sidiary has recently run into trouble and has been seeking support for a Government-backed capital reconstruction plan. Daewoo ranks as South Korea's fourth largest industrial group, with annual sales of just under \$12bn (£6.6bn).

Video rental market faces stagnation

By Raymond Snoddy

THE BRITISH video rental market, worth more than £400m last year, is facing the danger of stagnation and an inevitable shakeout in the number of outlets, a study fore-

casts. Goodali Alexander O'Hare, a consultancy, argues that a combination of a slowing down in the rate of video recorder purchase and a gradual reduc-tion in the frequency with which people rent films is a worrying trend.

The UK video rental indus-try, which last year paid about

£65m in royalty payments to the film industry, could improve its performance by increasing the number of copies of "hit" films and making its premises more attrac-tive to visit.

The arrival of a subscription film channel on satellite television might ectually generate more interest in film for the video industry. "Those outlets which cannot

keep up are unlikely to survive as competitive standards increase." the consultancy

it believes that cinema, video, pay television and free television are complementary media and that the advertising and promotional efforts invested by one medium will often be of direct benefit to

All-night TV may be aimed at professions

By Raymond Snoddy

THE COMPANY producing broadcasts for doctors, British Medical Television, is to seek an entire BBC night-hours channel if this becomes avail-

channel if this becomes avail-able for commercial use.

Last week the Government said in its broadcasting white paper that the night bours on a BBC TV channel should be assigned to the new Indepen-dent Television Commission for commercial use

for commercial use.

The BBC was told it could keep its other channel only if it used it as fully as possible for subscription services.

BMTV is the world's first

subscription service broadcast-ing daily by air weves to doc-tors. Mr Laurence Greetham, chairman, said he songht a night channel to extend his concept to other professional groups. Services for nurses, pharmecists and broader groups, such as businessmen, are being studied.

BMTV is funded by advertising and by a subscription

covering receiving-equipment cost. The company is paying the BBC about £1m a year to

the BBC about £1m a year to broedcast the hour-long subscription programme to specially adapted receivers in doctors' homes or surgeries.

Subscribers will number 2,000 by next month and rise rapidly because the Royal Society of Medicine is to supply the service to all its 10,500 members. A total of 13,000 members. A total of 13,000 receivers are on order from Philips, the electronics group.

A broadcast signal, scrambled so that only subscribers can watch, switches receivers

on. Mr Greetbam said: "If there is trouble with a batch of serum we can tell doctors within eight hours."

The programme carries news and educational material. It began broadcasting five days a week last month.

BMTV recently completed a financial restructuring with investment by Baring Brothers Hambrecht & Quist and by Churchill Livingstone, the medical publishing arm of Pearson, the group that publishes the Financial Times. lisbes the Financial Times. The Pearson investment has

An early casualty gets back into combat

David Lascelles continues a series about the impact of Big Bang on securities houses

of the Big Four clearers, was never enthusiastic about Big Bang. It made only a limited entry into the securities husiness at the time. Even that was too much.

Two years later Lloyds stands out as the only British bank to have pulled back completely from the debt and equity mar-kets in the UK.

At its headquarters in Lombard Street, Sir Jeremy Morse, the chairman and Mr Brian Pitman, the chief executive, Pitman, the chief executive, view their decision with some satisfaction, particularly in the light of the losses other banks have suffered through the collapse of the securities markets. However, the brunt of Lloyds' strategic switch was borne a few yards down the road by Lloyds Merchant Bank (LMB), which underwent a wrenching transformation as a

wrenching transformation as a result of the retreat. It is now much reduced in size, but is fighting to re-establish itself. Mr David Horne, the manag-Mr David Horne, the managing director who took over at
the beginning of this year, says
his job is "to rebuild morale,
reputation and credibility, and
I think we are making progress
on all those fronts."

LMB was created for Big
Bang out of Lloyds Bank International which previously

Bang ont of Lloyds Bank International, which previously handled the group's merchant bank and capital markets activities. Headed by Mr Robert Owen, a former Morgan Grenfeil director, it included Lloyds' Eurobond business, a new official gilt-edged dealer capitalised at £25m, a fund management business, development capital and other merchant bank services.

David Horne: Rebuilding morale

The conspicuous absentee was an equities dealing and broking operation. Lloyds had decided it wanted to stay out of that business, although it did create Sharedeal, a huy-and-sell service for its branch customers.

By the end of 1986, LMB had capital of £135m, a balance sheet of £1.6bn and staff of 800. It was to exist in that form for a further six months only. After piling up losses in the

gilts and Eurobond markets, LMB decided to call it a day in June 1987 and pull out of both

those markets, thus becoming the first conspicuous casualty of Big Bang.

Within a few months, several hundred people had been laid off or transferred, Mr Owen had resigned, and LMB had retreated to find e new role for itself.

Today LMB's staff is down to 370 and its capital to £50m. All its remaining market activi-ties, including its US treasury bond dealership, have been switched to Lloyds Bank's newly integrated treasury divi-sion, and instead it is concen-trating on the less contral intrating on the less capital-in-tensive businesses: corporate finance, development capital,

investment management capital, investment management and stockbroking.

"This is a year of consolidation," says Mr Horne. "We have to get back on the road and become profitable."

The first sign of LMB's prog-ress came with Lloyds' interim results in July. It turned in a pre-tax profit of £5m, not a buge sum of money but better than the £30m loss it incurred in 1987 and the £28m loss the year before that. Mr Horne claims that all parts of the

bank are "very busy" except for Sharedeal which is suffering from the market doldrums.
The corporate finance department, headed by Mr.
Richard Fortin, is seeking to

build up a client base in the middle-sized company market, rather than the blue chip com-panies where competition among merchant banks is

intense.

Mr Fortin says: "There's a lot to go for in the middle range, and there are no short cuts to the stars." About half of the department's clients come from outside the clearing bank, and the bank's score of placings and acquisitions is growing. LMB has also done a fair amount of government work, most recently on the proposed privatisation of the Tote. posed privatisation of the Tote.

Investment management is one area that has shown steady growth, in spite of the upheavals. From its beginnings as manager of the in-house pension fund, the department now controls £5.8bn in forces. There is also a 24.9 per cent interest in Weiss, Peck & Greer, a New York fund management and wenture capital firm, and Mr Nigel Hurst-Brown, the executive in charge predicts that the next phase of expansion will be in the Far East and the Conti-

IMB claims that its develop-ment capital business puts it among the 10 largest in the UK. This year it expects to make investments worth £17m-£20m, up from £11m last year. That part of LMB will be at the forefront of a planned expansion on to the Continent. The one disappointing area

is Sharedeal, which has about doubled its staff to 85 since Big Bang but has seen a sharp drop in business. The expected number of transactions this number of transactions this year is 130,000, down from 167,000 last year. But it makes a small profit and expects to expand with the establishment of a new regional processing centre in Birmingham, where it recently bought a small private client stockbroking firm, Chambers & Remington.

Having survived all those traumas, bow does LMB feel about its new shape?

Mr Horne maintains that not having a market-making and

Mr Horne maintains that not having a market-making and distribution arm is a positive advantage. "Bine chip companies are very concerned about conflicts of interest," he says, pointing out that there are now several highly successful merchant banks in the City that specialise in advisory work rather than market dealing.

He also claims to have the full backing of Lloyds now that

full backing of Lloyds now that it has pulled out of the buslness of risking the group's capital in the markets. "I see no sign at all of a lack of commitment by Lloyds Bank," he

says.

However, now that LMB is back on its feet, he also wants to assert its separateness from the parent, and its merchant the parent, and its merchant banking culture: "I'm very happy to say that the balance sheet side should be done by the clearing bank, and we'll stick to the advisory and fee side," says Mr Horne. His ambition is to pull LMB up into the top ranks of mer-

up into the top ranks of mer-chant banking, although be admits that will take several

Drugs tests 'often marketing exercises'

By Peter Marsh

DOCTORS should be cautious about taking part in trials organised by pharmaceutical companies investigating the effects of new drugs, a report published by the Consumers' Accordant in sever today. It says Association says today. It says the trials may be little more than marketing exercises, of limited scientific use.

The report appears in Drug and Therapeutics Bulletin, a been made ont of a £30m newsletter for physicians venture-capital fund aimed at published by the association. It investment in the new media.

THE MOST PRESTIGIOUS PER. PRGANISER MONEY CAN'T BUY...

Because you can't buy an FT Factminder in the shops you'll be fortunate if you ever get your hands on one - unless, that is, you receive one as a present from somebody else. A grateful supplier perhaps, your solicitor or accountant, even your bank manager. Someone who appreciates you.

Of course, there's an alternative. This year you could give FT Factminders to your clients. "Too good for them," you might say. Well, think about it. You can buy 25 Factminders for a little under £27 each. Not a lot for the sumptuous real leather binder, the most comprehensive organiser contents on the market - or, might we suggest, for linking your company name with the Financial Times.

Not a lot either for the privilege of keeping your name in front of your clients every day of the year - in fact year after year, several times a day. (Yes, FT Factminders : can be blocked with your company logo and/or your client's

initials.) Not a lot for the opportunity to include as many pages as you want about your company. As we said, think about it.

By now the only question you should be asking yourself is how much do you appreciate your clients? (And whether you might stretch to

buying an extra Factminder for yourself.)

THE PERFECT **BUSINESS GIFT** Cost effective promotion of your company name to your selected recipients year after year.

THE UNIQUE FT FACTMINDER FT Factminder is a truly comprehensive personal organiser containing five sections: ■ Fortoight-to-view diary, December '88 to December '89 ■ Address/Telephone – 39 sheets for you to build up your ■ 5-page fold-out Forward Planner own personal directory to last for years. Sections are clearly identified with unique hard-wearing Moles laminated card F1 pink dividers and grey A-Z address dividers Expenses – business, mofor running, credit card and cash The elegantly designed pages are secured with 1" gill rings and there is ample pocket space for papers, bank notes and credit or business cards. FT Factminder comes in a choice of Intermation — London Underground, Inter City Routes, London City and London West End. Mileage Charts, UK black or burgundy leather covers and is made Route Planner. UK Dialling Codes, World Time, Conversion Tables, Weights and Measures, Teraperatures, Guide to FT Statistics. 13 UK and 13 International business cent hotels, restaurants and car hire.

Bioders available in any colour or material for Your company logo and/or recipient's initials in reasonable size orders. Please telephone IIII Sparkes for details on 01-799 2269. Publicity pages (as many as you wish) specially printed

and inserted — ideal for spreading company information, contact names, telephone muni 4-week delivery from receipt of order.

Refill pacis available lu year 2.

Financial Times Factoriader logo on the inside front pocket. FT Factorinder has been devised specially as a business gifl and it available only in a minimum quantity of 25 or as part of an order of 25 items from the FT Diary Collection.

Substantial discounts are available on bulk orders — see order form.

LEGAL COLUMN

Counting on accountants for litigation advice

By Raymond Hughes

AS THE Law Society prepares to discuss with the governing bodies of other professions, bodies of other professions, including accountants, the pros and cons of multi-disciplinary partnerships, a book has been published dealing with the assistance that accountants can give lawyers in litigation in litigation

Written by two partners at Coopers & Lybrand, a City accountancy firm, Litigation Support is a timely reminder of the need, particularly in the complex commercial disputes that occupy an increasingly large part of the litigation scene, for specialist professional expertise beyond that normally available even in

large City law firms.
The book, apart from its immediate relevance to accountants and lawyers, implicitly points up the need for some form of closer associa-tion between the two professions - and, by extension. between lawyers and members of other professions — if their clients are to be given the best

It deals with what is known. more widely in the US but also to some extent in the UK, as forensic accountancy, which has been defined as the application of accountancy know-ledge to legal problems. That requires the bringing together of skills in auditing, taxation and management consultancy as well as knowledge of

accounting, which can be applied in a wide range of legal areas, from matrimonial cases to personal injury claims, from breach of contract to business. interruption, from fidelity claims to fraud. The term surfaced in the UK four years ago when Touche Ross, another City accoun-

The book shows the need for closer association between lawyers and those in other professions

tancy firm, announced that it was setting up a 15-strong-team drawn from the various areas of the firm's activities to satisfy the growth in demand for forensic accountancy services. (Interestingly, Touche Ross described the team as

"multi-disciplinary".)
Anthors Donald Chilvers, head of Coopers & Lybrand's litigation support practice, and Chris Lemar can (and do) Chris Lemar can (and do) claim with some justification that Litigation Snpport—which comes with a laudatory foreword by Lord Alexander of Weedon (better known as Robert Alexander, QC)—fills a gap in the UK literature of both accountancy and the law. It looks at the accountant as

expert witness, explaining how he can make the best contribu-tion to the litigation process and how lawyers can make the best use of his expertise - not

least to reduce the time and expense of litigation.

Lord Alexander comments in his foreword "... the advice to experts is of itself advice to lawyers as to the problems factors the experts how their awyers as to the proteins tar-ing the experts, how their minds work and how to approach the task of getting the best out of them. I would not be surprised if the hints on the giving of evidence were not almost as a result to the lawyers. almost as useful to the lawyers as they will be to the experts

The book is divided into two sections: the first dealing with the professional and technical aspects of forensic accountancy (or, as the authors prefer to call it, litigation support), the second explaining legal and court procedures. Chilvers and Lemar remind

their accountant readers that the world of the lawyer, espe-cially when he is engaged in litigation, is quite different from that of the rest of the commarcial community. He runs the case and decides strat-egy and will be at a loss if he meets an accountant who does not appreciate his problems.
"He will not think it part of his job to try to understand the world of the accountant, nor will he take kindly to having to

the accountant about court procedures and requirements."
Chilvers and Lemar say that the growth of demand for liti-gation services owes much to the proliferation of commercial law and to changes in the business environment, such as the Big Bang. Particularly, they cite revisions of the Companies Acts, the introduction of the Financial Services Act, insol-vency legislation and con-

Another significant change they see is increasing public concern about the high cost of litigation which can make it uneconomical to pursue com-mercial disputes, irrespective of their merits.

sumer protection and environ-

"Much of the problem," they suggest, "derives from the litigator's dilemma' in which lawyers are torn between a wish on the one hand to do all that is necessary to obtain the right result for their client and an equal and opposite refuctance to do too much too early."

The authors point to a tendency among lawyers to delay consideration of quantum the amount of compensation if liability is established — until late in the litigation process. They suggest that there will often be advantages in commissioning at least an initial study of quantum before firm posi-tions are taken, saying that, if this were done and the accoun-

tancy experts' reports

exchanged at an early stage, the parties might conclude that the gap between them made the litigation uneconomic. Chilvers and Lemar say that all too often the accountant is brought into a case at a stage when battle lines have been drawn and the two sides have established fixed positions.

The experienced expert will develop a sixth sense about what is likely to be a fair settlement'

They list examples of the contribution the expert accountant brought early into a litigation team can make: Giving preliminary advice on quantum following examination of the pleadings and preliminary evidence.

 Briefing counsel on accounting and financial aspects of the case prior to Preparing a detailed expert's report following the review of all available evi-

 Reviewing expert account-ing or other financial reports submitted by the other side. Advising on payments into · Advising solicitors and

counsel during the trial.

• Giving oral evidence at the Assisting with settlement

negotiations.
In addition, the expert would be on hand to, inter alia, negotiate the interest element, reach agreement on the quan-tum of items of claim where liability is not in dispute and advise on tax questions. Chilvers and Lemar claim

(somewhat unforensically) that "the experienced expert will develop a sixth sense about what is likely to be the final figure for a fair settlement once the liability questions have been setted out. have been sorted out."

More scientifically, they go on to say, by reference to their own experience, that "typically commercial claims are settled

at around 10-20 per cent of the original claim."

They say that lawyers tend to treat quantum rather casually at the initial stages, with sums being done on the princi-ple: "If it is over the top we can

sort it out later." That approach, say Chilvers and Lemar, can be disastrous when, for example, by exaggerating the quantum the law-yer and his client mislead selves into fighting a case

which will not stand up to expert validation. Litigation Support: and the Financial Assessment of Damages. D.R. Chilvers and C.J. Lemar. Butterworths. £55.

CORPORATE FINANCE

INTERNATIONALM & A

c. £28,000 + Bens

We currently seek a recently qualified Solicitor to join the London division of a Premier US investment bank with an unrivalled international network. Working in their highly active Mergers and Acquisitions department the incumbents will be responsible for all aspects of M & A activity, namely developing takeover and defence strategy, assisting in divestitures locating merger opportunities and deal structuring.

Candidates should possess an excellent academic record and have gained some company and commercial experience within a leading practice.

Most importantly they should be confident self-starters with excellent communications skills and possess a strong commercial awareness.

For further details please contact Jon Michel on 01-583 0073 (day). 01-673 0839 (evenings and weekends) or write to him in complete confidence at:

16-18 NEW BRIDGESTREET, LONDON EC4V GAU

BADENOCH & CLARK RECRUITMENT SPECIALISTS

LEGAL APPOINTMENTS

Ambitious Property Lawyers read on...

Our Commercial Property Department continues to expand and offer exciting career prospects for bright and energetic property lawyers.

The commercial life of a major City firm of solicitors is demanding. We will expect or train you to handle all aspects of large property development and investment projects, and other commercial property transactions.

A commercial and innovative approach is essential. So too is an ability to inspire confidence in clients. Previous experience of property development is useful but not vital.

We offer you a competitive salary and benefits package together with full support, training and career development opportunities.

Apply today to:

Gillian Smith

Norton Rose, Kempson House, Gamomile Street, London EC3A 7AN

Norton Rose

Bank Legal Advisor c£45,000

One of our International banks based in the City is looking for a qualified sollcitor to work as its in-house advisor, Applicants may come from within the profession or be currently working for o bank — but must be fully conversant with the legal aspects of loans, documentation and other financial agreements. Applicants who do not have a proven track-record with an emphasis on banking will not be considered.

Please contact Christine Clayton 01-626 1161

Shepherd Little & Associates Ltd Ridgway House 41/42 King William Street London ECAR 9EN **Banking Recruitment Consultants**

Trying to track down 40,000 genuine financial advisers?

Even in these days of regulation, this can be difficult. But we can be of help. Financial Adviser has spent months building up the most credible list of intermediaries available. Not just members of Fimbra, important though they are. Other trusted individuals too - like accountants who provide investment advice, pensions experts, bankers who advise on trusts, and stockbrokers who run private portfolios.

So we have the highest circulation of any intermediary publication -42,500. And 35,000 of these are registered readers. Sixty per cent of them read no other intermediary publication.* Among businessmen in the financial services sector, nothing counts as much as Financial Adviser.

You may think reaching these individuals is expensive. But not through Financial Adviser. You can buy a full page between now and September for as little as £40 per 1000 readers. That's value.

Indifferent to BR's future

From Mr Rolf Schmid.
Sir, It is painfully ironic to watch the nation that gave birth to the railway seem so tragically indifferent to its development – at a time when other countries (France, Ger-many, Spain, Switzerland) are

Walter

it is not more efficient than either travelling by train or bus. A cost-benefit analysis would reveal precisely what the Royal Town Planning Institute's transport working party accuses the Transport Ministry of doing: "... we are increasingly being asked to accept the pricing of the market place — a market which pays no direct regard to the cost of accidents and policing to pollution and improving theirs.
But it is more than that: none of the options for British Rail's future, listed in Kevin Brown's article (November 2), address the real problem

The fact is that the railway already is competing with road and air transport. For railways to start vying against each other is simply absurd. If anything, the imbalance between road and and should be were road and rail should be narrowed by investing more in railway intrastructure.

reductions in travel opportunities, experienced by others" ("Which Way For Transport?" November 4).

The same working party rightly points out that what we really need is a "co-ordinated" transport policy with a "coherent pricing regime".

We must hope that the Government will learn, before it is too late, that quick remedies tend to beg for real solutions.

Rolf Schmid.

Dorstrusse 32 It is evident from the Autumn Statement that the opposite is happening road construction will be partly financed by reducing BR's external finance limit by some

40 per cent.

Small company audit should be retained

From the President, The Chartered Association of Certified Accountants

Sir, I can understand that some accountants may feel annoyed that the Government has come down in favour of the retention of the small company andit, although I note that much of the protest so far has come from those with the large

multinational practices.

I therefore wonder just how much experience they have of the small company sector, and the reliance which the business community places on its professionally audited

It may be true that with many very small proprietormanaged companies, the audit element of the work done by element of the work done by the practitioner is only quite small. However, to suggest that this generalisation should be extended across the board to include the many quite sub-stantial businesses that fall within the small company cate-

gorisation defined in the Com-panies Act is patently absurd.

This association has cam-paigned vigorously for the retention of the small company audit. It has consistently made the point that audited accounts are relied upon by banks and other financial institutions when they are considering borwhen they are considering our-rowing applications, and by large companies when they are making dealership appoint-ments and awarding supply contracts. Audited accounts are also an essential source of financial data for credit-rating agencies when compiling sta-

it should also be borne in mind that some small companies aspire to the bigger leagues of the unlisted securi-ties market (USM) or a stock market listing, and an earlier history of annually audited accounts assumes great impor-

As for the argument that the European Commission will shortly impose abolition of the small company audit via its Fourth Directive: it has still got to make its case. From my own recent experi-

ence of discussions with repre-sentatives of other European accountancy bodies. I have become aware that there are others in Europe who share our view that the small company audit must be retained. pany attent must be retained.

Desmond Goch,

The Chartered Association of

Certified Accountants,

29 Lincoln's Inn Fields, WC2

'The battle for a free EC market is already half lost

From Mr Phillip Oppenheim

Sir, I am inclined to agree with Bryan Cassidy MEP ("Most of us have our anxieties about 'fortress Europe' after 1992," Letters, November 1). Far from the European Com-mission rejecting protection-ism – if you listen carefully you can clearly hear the carpenters and masons who are already well advanced in the construction of fortress

durope. Some time ago the European Commission imposed import quotas on non-European Community (EC) steel – something too easily overlooked when British Steel's performance is

Video cassette recorders, televisions and compact disc player imports are limited by quotas, while copiers, typewriters and computer printers are subject to spurious "anti-dump-ing" duties — with semi-con-ductors and fax machines under consideration for similar treatment

In addition, the European Commission is still talking about replacing national car import limitations, which affect only a few EC countries at present, with a Community-wide 15 per cent quota on Japanese cars after 1992.

By acceding to the whining of European industrial lobbies for protection, the European Commission is penalising Asian producers who have had the temerity to make and mar-ket high quality, low cost prod-ucts. In doing so, far from helping European manufacturers, the Commission is merely com-pounding their inefficiencies, raising costs for both indus-trial and private consumers, and putting off the day when we will have to recognise and emulate the real causes of Jap-

In the meantime we risk the division of the world into antagonistic trading blocks of the type which were an important contribution to the tensions of the 1920s and 1930s.

It is sad that our Govern-ment, which has done much to de-regulate and free markets,

anese success.

should so meekly acquiesce to the European Commission's

perilous protectionist policy, while perpetuating not a few of its own national measures. These include the "gentle-man's agreement" which limits car imports at a huge cost to buyers and little or no benefit to the UK car industry; and a series of national "licensing agreements which curb steel imports from minor producing

The battle for a genuine free market in Europe is far from being won. Sadly, it is already half lost — and everyone in Europe will be the poorer for

Phillip Oppenheim, House of Commons, SW1

Movement of goods is vital

From Mr Peter Coles Johnson.
Sir, In "Business urges private cash for transport" (November 2) you draw attention to strong support that chambers of commerce give to the private sector in promoting infrastructure developments.

You do not, however, indi-cate why. In particular you do not mention the fact that links to the European continent is the number-one issue facing us in the provinces, particularly in the north of England.

Two events are about to have fundamental effects on business life: the creation of the state of the

the single European market, and the construction of the Channel Tunnel. Taken together they mean significant changes in our trading pat-

On the one hand, opportunities for trade on the continent are bound to increase. Our chamber confirmed this in a recent trade mission which we launched to France in conjunction with Barclays Bank. On the other hand, we shall also face an increasing challenge from overseas competition, notably in our affluent consumer markets in the south east of England

As matters stand, though, there is a danger of the UK being on the periphery of the most affluent areas of Europe with the north on the periphery of the UK.
In these circumstances the

movement of goods becomes a vital question, particularly in relation to rail transport. As are increasingly pointing out, the "just in time" principle is becoming more and more common on the continent, and both competitive delivery times and prices are pre-requi-sites for winning business.

We do not, however, detect signs of diligence in addressing the question of the moving of goods by rail across London a significant geographic bar-rier as matters stand at present. Undoobtedly good cross London rail freight links will require very substantial invest-

This chamber supports the Treasury's view that pegging back real levels of Government spending is the only way for-ward. That leaves the question of how to raise those substan-tial sums of money to develop such freight links. The only answer can be: from the pri-vate sector.

It is time that more urgeocy

was given to unlocking the necessary investment. Peter Coles-Johnson, Leeds Chamber of Commerce and Industry, 2 St Alban's Place,

Leeds, West Yorkshire.

UK aid disbursements, discussed by Mr David Jones of Oxfam (Letters, November 4), fell not by 2.8 per cent of GDP as mistakenly transcribed, but by 2.8 per cent in sterling terms, 7 per cent in volume, and to 0.28 per cent of GDP (OECD figures).

'We have no choice'

From Mr Raihan Mahmud. Sir, I have been travelling on London Transport for the last eight years, along with many friends who also use this most undesirable service. We have no choice, and we suffer every morning from delays, cancellations, over-crowding, dirt and

mismanagement. I use Pinner station. Despite recent renovations, there are many things left to be done; in the gents' waiting room there. is no ventilation; the platform ahed still leaks. The staff, par-ticularly on the barrier, are illinformed, aneducated, rough

No amount of London Transport regrets and apologies will. make up for the suffering that thousands of people have to go through each day. Millions of hours are wasted in delays for : 100 Woodhall Gate, thousands of commuters. It Pinner, Middlesex.

1.50 d. 184 H

will get worse when winter approaches. The signals prob-lem will start, points will freeze – goodness knows what else. I hope to see the day when the trains run on time, helping Mrs Thatcher achieve the greater productivity the poor woman is dying to

- Maybe I am the most bitter commuter, maybe there are those more bitter than I am, but I have to express my opinion. I would hope that by your highlighting the issue we may have the service improved, so that people can travel in peace and tranquillity without pushing, shoving and getting on each others' toes, and having to explain every day to their bosses why they are late. Software AG has the solution ...

A global network to meet your global needs.

Wherever business takes you, Software AG is close at hand. Through our state-of-the-art products and exemplary service we've grown. Until today you'll find us hard at work in over 55 countries helping thousands of innovative organizations stay

The reason for our success is our solution for success: ISA-The open Integrated Software Architecture. It is responsible for endowing Software AG products with the unsurpassed producttvity, portability (across IBM, DEC, siemens and WANG), and flexibility for which they are renowned.

With ISA, organizations have everything they require to integrate 4th generation applications, true end-user computing,

relational-oriented data management, a universal office system and the transparent distribution of data and processes. ISA provides the capacity to incorporate future developments. While protecting investments in already acquired hardware and applications.

For global business solutions to information management needs, the world turns to Software AG. Shouldn't you? Call or write today for complete details.

For the address and telephone number of your nearest Software AG office cootact: Software AG, Uhlandstrasse 12, D-6100 Darmstadt, West Germany, phone: (0 61 51) 50 40, telex: 4 197 104.

ONLY ONE VENTURE CAPITAL COMPANY STIRRED

Kirkless Chemicals, one of the UK's major suppliers of emulsion polymers to the paint industry, recently completed a successful management buy-out from Kalon ple.

Managing Director John Topp approached several venture capital companies to arrange, lead and syndicate the buy-out with funding of over £10 million.

He picked Phildrew Ventures because of our "total commitment and willingness to underwrite. While the others were iffing and butting. Phildrew moved quickly."

Those are John's words, not ours, but they do sum up how we like to do things.

With our new £105 million equity fund, we can arrange deals of up to £1 billion. And while providing finance is our key role, we can also offer rather more.

Like the creativity needed to help structure the right package. The speed to put it swiftly in place. And, above all, the enthusiasm to see things your way.

So if you're planning a management buyout or buy-in, may we make a suggestion?

Before you do, look us up.

MANAGEMENT

ithin the next two years, Netherlands-based students who may never have set foot in Britain before will don mortar boards and black gowns and line up before Sir John Harvey Jones, Chancellor of the University of Bradford, to receive their Mas-ters in Business Administration (MBA) degrees at the uni-

versity.

This will be the climax of a highly unusual situation wherehy students enrol and are taught at one institution and graduate at another and is the result of the University of Bradford Management Centre franchising its 14-year-old MBA to an institution created in the

The Netherlands Institute for Masters in Business Admin-istration Studies (NIMBAS) is based in Utrecht, in the south of the Netherlands. It was formed by two Dutch academics. One is Dr Josephine Borchert-Ansinger, currently head of the international husiness administration course and director of studies in the department of business studies at the Hogeschool Voor Econo-mie en Management (HEAO), the institute for management and business studies in Utrecht (a near equivalent to a British polytechnic). The other is the deputy director of the institute, Dr Henk Schluter. The two are

to be the directors of NIMBAS. Exploiting their contacts with the institute's governing body, the two academics have negotiated a deal for NIMBAS to be based in the same huild-ings that currently house HEAO and to use tha college's extensive facilities. They hope to start recruiting students ing in September 1989.

The HEAO could not franchise nor teach its own MBA. This is because an MBA is a postgraduate course and, under current Dutch law, only universities and private insti-tutions have the right to teach postgraduate courses.

The two academics have great ambitions for the new scheme and are already talking about plans to introduce the Bradford MBA in other NIM-BAS establishments which they hope eventually to set up in the Netherlands. They are confident they can attract over 250 full-time and part-time stu-dents within the next three to

five years.

Given this estimation of the potential market, it is surprising that there has been no home-grown product to meet such a demand. Once again the Degree courses

Why Bradford went Dutch

Joel Kibazo explains the background to a novel deal to teach MBA students

Bradford Management Centre: MBAs in the Netherlands

Europe are just as good if not better," maintains Borchert-

They spent over a year looking at several courses run

at British universities the degrees from which are accepted throughout the EC.

education system.

Under this, all new courses are submitted to the Education Department for approval before they can be taught in universities or the hogescholar But that process can take en. But that process can take up to three years, NIMBUS saw no need to subject itself to this process when there was a shorter and easier route. Having identified a market,

Borchert-Ansinger and Schluter hegan the process of looking for the product to fit the market and, of course, a willing seller.

The US, where the MBA origreason lies in the the present inated, was dismissed as a pos-structure of the Netherlands sihle source. "Courses in

education after university or hogescholen, they none the less hope to attract some stu-dents who already have business experience. This would greatly add to the value of class discussions.

Under the deal, the Bradford Management Centre will receive 12.5 per cent of the Fls20.000 (25,500) that NIMBAS will charge each student to register on the course. No money was paid up front by the Dutch to secure the deal.

Unusually, Bradford University is allowing its management centre to keep a large part of the proceeds from the deal to spend on its own plans, which include a new extension to the management centre.

This is perhans a sign of the way things are moving in the current debate on whether business schools should break away from their parent univer-sities to enable them to make more of tha monay made through private business deals or consultancy work.

Both Bradford University and its management centre intend to keep stringent con-trol over the deal. Detailed vet-ting was carried out on the two directors of NIMBAS to establish their academic compet and checks are also to be made on the ability of the staff hired to teach at the institute.

There will be some teaching input from Bradford with lec-turers going out to Utrecht for short teaching assignments; hut although examination papers will be marked at the institute, the external examin-ers will be the same as those Bradford uses, who are based in the UK.

Paradoxically, Dr John Sparks, assistant director of the management centre is amazed that the deal should be termed a franchise.

He says: "I would not use that word to describe it. It is going to be a co-operative effort. It will be just as if the syllabus, teaching materials, and teaching methods were exported to the Netherlands. But because it is a University of Bradford degree that is of Bradford degree that is being offered, we will retain total control over the sylla-

before making the approach to Bradford. Says Borchert-Ansinger. "At Bradford we found the education level very high. But most important in our view Borchert-Ansinger, however, was the fact that the Bradford maintains that sees the arrangement is a franchise but MBA emphasises application of theory to practice. This is something we liked very es: "We are not a subsidlary of a big university far away. We are an independent foundation working with While the two directors acknowledge that the majority another institution."

of students are likely to be those continuing with higher UK water authority privatisation

Re-shaping the corporate system

tion.

By Richard Evans

t is a "wonder that water still comes out of the tap given the amount of time the industry has had to devote to privatisation." So says the chairman of one of the 10 water authorities in England and Wales as tha tempo increases prior to flotation in a

year's time.
The comment sums up the mix of frustration at the timeconsuming paper work and endless committees that priva-tisation involves for senior personnel, and excitement at the flexibility and opportunities that flotation should bring. Any privatisation entails a

shock to the corporate system, but the impact is greater for the water industry than for most. A complete restructuring is now under way because of the Government's insistence that only the core activities of water supply and sewage treat-ment are to be privatised, leav-ing the regulatory functions still in the state sector.

The authorities are now in the throes of reorganising themselves so that all employ ees at present involved in environment and quality control, fisheries, navigation and land drainage are ready to be trans-ferred to the National Rivers Anthority, a new quango which will oversee the indus-

Equally important is the long-term process of changing the attitudes of staff, from Board members to rank and file, to ensure that the water services pics, as they will be known, are ready for the harsher commercial environment that privatisation will bring. Great progress has been

made since 1974 when the authorities were formed from hundreds of local council controlled water supply and sew-age services, and welded into organisations based on major river basins and responsible for the complete water cycle. The initial problem was that

the industry inherited local government attitudes, some good in terms of public service, overstaffing and a lack of com-mercial edge.

The introduction of much more stringent Government financial controls from 1983 and the development of stron-

There will be two main strands of management, one covering corporate activities. . .the other core activities

ger management teams which now compare favourably with the best in the private sector, has started to transform the

industry. Manpower has fallen from a peak of 63,000 in 1979 to under 49,000 and it is still falling; the most sophisticated information technology and telemetry has been introduced, and profit has

ceased to be a dirty word.

The introduction of privatisation into the equation has speeded up the process, and all 10 authorities are now well advanced in their preparations. They are beginning the process of selling themselves hard as attractive buys for both institu-tional investors and for customers, so one of the top prioritles is to project an image of increasing efficiency and the ability to take advantage of the

core activities and he responsible for the day to day running of the water and sewage ser-

privatisation could bring.

Both executive boards will be headed by Roderick Paul, chief executive, under the over-all control of John Bellak, chairman, and the main board. An enterprise hoard has been set up separately to look after areas where Sev-ern-Trent might sell services profitably. The authority has, for example, one of the largest and most efficient laboratories in the industry, and there are also prospects in land development, consultancy services and

tourism.
The biggest potential disruption is over the transfer of staff from the privatised authority to the NRA, and a rivers and regulatory division has been

set up to cover all regulatory functions prior to the formal hand-over on vesting day late

next year.

Around 750 staff, or 10 per cent of the authority's total, will be employed in the NRA unit of whom 530 will be field based. All senior appointments, including that of Dr Geoff Mance, who will head the Midlands NRA, have heen made and the headquarters will be a Solibull, separate but next year. will be a Solibull, separate but close to the Birmingham head-

quarters of Severn-Trent.

The decision to set up the shadow unit a full year before vesting day has been taken to ensure a greater period of operational experience, and to give time to determine future budgetary needs. "It should get the hugs out of the system in plenty of time," says John Bel-lak.

A great deal of trouble has been taken over the last few months to keep all staff fully informed over the changes through briefings, video pre-sentations, newsletters and personal counselling.

"It is inevitably an unsettl-ing period for soma and we want to minimise that feeling. Provided we are able to give assurances on things like pension rights and relocation, I don't foresee difficulties," Bel-lak declares.

The challenge facing Severn

The chairing faring several authorities, is to continue to change staff perceptions by the introduction of more commercial attitudes and a profit driven system, while at the same time retaining the comsame time retaining the com-mitment to public service and ensuring the customer comes

The way to the top

Innovation thrives in companies with people whose vision extends beyond the immediate horizon. Where work on research and development is ongoing. Where knowledge is systematically passed on - to be used as the basis for new ideas. All this is essential for a technology-based company."

We built the foundation for innovation with our in-house training schemes. The first training workshop was set up 75 years ago. Today one of our main tasks is supporting the advances in technology by supplying people qualified in the new disciplines. From electronics engineers specialising in communications to business information technologists. At any one time, we have 4000 young people following training courses - in industrial, technical and commercial subjects - and higher ecucation programmes.

Of course, we also include our further education programme under the banner of new knowledge and skills. There is a comprehensive range of courses on technical subjects, modern plant management methods, foreign languages and personnel management to provide the crucial qualifications.

Qualifications which ensure the performance of our company, the quality of our products, and foster customer confidence. Today and for the future.

But our objective is not solely to ensure the company's success. AEG's comprehensively formulated programmes for training and further education also promote abilities over and above the professional - such as selfsufficiency and team spirit. Such personal and social competence, combined with professional skills, makes life as a whole more rewarding for our emplóyees.

They are people with a positive impact on society.

at Heathrow. The festival opened with the Ballets de Monte Carlo in two Balanchine works. Nawly under the direction of Jean-Yves Esquerre, the company gave well-reasoned and cleanedged accounts of Stravinsky Violin Concerto and Theme and Variations. In the concerto, the development of the physical drama, the realignments of academic form and formulae, were grippingly done and the two contrasting arias — one aggressive, the other more

pungency. For Theme and Variations Monte Carlo has returned to the style of elabo-rate decoration which the bal-let had in its first incarnation with Ballet Theatre in 1947. A backdrop of an 18th century palace and formal garden, alightly heavy costuming, do not, though, cloud the brightness of choreography or dancing.

An especial pleasure was the presence of Evelyne Desutter in the leading role. With her fragile, elegant physique, she moves with an authority and a delicate clarity, tha dance seeming drawn with a fine-bred and magisterial line. Her partner, Frederic Olivieri, brought tremendous panache to the taxing male solos, virtu-osity flung glittering into the

A lot of bravura, too, in the central section of danced bonbons so necessary in a gala evening such as this. Monique Loudières and Manuel Legris from the Paris Opera were serenely dazzling in a duet from La Esmeralda — every step gleaming — though victims of hustled tempi on the tape they used for Balanchine's Chaikovsky Pas de Deux. Carla Fracci, partnered attentively by Paul Chalmer, offered an abridgement of *La Sylphide*, moving from the opening pose yielding - ware given the to the second act duet with proper emotional and dynamic many of those small vivacities

Ballets de Monte Carlo in "Theme and Variations"

of flying skirts, bracelets, flowers, necklace and bows, that are an impenetrable carapace round the real fact of the dance. But in the balcony scene from Cranko's Romeo and Juliet, in a role she created, Mme Fracci was wholly Juliet, trusting, beantiful, swept by passion in the devoted arms of Chalmer'a youthful Romeo. It was exquisite dancing.

On the next evening, the Gulbenkian Ballet looked a

stronger and more coherent company than I have previ-ously seen it. Olga Roriz' Thirteen Gestures can be performed. by either men or women. A set. proposes 13 doors through

which appear 13 dancers armed in performance with chairs. The men, on this occasion, wear suits, white shirts, and the opening section has much the effect of strobe photography as a movement idea passes along the line of dancers, a sequence of physical states lingering on the chain of bodies as on the eye. It is as comulatively fascinating as the entry of the Shades in La Bayradges and there then beginners. adere and there then hegin solos for the men, violent with energy, which explode over the stage and are magnificently done by the Gulbenkian art-ists. Tha tona is angry, the

So, too, is Vasco Wellen-kamp's Keep Going, which takes its title from the third movement of Berio's symphony, a ratatoulle of orchestral quotations which inspires fast and anxious movement. The cast is caught in shafts of The cast is caught in sharts of light, hodies threshing like landed fish or fleeing towards disastar, eager as lemmings. Keeping going is a matter of psychic and physical unease and the dance is secure in its directness of feeling, as is the company performance.

company performance.
About Mr Wellenkamp's Memoire pour Edith Piaf I am reluctant to comment. This is Edith Plaf year in the dance

world - no less than three hallets have lately been made about the chanteuse - and, since I care not one jot about the life, art, songs and traumas of the lady, I am a less than ideal commentator. To judge by Mr Wellenkamp's ver-sion, she was a much putupon acrobat, given to outbreaks of the screaming mimis
The ballet has a saccharine

score and three Piaf songs, which oblige the Gulbenkian cast to behave as if they were at the funeral of a remote relative. The rest of the pro-gramme had shown them to be fine artists.

Clement Crisp

The Gut Girls

ALBANY, DEPTFORD

Huge animal carcasses dangle overhead as five blood-spat-tered women go about their daily work of drawing and quartering, carving and hacking at stomach-churning. hunks of meat. They are a jolly bunch, with a bawdy camaraderic that grows from sharing one of the lowliest occupations on offer in late-

Victorian Deptford. Sarah Daniels', flerce and funny new play uses fictional characters to illustrate a revealing chapter of local history; the gut girls of the titla worked in the offal sheds of Deptford's foreign cattla market as virtual untouchables, until the Duchess of Albany launched a campaign to make their work illegal, and founded the forerunner of the current Albany Empire as a market girls' working club. Parts of Kata Oweu's strikingly authentic abattoir set gulleys to take the blood -were salvaged from the cattle market itself, which only now being demol-

Daniels' attitude to the dogooding duchess - here transformed into a zealous aristocratic widow, Lady Helena — is coloured by her perception of Victorian maternalism as a patron-ising and ultimately disabling alternative to the nascent trade union move-

Lady Helena's answer to long hours and appalling conditions is to teach the girls to sew and find them jobs in domestic service. The raucous comestic service. The raucous comedy of Polly (Joanna Mays) patching her knickers with pockets, the better to sneak out the evening meal, has a bitter sequel when as a house-maid threatened with violence. hy her male employer she clouts him and is carted off to

Holloway prison.
One would not expect the author of Neaptids and

Masterpieces to spare men their share of blame, and the well-endowed bull corpses loom above snatched scenes of sexual hypocrisy and domestic bullying. But the politics of the piece are by no means separatist: Daniels' perspec-tive has changed significantly with this play to an appreciation of the role class has historically played in

inequality.

The hutcher's boy, barman and abattoir foreman may beinadequates, but they are drawn with a sympathetic eye to their imprisonment at the lowest economic level.

Daniels is at her best with the characters that catch her

sympathy and imagination. Claire Vousden's Lady Helena is BBC posh, with a stilted vocabulary to match her stilted bearing. She is, she informs the tittering workers, quite au fait with the word gut and occasionally has to use the word belly in the course of instructing her cook. The margin between this fronic humour and cliche is narrow and not always comfortable, especially given the complexity of the Victorian charitable impulse.

But with the gut girls themselves, the writing – strongly supported by Teddy Kiendl's direction – is humane and hugely funny, throwing a generous and affectionate arm around women who walked abroad with outrageous hats and no underwear, who counted their free hours in pints of ale and who were quite equal to shaming a second-rate comedian off the

In an abulliantly well-knit cast Joanna Mays is magnifi-cent as the expansive Polly, while Eve Bland unsentimentally charts the pride and fall of the working woman whose work is taken

ARCHITECTURE

Books do furnish a room

effect perhaps static in emo-tion, but the dance is hard

driven and suitably vehement

William Cowper, writing in The Task in the 18th-century, did not find it unusual to sing the praises of the humble sofa. Not so humble, in fact "Thus first necessity invented stools./ Conveniance next suggested elbow-chairs./ And luxury the accomplish'd sofa last."

Although the poet was sing-ing the song of the sofa, he was in fact writing about much more. He was preoccupied by the sanctity of the home, in the sense that in the midst of the ghastly horrors of the world there was always the house a place of peace.

I like to think that it is our love of the home that at least

partially inspires the explosion of interest in what wa now have to call "the world of interiors." And for anyone interested in interiors this is a speested in interiors this is a spe-cial time of year, when you can walk along any street at dusk and glance into lighted rooms with curtains still undrawn.

This cosy seasonal sensation can be much enhanced this year by the crop of publications that lavishly tackle the interior. The most serious, and indeed the best, is the long awaited volume Twentieth Century Decoration - The Domes-tic Interior from 1900 to the Present Day by Stephen Calloway (Weidenfeld & Nicolson, £50.) This marvellous toma belongs on the shelf next to Mario Praz and Peter Thornton, as it hrings their historical

labours up to date. Mr Calloway is right to look at decoration as a key area of social and artistic history: attitudes to domestic interiors is what this book is about Calloway says "in the last few years the level of interest in the dec-oration of houses has risen to a phenomenal level and the decorator's position has finally been established, not just as the purveyor of chic, but as the arbiter of taste in what has become, in the 20th-century, the only art to be practised.

A chair designed by Sir Edwin Lutyens in 1919, which is now available again as The Napoleon Chair from Lutyens Design Associates

universally: the arrangement character. and adornment of the spaces in

which we live." His book puts the whole subject into a serious perspective. I enjoyed the 402 illustrations as well as the text and the sense he gives of the journey between the examples of his-tory and the present. The relationship of visual taste with literature is well identified, though it is the relationship with architecture that is fundamental. Any reader will appreciate seeing the rare illustra-tions. The hotel room where Aubrey Beardsley died does not quite come up to our expectations of the Fra Angelico of Satanism; but other artists like William Nicholson, Charles Ricketts and William Rothenstein clearly had a profound influence upon the interior. The aelection of historical

There is a tension throughout between what the author calls the lure of the antique,

and the modern movement. The two forces are constantly at war. There are times when the clean cutting edge of the International Modern Style seems more than welcome as a kind of purgative. What inte-rior decoration does is to bring to an "off-the-peg" public some of the ideas of the avant-garde.
Mr Calloway has the knack

of making us see areas of design that have been temporarily forgotten. His interest in the nec-Baroque shines through, as does his justified concern for the furniture of that wonderful Italian de Piero Fornasetti, who died recently.

The last chapter is the most examples is seen through a controversial, dealing with very English pair of eyes, "the New Ornamentalism." Here historical conservation

and respect for the past is rightly seen as an important influence. This has strengthened the work of many younger designers - particu-larly the estimable David Miaric, Minimalism, the room as Art and the new Georgians are all recorded: some surely are just passing fashions. This book enables us to see interiors through eyes that, because they are better informed, will make better decisions in that awkward area of taste.

John Stefanidis is one of the best interior designers working from England today and he has recorded his approach to the interior in a fine book, written by Mary Henderson (Rooms: Design and Decoration. Weidenfeld & Nicolson, £30.) l admire the architectural quality of much of his work, and its range, from the interiors of the Bank of England to a Scottish fishing lodge, is impressive. Looking at rooms and their uses, from halls to kitchens, makes this a practical book: I longed for Mr Stefanidis to have included his address book of suppliers and craftsmen for future reference.

The World of Interiors - A Deccrution Book hy Min Hogg and Wendy Harrop (Conran Octo-pus, £20) is a lively compilation from the magazine that fuelled the interior revolution and continues to exercise lts photgenic pressure for quality end variety. This is more than a glossy glance at other people's houses because of the catholic nature of the selection. The range is inspiring, and although this is a magazine in hard covers it has a historical and practical value.

Berio's Piano Concerto

would be complete without the and the Orchestre de Paris. I hope to write of those performances tomorrow. Meanwhile the novelty of the first concert on Saturday evening was not Schoenberg at all but the first British performance of Luciano Berio's Piano Concerto, with Boulez conducting the Paris Orchestra, and Daniel Barenboim as soloist

Concerto 2, as Berio terms lt, was completed earlier this year, it is dedicated to Barenboim and the same forces gave the premiere in Paris just over week ago. It's a substantial, three-section work that plays continuously for just under 25 continuously for just under 25 minutes. A large orchestra is deployed on the platform in two distinct ensembles – the hulk of the wind is ranged to the left of the piano, the lower strings to the right, with the violins stratified at the rear. Such spatial teasing out of the Such spatial teasing-out of the textures is typical Berio - and so too is the compositional method, for the core of the new concerto turns out to be the plece for plano and chamber orchestra which he wrote in 1974, Points on a Curve to Find. In that work a jagged piano line richochets across an everchanging mesh of instrumental lines and the same music, enriched and thickened by the

celebration of Schoenberg full orchestra, forms the cen-uld be complete without the trepiece of the concerto. As in presence of Pierre Boulez and a his previous expansions of major panel of the South existing works, Berio's intenBank's 'Reluctant Revolutionary series was a Boulez weekhis material that could not be end, in which he conducted the explored within the confines of Ensemble Intercontemporain the smaller piece. The "points" and the Orchestre de Paris. 1 are ramified into clouds and hope to write of those perforthe toccata-like curve of the piano line gets buried ever deeper within the orchestra. That recomposition is framed by a prelude whose main con-cerns are harmonic, as the orchestra "traps" chords from the plano, and a slow coda, in which the bulk of the concerto's solo writing is sited.

The final section brought the

best from Barenboim and contains the most memorable music, as Berio clides the soloist with a melting series of orchestral solos – shimmering organ chords, celesta flicker-ings, a romantic cello effusion - until the concerto is finally extinguished in a series of som-bre brass chords. The tense opening too creates expecta-tions, but the "Points" music makes a disappointing focus what was originally one of Berio's most pungent pieces from the 1970s, totally convincing on its own terms, is now over-egged and diffuse and sharply contrasted with the lucid working of the music around it. Berio's ear for colour is as faultless as ever, but the substance of the new concerto is unevenly spread.

La traviata

GLYNDEBOURNE TOURING COMPANY

For the final three weeks of its Autumn tour (ending in Nor-wich this week), Glyndebourne has a new Alfredo in the person of Roberto Alagna, the 25-year-old Sicilian tenor who has recently been one of the winners in the Opera Company of Philadelphia/Luciano Pavarotti competition. The company has, apart from anything else, brought off the remarkable coup of performing La traviata with Italian singers in all three principal roles - and it is a long time since audiences here

have heard thet.

It is easy to see why Mr be wasted.

Alagna is a prizewinner. He For the uses his voice, which is still on the small side, with discretion, hut his well-focused, slightly reedy tone projects easily even in so large an auditorium as the Palace Theatre, Manchester, where I heard him last Thursday. Projection is infinitely more important than mere volume. His voice also gets more interesting the higher it goes, which is not all that common and bodes well for the future: there is a good ring to it up there and, in the final trio when he felt confident enough to let rip, exciting metal as well. He also has a naturally musical way with phrase, and - not surprisingly - sings good, clear

It would be unkind to com-ment in detail on his stage performance: this was his first appearance in opera. But I hope Peter Hall never sees the bouffed-up pop-star's wig he was given, which stuck out from the meticulously observed period detail like a thumb ripe for amputation -just as much as I hope he soon falls into the hands of a director of like stature, to learn how to stand, move and convey emotion at a level somewhat higher than that of soap opera. This is a talent that must not

For the rest, Fiorella Pediconi remains a Violetta in a thousand - one of the most complete interpretations I have off-night in the pit, racing through the score with reck-less disregard for its weight: the second-act concertato had all the dramatic power of a Waldteufel waltz. And the hideously unmusical cuts inflicted on the third act since the summer are indefensible: to this extent, though no other, audiencea on the tour are being given second best.

Rules for accounting

ACCOUNTING rule-makers in the UK need more muscle and sharper teeth. Their attempts at accounting standards in recent years have not done jus-tice to the UK's leading role in the profession around the world. When they have led the world on a major accounting issue, such as accounting for the effects of changing prices, many companies have flagrantly refused to accept what are meant to he generally accepted accounting principles. At the same time, as the financial world has hecome

more competitive, neither the Stock Exchange nor accountants have wanted to rock the boat too much. The result has been a slow deterioration in companies' published financial information.

A committee chaired by Sir Ron Dearing last week put forward suggestions for how things can he improved. His solution: the City should be given the chance to show that it can keep its house in order, rather than handing power straight to the law-makers. It is easy to sympathise with his plea for enlightened self-inter-est in the financial and business communities, but difficult to see his ideas taking root.

Rules to be law

It is also surprising that his committee's deliberations did not appear to touch on the fact that membership of the Euro-pean Community will force the UK to put many of its account-ing rules into national law. The seventh directive on group accounts will be enacted in the UK next year, putting detailed accounting rules on the statute hook in a very un-British

The Dearing committee suggests more resources and more independence for the standard setters. Both are desirable and would help to improve the quality of their output - pro-vided that capable regulators can be attracted to work for

the new body.

The question of how companies can be made to obey stan-dards is more difficult. The present system has patently not worked. Dearing's recom-mendation is for something which bears a remarkable simi-larity to what already exists, of responsibilities.

The forces behind the exist-ing system — the Stock Exchange, auditors, institu-Exchange, auditors, institu-tional investors and the Department of Trads and Industry — have constantly passed the buck of responsibil-ity between themselves. The huck, according to Sir Ron, should be passed ons more time, to a new body modelled on the City's Takeover Panel. on the City's Takeover Panel.

Critical reports

It would challenge compa nies over lax accounting and publish critical reports if it saw fit. It would have the power to take companies or their auditors to court over a new civil offence of not complying with etandards. The onus would then be on the companies to prove that any deviation from accepted practice with the companies to prove that any deviation from accepted practice. tice was justified. The DTI and Stock Exchange would also have the power to challenge accounts in court. But given their lack of interest in the past, it is hard to believe they would make use of this power

The system would rely on the City being prepared to staff the new panel, as well as pay-ing heed to what it had to say. It would also rely on auditors and others monitoring accounts and reporting irregu-larities — a far cry from the 150 accountants and lawyers

doing this joh for the Securities and Exchange Commission.

The City has failed in these policing jobs in the past. There must be a question mark over whether it can do better in the future. Would it be any more future. Would it be any more able, for instance, to enforce a system of inflation accounting? It hardly seems likely: every privatised company that comes to the market happily drops its current cost accounts and the City does not bat an eyelid.

A more radical solution is needed. A statutory body, per-haps the Securities and investment Board, should take responsibility for enforcement. After all, financial reporting lies at the heart of investor protection. Whoever takes on the job, it seems likely that they will need to wield the clout of law rather than the censure of the City. The fact that many accounting rules will he in law anyway will make their job easier.

Govan sends a message

THE unexpected victory of the Scottish National Party in the Govan hy-election last week raises more questions about the governance of Scotiand within the United Kingdom than it does about the future of the Labour Party. It was, of course, careless of Labour to iose a constituency that it held with a 19,500 majority. Its can-didate was particularly unap-pealing, and its campaign was

These technical considerations apart, Labour has good reason to feel concerned about the loss of even one Scottish vote in the House of Commons, since its heartland lies north of the horder. Against that, hy-election upsets based on a protest vote are a familiar part of British political life. In most cases the lost seat is won back at the subsequent general election

it would, however, be wrong to write off the Govan result as a mere single-constituency quirk. The protest has wider implications than that. It was directed at Britain's Conservative party during last year's General Election, with the result that the Tories fared particularly badly in Scotland. Feelings about the use of Scot-land as a test bed for the new community charge, or poll tax, are running high. The Thatcherite revolution has not taken root In much of Scotland in spite of nine years of effort.

Expectation

It is hardly surprising that there has been an expectation that the 50 Scottish Lahour MPs elected last year would strongly represent the regional interest. In the event the Scottish contingent at Westminster has proved unable to influence Scottish legislation, although it has provided some of Labour's hrightest stars on the wider political stage. Last week's protest vote against the "feeble 50" thus reflects the frustration of Scottish nationalists in all

the opposition parties. There is now a strong temptation for Labour to re-examine the extent of its commitment to the devolution of power to Edinburgh. It is nearly 10 years since a referendum was held,

in the final months of the last Labour Government, on pro-posals for a Scottish Assembly. A majority voted in favour but the "yes" constituted less than 40 per cent of the total electorate and the scheme was aban-doned. Since then the Conser-vative Government has been strongly unionist. It has ruled Scotland through the tradi-tional mechanism of a secretary of state appointed by Lon-don. Scotland has seen the same erosion of local govern-ment power that has been evident elsewhere in the United Kingdom, and it has naturally been subjected to economic policies that reflect the Gov-ernment's ideological conserva-

In these circumstances, the hurgeoning support for some form of Scottish home rule is hardly surprising. The unionist case is at its strongest when support for the party in power in London is spread hroadly throughout the kingdom. The purely federalist case is not a serious option, in spite of current fantasies about an independent Scattled within pendent Scotland within a regionalised European Commu-

what is at issue is the degree of local autonomy that would be appropriate now. A leading intellectual on the left of British politics, Prof Bernard Crick, says in a contribution to Crick, says in a contribution to a new collection of essays on the British constitution that "whatever is done must be sufficient to be acceptable and also capable of evolution." That would probably mean the assembly envisaged in 1979, with revenue-raising powers added to it. "The case for Scottish home rule is obvious and lies in Scottish history, tradition and clearly expressed Scottish opinion — opinion Scottish opinion - opinion that overwhelmingly favours a subsidiary parliament within the United Kingdom, not sepa-

ration," writes Prof Crick. In the short run Britain's Conservative government can sit back and enjoy the spectacle of its opponents at Westminster further dividing themselves. In the longer term, however, it will have to face the question of whether the question of whether a strongly centralist form of administration really is sus-

Stefan Wagstyl reports from Tokyo on the Recruit financial scandal

Those caught up in the scandal, from left to right: Yasuhiro Nakasone, former Prime Minister of Japan; Hiromasa Exce of Recruit; Hisashi Shinto, chairman of NTT

'This was nothing more than

which has gripped Japan since the summer is beginning to hite deep into the country's political and business establishments.

what began as a common case of hrihery of a town hall official is starting to look like an attempt to buy influence on a grand scale by Mr Hiromasa Ezoe, one of Japan's growing hreed of self-made super-rich husinessmen. Even the most cynical salaryman, who is well aware that money is the greese of Japanese politics is is the grease of Japanese politics, is starting to suspect that something extraordinary went on at Recruit, Mr

Ezoe's master company.

Opposition politicians, who are leading the public investigation, are comparing the case to the Lockheed affair of the mid-1970s — when the US aircraft group was found to have bribed Mr Kakuei Tanaka, then prime minister, to the tune of Y500m

They are concentrating their inquiry on links between Recruit, a husiness information group, Nippon Telegraph & Telephone (NTT), the country's largest company, and the administration of Mr Yasuhiro Nakasone, the former Prime Minister.

The probe centres on the sale in 1986 to prominent people on favourable terms of shares worth perhaps Y4bn in Recruit Cosmos, a property

affiliate of Recruit. When Recruit Cosmos was floated on the over-the-counter market in October 1986, the shareholders made huge 1986, the shareholders made huge winifall profits.

Mr Nakasone's aides and some of his closest political associates figure prominently among about 140 recipients of Recruit stock. So do three senior executives of NTT — among them the two managing directors responsible for dealing with Recruit plus the secretary to Mr Hisashi Shinto, the chairman.

Shinto, the chairman. Investigators are trying to establish if there is a corrupt counection between the distribution of shares and a remarkable series of coincidences in 1986. Japan was then in the middle of a row with the US over its mounting export surplus, and Wash-ington selzed on a virtual absence of American supercomputer sales to Jap-anese public organisations as an example of a Japanese trade barrier. Mr Nakasone was anxious to defuse the argument.

In May, NTT, then wholly publiclyowned, bought a supercomputer from Cray Research, the US manufacturer, in a widely-publicised deal which helped to pacify Washington. Five months later, NTT quietly sold the

a business deal' machine to Recruit.

Recruit bought the computer to use in its new venture — leasing high-speed data communications circuits in bulk from NTT and marketing them to business customers. NTT established similar agreements with other companies, but did not provide them with supercomputers.

Subsequently, Recruit, a newcomer to telecommunications, won 60 per cent of the market. Competitors accused NTT of favouritism. But Mr Haruo Yamaguchi, the NTT president, this week denied that NTT had done Recruit any favours in return for the

Recruit any favours in return for the share deals.

Opposition politicians were less than satisfied with Mr Yamaguchi's answers. They believe more details of NTI's involvement with Recruit will emerge as the public prosecutor's office sifts through a mountain of documents seized from Recruit offices. The prosecutor said last week that the office would examine all aspects of

As well as the NTT connection, investigators are trying to unravel the mysteries of Mr Ezoe's other share deals. Sixteen politicians have been implicated in the affair, counting all those whose secretaries, wives, hrothers, sons and other relatives bought shares. Among the 12 from the ruling Liberal Democratic Party (LDP) is Mr Noboru Takeshita, the Prime Minister, Alongside them are two senior officials at the Ministry of Education and the Ministry of Labour. The two ministries are responsible for regulating Recruit's

responsible for regulating Recruit's main business — running Japan's largest employment agency and publishing recruitment magazines.

Mr Ezoe has said he would rather die than explain what he was trying to do. But he has left behind some clues. By all accounts Mr Ezoe, 52 years old, is a clever man from a modest background who set out at a young age to become rich. As an undergraduate at Tokyo University in

undergraduate at Tokyo University in the mid-1950s, he was advertising manager of the student magazine. After graduating, his first business was an agency handling recruitment advertisements for university papers. Two years later, Recruit, a free maga-zine for students, was on the streets. it became the core of a group which today amploys 6,400 staff in employ-ment agencies, book and magazine publishing and telecommunications.

with a reputation for deal-making and a good credit line at the bank, Mr Ezoe boosted his profits with property development. By 1981 he could afford a headquarters building in Ginza, the

heart of Tokyo. heart of Tokyo.

Mr Ezoe was acclaimed as the greatest husinessman to come out of Tokyo University since the Second World War. He was called "the information magician" for his skill in business publishing. Last year he was named the 31st richest man in Japan, worth Y31bn. Like many rich men before him, in the early 1980s he turned his attention to politics. He hecame friendly with supporters of Mr Naka-sone. As a politician who had reached the top of his party relatively young,

Perhaps Mr Ezoe saw the chance of a lifetime to help his friends and secure their eternal gratitude

Mr Nakasone attracted support from young husinessmen, often self-made like Mr Ezoe. Against this background, Mr Ezoe had to choose the fortunate individu-

als who would get shares in Recruit Cosmos before it was floated.

The first distribution of 1.25m shares took place in December 1984 to 76 people — including politicians, bureaucrais and businessmen. Not all the names have been made public, but

Among the recipients was Mr Yosh-o Mori, one-time Minister of Education in Mr Nakasone's Cabinet, a rising star of the Liberal Democratic Party, and a friend of Mr Ezoe. Another was Mr Hideki Komatsu, ex-deputy mayor of Kawasaki, who is now being investigated by the city council for allegedly favouring Recruit in the disposal of council-owned land in 1984. It was the exposure of Mr Komatsu, last seen in Hong Kong, thet first brought the Recruit affair to light.
Two more issues of Recruit Cosmos

stock followed in 1985. These 15m

institutions and to companies run by Mr Ezoe's close friends with the object of raising capital.

But by 1966 life had become very complicated for Mr Ezoe. In business, he was in the midst of delicate negoti-

ations with NTT over the newly-estab-lished telecommunications venture. In politics, his contacts with the Government were widening and deepening. He had been appointed to two govern-

ment advisory commissions.

In the summer of 1986, Japanese politicians were short of money after cleaning out their coffers for the general election, which the LDP won handsomely. Meanwhile, land and share prices were soaring, so the flo-tation of Recruit Cosmos, due in the autumn, was beginning to look like a

Perhaps Mr Ezoe saw the chance of a lifetime to help his friends and secure their eternal gratitude. But he no longer had enough shares left to go round and was banned from issuing more so close to the flotation. So, in a desperate move, Recruit bought back Recruit Cosmos stock from companies

Recruit Cosmos stock from companies and individuals who had previously been sold shares, including at least two Recruit affiliates, exotically named Do Best and Big Way.

Even Mr Takeshita says this recycling operation was "strange, even if not illegal." The opposition parties smell blood. At least 800,000 shares were redistributed, But only about 100,000 have been accounted for. Mr Dan Harada, a political commentator Dan Harada, a political commentator says: "There's a black hole in the Recruit affair."

There is nothing illegal in Japan
ment of the future of Education about selling steams interests.

Indeed stock market rules oblige a company to have at least 300 shareholders before it goes public. So it is common practice for owners to sell stock on favourable terms to family and friends, as well as to customers and suppliers.
But difficulties arise when the buy-

ers are public officials or executives of large companies — they run the risk of being accused of taking bribes. Politicians stand on uncertain ground - they are permitted to raise funds for political purposes including

accepting offers of profitable stock market deals. But they are prohibited from accepting money in return for specific favours in the Diet or in Gov-

In the Recruit affair, an unknown number of recipients borrowed money from First Finance, a Recruit affiliate, in order to pay for their stock, which was sold immediately after the flotation. Opposition politicians are particularly assessment of the stock of ularly suspicious of this arrange

The opposition is concentrating its attack on three specific questions.

The matter of the supercomputer.

NTT says its Cray XMP-216 was sold on to Recruit at a fair price of about Yzhn with a 5 per cent commission. Moreover, Recruit was happy enough with the deal to buy another machine,

via NTT, in 1987. Cray says it knew the ultimate cus-tomer was Recruit. But the question remains of why the deal was put together in a roundabout way. One suggestion is that NTT was forced by the Nakasone Government to buy a machine which it did not want. It sold the computer to Recruit, sweetening the deal with a tacit guarantee of help in Recruit's new business. However, the evidence in support of this theory is circumstantial.

• The allegation that NTT officials treated Recruit differently from other companies interested in the business of repackaging high-speed digital circuits. Recruit's competitors say the fact that Recruit, a newcomer to telecommunications, got 60 per cent of the market is prima facie evidence of favouritism.

 The question, now under investiga-tion, of whether officials at the labour or education ministries, or their polit-ical masters in the Nakasone administration, gave Recruit any help in the way regulations governing employ-ment agencies were drafted or inter-

Mr Takeshita is doing his best to ride the storm. Last week he bulldozed through a Diet committee a controversial tax bill which has got caught up in the affair. Speaking last that further discussion on political ethics was needed to prevent politicians from becoming involved in

financial scandais.

But Mr Michio Watanabe, a possible future prime minister whose son admitted huying Recruit Cosmos shares, probably voiced the opinion of many politicians when he said: "This was nothing more than a business deal. What's wrong with it?"

As for Mr Ezoe, he is hiding in a Tokyo hospital, suffering from what

he says is a psychosomatic illness.

All friends

in Geneva

■ When intelligence chiefs and generals exchange fraternal greetings something must be going right. Certainly that is how it looked at a remarkable gathering last Friday evening at Geneva's Intercontinental

The background was the cur The background was the current round of peace talks on South West Africa now going on in the city. The occasion for the amity was a reception given by the Angolan delegation to mark the country's 13th anniversary of independence.

General Franca Ndalu, Angola's chief of staff gra-

Angola's chief of staff, gra-ciously accepted the good wishes of his South African wisnes of his South African
counterpart – and adversary
– General Jannie Geldenhuys.
Exchanging handshakes were
Vladillen Vasev, head of the
southern African Department
in the Soviet Foreign Ministry,
and Dr Neil Barnard, director of South Africa's National Intelligence Service (reputed to be President Botha's most

influential adviser).
Also doing the rounds was
Neil van Heerden, Director-General of South Africa's Department of Foreign Affairs and one of Pretoria's new breed of subtle and shrewd diplomats. Looking on benignly, as well he might, was the man in charge of the negotiations, Dr Chester Crocker, the US Assistant Sec-retary of State for African Affairs.

Crocker is attempting to bring off Africa's most remark-able diplomatic feat since Lord Carrington presided over the Rhodesian independence talks in 1979. He may almost have done it. At times when the talks were going badly Crocker was protected in Washington by Vice President Bush and the Secretary of State desginate, James Baker. So he could still have a top diplomatic career ahead of him, if he does not want to return to academic life.

OBSERVER

Crocker used to be Director of African Studies at Georgetown University. At the start of the Reagan administration, he wrote an article in the US magazine, Africa Report, called "Southern Africa — A Policy for the '80s". He was invited to join the State Department to put his policy into effect.

End to voodoo

■ Foreign exchange markets took George Bush's "No new taxes, watch my lips" literally last week and sold the dollar pretty hard. They may be wrong. A view among policymakers whose joh it is to keep the world economy on the rails is that the President-elect will try to move fast to cut the bud-get deficit.

The word is that America's trading partners appear willing to give Bush the legendary 100 days to produce a convinc-ing answer to the US debt problem. One senior official associated with the Group of Seven is quoting reports that Bush has a loathing of debt as deep and visceral as Margaret Thatcher's dislike of Socialism. Do not forget that it was he who denounced voodoo economics in the first

Right start

Jasper Johns, who last week in New York achieved a record in New York achieved a record price for a living artist, did his best work in the late 1950s and early 1960s, which was when he made his name. And it was indeed an early work, False Start, that pulled in \$17m at Sotheby's last Thursday. He is thus in a price league with only Van Gogh above him.

For the past 20 years Johns' unquestioned status in Amer-

"It's an application from Govan to join the Commu-

ica has been that almost of an Old Master. He has filled the niche left by the deaths of Pollock and then of Rothko. and the need, perhaps, for an American hero. Yet in that time his work has grown ever more questionable. At the Venice Biennale last summer he won the Golden Lion for the small retrospective in the American Pavilion of his work since 1974. Critics noted, how-ever, that he had lost his earher spontaneity and was draw-ing crudely. Johns is only 58 with perhaps 20 years' work to come. We shall watch his progress with interest.

Wrong man

■ The full text of Phillip Jenninger's speech to the Bundes-tag on the 50th anniversary of the pogrom of the Jews last week was printed in Friday's Frankfurier Allgemeine and is no doubt widely available

elsewhere. One cannot comment on the tone in which it was delivered. Yet as a written text it is one of the best attempts I have come across to describe what happened in the 1930s and before. The majority of Germans did acqui-esce in Nazism and persecution. Jenninger admits that and tries to explain in the context of the times how it happened. At no stage does he con-done it; indeed the text is full of condemnations. It is a great pity that he was obliged to resign as Speaker as a result. It seems to me that he was penalised for speaking the truth rather than the contrary.

Hard on goats

■ When Robert Graves was in the Royal Welch Fusiliers in the first world war, a charge in the first world war, a charge was brought against the regimental goat major under which it was alleged that "he, at Wrexham, did prostituts the Royal Goat, being the gift of His Majesty, the Colonal-in-Chief, from his Royal Herd at Windsor by offering its studservices for a fee" to a local goat-breeder. The goat-major pleaded that he had done this out of consideration for the out of consideration for the gost, to which he was much attached, and the charge was reduced from lese majesty to disrespect for an officer. But the major was still reduced to the ranks and taken away from goats. The incident was recalled at the Imperial War Museum on Friday at a reading of Graves's Poems about War, which have now been put together by his geologist son, William. The Fusiliers were there and still have a goat called Billy as a mascot. It travels in a special military vehicle, but was not allowed into lunch.

Many loves Sign over a display of "To my one true love" cards on a stall in Lambeth: "30p each.

to be waning too. But the bruises suffered by its many victims remain dark and deep. By far the most prominent of them is the British Petroleum Company, the world's third largest oil concern, whose £7.2bn shere issue was engulfed by the disaster—with continuing repercussions in the political and business spheres

That the largest share sale

That the largest share sale the world had ever seen should have run slap into the worst market crash in history is an accident of timing so amazing that even today it is hard to imagine it happened outside the pages of a financial thriller. Some say that the coincidence is so great that it contains no lessons for the future. Others argue that it is a rich field for analysis, not least because of what happens when the interests of business, finance and politics clash — as they did with such force over BP. The ironic outcome – that a good part of the shares ended up in the hands of the Kuwait Investment Office - is a lesson in itself. What follows is an attempt to recreate those dizzyattempt to recreate those dizzying days a year ago when, as one of the participants put it, "whatever the plural of abyss is, we had them all round us." It is not a story that unfolds easily. The BP issue was nothing short of a nightmare for all those involved for the UK Government which was trying to sell its shares in the company, for the underwriters in the for the underwriters in the City and abroad who faced enormous losses, and not least for BP itself whose relations with both the City and Government were sorely strained. Even now the Treasury, which was responsible for the sale, declines to discuss it. BP, too, prefers silence on the subject. And the underwriters are wary of talking about it, for fear of

damaging their relations with both the Treasury and BP. The fact that they had to sign the Official Secrets Act as a condi-tion of participation in the deal has also ensured that much information has been consigned to oblivion.
The story begins on March
18 1987 when the Government
announced that it intended to
sell off its remaining stake in BP sometime during the 1987-88 financial year. The news had long been awaited. Through a couple of earlier sales; in 1979 and 1983, the Tories had reduced the state's interest in BP from over 50 per cent to 31.5 per cent, and had made clear their intention to-

pull out altogether as part of their well-known policy of rolling back state nwinership.

But what should have been a \$7.4bn bid for the publicly held minority interest in Sobio, its US affiliate. To finance this deal, BP needed a rights issue. So it was agreed that the Gov-ernment would buy BPa new shares, package them with the shares it already owned, and sell the whole lot on in one enormous bundle. It was a bold idea - but those were heady times. The stock markets were hitting new highs almost daily,

particularly well.

The sight of this huge piece of prestigious husiness set mouths watering in the City, where merchant bankers fell.

and BP shares were performing

hest-known and oldest mer-chant banks. Rothschild is an unusual creature. It is almost the last of the privately-owned accepting houses which once diminated the City, and it trades heavily in this mystique. The link with a bygone era is reinforced by its fifth generation chairman and chief accepting houses which once duminated the City, and it trades heavily nn this mystique. The link with a bygone era is reinforced by its fifth generation chairman and chief executive, Evelyn de Rothschild, who runs it with a deep would be sold under elaborate arrangements which guaranteed private investors at least the shares at a fixed price, with the rest going to UK and foreign institutions at auction. Though one can now see that the announcement of these plans coincided exactly with

THE MARKET CRASH

David Lascelles begins the story of the world's largest share sale and how it went wrong

Paying the price of optimism

sense of dynastic importance. But the key figure so far as RP was concerned was Michael Richardson, Rothschild's head of corporate finance. A man who whirrs with energy and hustle, he had transformed Rothschild's rather lacklustre deal-making department into one of the City's brightest and best since be joined in 1981 — which is all the more remarkable since he is well into his 60s. The BP episode was to bring out the best of Richardson - his ability to galvanise and manipulate people, and pull rabbits out of hats at just the right moment. But despite his great abilities, he is a man who wins only grudging admiration in the City. Many treat him with reserve, and suspect he owes more than he should to good fortune and good pre-

sentation.
Rothschild got the BP deal for a number of reasons. Aside from the fact that Richardson had cultivated the Treasury for years, Rothschild had experience in both privatisation work and oil and gas. It has a depart-ment specialising in energy and had handled the British

Gas sale, the largest to date. But what weighed particularly strongly in the Treasury's choice was Richardson's piedge that he could drive down-thestraightforward sale was complicated by the news later that
month that BP had launched a

57.4bn bid for the publicly held City large sums to underwrite government issues which were so safe that they could be sold directly to investors. Rich son's idea was that instead of paying underwriters a stan-dard fee, there should be an auction at which they would be told the price of the stock, and then invited to compete for it by bidding down their fees. He had used it with British Ges, and it had worked.

The sight of this huge piece of prestigious husiness set mouths watering in the City, where merchant bankers fell over themselves for the right to handle it although privation work is notoriously widen share ownership in the badks noted hydrog, little ... It is recognised BP a wish to ichardson also. sation work is notoriously widen share ownership in the badly paid and brings little except a brief moment of glory. One merchant bank is even believed to have told the Treasury appointed business. With Rothschild's advice, the Treasury appointed four sets of foreign underwriters in the US, Canada, Japan and Europe. The job of these with EP in some way is contral to the whole sage.

As is customary, the Treasury appointed and Europe. The job of these foreign salesmen was to place to the whole sage.

As is customary, the Treasury appointed for sin the US, Canada, Japan and Europe. The job of these foreign salesmen was to place to the whole sage.

As is customary, the Treasury appointed for sin the US, Canada, Japan and Europe. The job of these foreign salesmen was to place the shares in firm hands' and ensure that they were not immediately sold back into the UK market for a quick profit, as land happened with the British Telecom sale.

By late Angust, the details of the sale were in place. Just

the sale were in place. Just over 2bn shares (including the Government's stake of 1.7bn) would be sold under elaborate at the time no one had the slightest doubt that the sale would be a roaring success: the advertising drive started, the draft prospectus was pub-lished, and millions of people registered for informatiou

about the shares.

The only ripple on the otherwise calm surface was a rumour which flashed through the markets at the end of September that Kuwait planned to sabotage the sale by pushing down the oil price in order to embarrass Mrs Thatcher. This was picked up by Hoare Govett, one of the three stockbrokers who were helping to drum up institutional support. But since it was not clear who had said this (though it was attributed to the Kuwaiti oil minister) nor how Kuwait could actually carry out the attack, it

was not taken seriously.

The price at which the shares were to be offered was due to be agreed between the underwriters and the Treasury on October 14. In the fortnight leading up to this, all was not entirely well in the securities industry. Stock prices in the major markets slipped from their August highs, and trad-ing activity was down quite sharply. Two days before the pricing, Salomon Brothers, one of Wall Street's biggest houses (and a member of the US underwriting team for BP) announced large cuts in its worldwide staffing and operations. This added a tinge of caution to the City's expectations, and analysts shaded down their BP price forecasts. Even so, Richardson set off for his meeting with Nigel

Lawson, the Chancellor, on the 14th in a positive mood. Wall Street had closed the previous evening up 36 points, and though shares were easier on the London market that morning, it was nothing remarkable. The Treasury bad made its own soundings, and had received input from the foreign underwriters. Its aim, naturally enough, was to get the highest possible price in order to maximise its revenues. But Rothschild was in an awkward position. Officially, it was adviser to the Government. which meant it should support the Treasury's aim. But at the same time, it was the leader of an underwriting group whose main interest was in setting a price which was low enough to attract investors. So there was some give and take in the meeting before Richardson and Lawson settled on 330p, comfortably below BP's close the previous evening of 362p.

ichardson returned to Rothschild's guarters in St Swithin's Lane in the City when the City where a meeting of the underwriters had been summoned for the afternoon.

The underwriters job is to agree to buy any shares for which the issuer cannot find investors; in effect they guar-

antee that the issue will be sold. It is then up to the brokers to the issue to find subunderwriters who will actually buy the shares, usually insur-ance companies, pension funds and big financial institutions.

The underwriters take virtually no risk, particularly with popular government issues, which is why Rothschild had introduced the auction to drive down the Government's underwriting costs. But in order to make the work worthwhile, Rothschild had also wrung a concession from the Treasury: that the underwriters could take a portion of their shares (up to 5 per cent) on to their own books, in other words, to act as sub-underwriters as well, and earn much larger fees. As chief underwriter, Rothschild was allowed a bigger portion: up to 10 per cent. The same went for S.G. War-

Richardson had invited all the UK'a largest clearing and meschant banks to the meeting and 16 turned up: Warburg, Barclays de Zoete Wedd, Bar-ings, British Linen Bank (part of the Bank of Scotland), Char-terhouse (part of the Boyal Bank of Scotland), County Nat. 1 Bank of Scotland), County Nat-West, Robert Fleming, Hambros, Hill Samuel, Kleinwort-Benson, Lloyds Merchant Bank, Samuel Montagu, Morgan Grenfell, Schroders, Standard Chartered and the TSB.

burg which was advising BP.

Since the markets were not to learn the issue price until the next day, the underwriters were sworn to secrecy as they entered Rothschild. They were then led off to separate rooms to make their bids in private. These were fed into a computer, and half an hour later the results were ready: the average commission bid was 0.018 per cent. This was so little as to be virtually meaning less. It meant that the under writers were willing to be paid a mere £180 for each £1m of shares they took. The standard fee is 0.5 per cent, or £5,000 per £1m. But most of them hoped to cover the difference hy mak ing full use of the sub-under writing portion they were enti-tled to: this carried a 1 per cent

fee, or £10,000 per £1m.

Then began the tedious business of signing the documents Rothschild's boardroom is an awkward, long, narrow room with barely any space for peo-ple to move around the table. The place was crowded with bankers, lawyers and govern-ment officials; there were stacks of papers to deal with, and even some final drafting of the underwriting agreement. This document, drawn up by the Government's solicitors, Slaughter & May, was the underwriters contract. As well as laying down their nbligations, it gave them one right: to ask the Chancellor to cancel the issue if force majeure prevalled. In fact, it was a flimsy right. All they could do was ask, and the Chancellor, after consulting the Bank of England, could still say no. But the likelihood of a disaster was

so remote that no one thought twice about it. One Japanese underwriter who was uneasy about the terms confessed that he felt unable to complain for fear of sounding pessimistic.

The signing meeting lasted long into the night. But its

main purpose - guaranteeing that the shares would be sold - had been accomplished without trouble. "Effortless" was how Richardson described it. One reason was that most of the underwriters thought the issue had been pitched a bit on the cheap side: the Government could probably have squeezed another 5p or 10p out of the market if it had tried. But secluded as they were at Rothschild, the underwriters were cut off from minute-to-minute news. What they did

not know as they made their bids was that Wall Street's nerve had begun to crack. A poor set of US trade figures set off an avalanche of selling in late morning New York time – about 5pm in London – and when the US markets closed the Dow Jones had plummeted a record 95 points. Had it hap-

pened a day earlier, this dra-

matic fall would have seriously affected the pricing of BP; it might even have forced a delay in the underwriting. But those at the meeting recall very little

sense of unease. The following morning, Mr Norman Lamont, the Financial Secretary to the Treasury (as it happens a former Rothschild man), announced the BP price to the world, and the deal was quickly sub-underwritten by 400 institutions. Compared to that day's BP price of 347p, the new shares stood at a discount of 17p, and offered many other benefits, such as delayed pay-ment but a full dividend, and bonus shares for long-term holders. All this outweighed the news from the markets, which continued to be bad. in response to the previous day's fall on Wall Street, London shares went into retreat and knocked 21 points off the FTSE

Index. That night, Mother Nature did her best to provide a suit-ably Wagnerian setting for the cataclysm that lay ahead. A freak hurricane devastated much of the sonth-east of

England, and resulted in mas-

sive disruption to the workings of the City. Few people managed to get to work on Friday, and the Stock Exchange remained officially closed, so even if some response from the BP front was called for, it was virtually impossible to organise. Those who got their Financial Times were informed by the Lex column that "much can happen, of course, between now and first dealings on Octo-

ber 30, but it would take a fall

of over 10 per cent in the fully

paid - from 350p to 310p - to wipe out the premium

entirely." Lex was on the right track. Richardson had managed to get to the office and had begun to feel anxious about the mar-kets. Although the Stock Exchange had not opened its doors, there was still some informal dealing going on among market makers, including Smith New Court, the job-hing firm in which Rothschild holds a one third stake, and of which Richardson is a board director. That morning, Smith did some urgent rearranging of

its book, and managed to trans-

form a bullish position into one

which was generally bearish. Meanwhile in New York things were deteriorating fast.

The telephone lines huzzed all over the weekend: underwriters. BP, the Treasury were all trying to make sense of events, and it was with anxious auticipation that they entered their offices on Monday October 19. The first thing that happened was that Lex's worst prediction came true; BP's existing shares fell 33p to 317p, well below the underwriting price. Richardson got into a huddle with his colleagues, and over at the Treasury Lamont closeted himself with other ministers and advisers, and declined to make any public response to the clamour in the market-place. Although terminating the issue was debated, there was no question of tak-ing such a drastic step at this stage. But the truly had news did not reach London until after office hours that night: the Dow Joues Index had closed with a loss of 508 points. David Lascelles continues the BP story on Wednesday

Janet Bush on Wall Street

Euphoria overtaken by gloom

THE ELECTION of a new US president inevitably brings with it a sense of uncertainty about the future, but there are some notable threads of continuity as Mr George Bush gears up to take his position in the Oval Office which should bolster confidence

One reassuring feature was the startling rise to promi-nence of a former actor as the most famous former actor of them all went into retirement. Ben Jones used to play a hot rod motor mechanic in the tele-vision series Dukes of Hazzard but was elected to the House of Representatives last week after defeating Georgia Republican Pat Swindall, who currently

faces perjury charges.

Mr Swindall was not the only incumbent who entsred the race for re-election under a cloud. The most notable defeat last week was that of Representative Fernand St Germain the often controversial chair-man of the House Banking Committee, who fell out of favour with the electorate in Rhode Island after it became known that he was being investigated by an ethics com-mittee for his relationship with

lobbyists Mr St Germain's defeat means there will be new chair men of both the House and Senate Banking Committees, central to any prospect of banking deregulation and the repeal of the Glass-Steagall Act during the next Congress. Senator William Proxmire, chairman of the Senate Banking Committee, has retired after 32

years in Congress.

The comings and goings of the extraordinary characters who people the American political scene gave the election a much needed dose of entertainment, Rarely can gloom have descended so fast after the euphoria of a election victory. As President-elect George Bush heads off to Florida for a well-earned rest, the dollar lumped to within a whisker of its post-war low against the yen, the equity market fell to its lowest level since early Sep-tember and, if it had not been for the Veterans Day holiday for the Treasury market, the yield on the long bond would no doubt have consolidated

above the 9 per cent hit in overseas markets.
All this is hardly auspicious for Mr Bush as he contemplates the next four years. No sooner had it hecome clear that he had won the election than the emphasis turned to the problems ahead. Senator Bob Doie, beaten hy the Vice President in the fight for the Republican nomination, pre-dicted, with more than his usual grimness, a tough time for Mr Bush, in handling an

even more emphatically Democratic Congress.
The prospect of Senator Lloyd Bentsen returning to his old job as chairman of the Sen-ate Finance Committee, armed with a greatly enhanced repu-tation and a score to settle with the new President, was

highlighted in the US press.

The fall of around 70 points in the Dow Jones Industrial Average last week and the rise in bond yields to above 9 per cent reflected all these fears and return to economic reality. Throughout this year, the Group of Seven leading industrial nations has been acting as an ad hoc campaign team to get George Bush re-elected. The non-US G7 members have to an extent, submerged their own domestic policy priorities in ald of maintaining rigid con-

trol on the currency markets.

Despite some good fundamental reasons for selling dollars, such as the painfully slow progress on the trade deficit, the foreign exchange market desisted because traders knew they would lose money trying to combat the central banks. That has all changed. The long-awaited test of the dollar has started.

After a year of virtual offi-cial silence on the dollar, last week saw a return to the good old days of managing the cur-rency through statements flashed across news wires. At the beginning of the week, Mr Martin Feldstein, chairman of the Bureau of Economic Research, talked about a 10 per cent to 20 per cent devaluation over the next three years. Last Friday, Mr William Verity, US Commerce Secretary, said that the current level of the dollar was good for the G7.

When officials start opining on where the dollar should be, you know that foreign exchangs turbulence is in

What else is on the horizon? Will Mr Howard Baker, former White House chief of staff become chairman of Drexel Burnham Lambert and steer the firm through its securities fraud violation case? And will President Ronald Reagan go back to doing TV commercials?

Bhutto calls for fairness in election

By Christina Lamb and David Housego in Lahore

BENAZIR BHUTTO rode in triumph into Lahore yesterday at the end of her slection campaign, demonstrating that her Pakistan Peoples Party remains the only mass movement in the country's politics. But in an interview Ms Bhutto said that, although she expected to win in Wednesday's general election she might not get an absolute majority of seats in the National Assembly. She laid much of the blame for this on the President's insistence that voters must show identity cards at the polling booths - a decision sustained in practice hy a ruling of the Supreme

Court on Saturday.

Ms Bhutto said: "If there is a Ms Bhutto said: "If there is a modicum of fairness there would be an outright majority of the PPP." But she complained that the Government had taken away the sword as the symbol of the PPP and that the party had also been dealt a further blow by the ruling on identity cards. identity cards.

She claimed that in rural

areas 70 per cent of the people did not have identity cards and most of these were PPP supporters. "Everything has been done to tell us we cannot win and we might as well boycott the slection as well," she added.

Supporters in their hundreds of thousands waved flags, chanted slogans and held their hands high in sign of victory

Mitsubishi plans European expansion

By Guy de Jonquières, International Business Editor, in London companies and joint ventures in Europe. It was particularly interested in light manufactur-ing businesses, including auto-motive components, precision moulding and general-purpose parts, such as small electric motors.

MITSUBISHI Corporation, Japan's largest trading house, is considering about 100 projects for investment in Europe, mostly in manufacturing and distribution, as part of a plan to diversify worldwide.

Mr Toshihiro Koizumi, ths company's general manager of marketing and co-ordination, said in an interview in Tokyo that Mitsubishi had drawn up an "action programme" for expansion in Europe and was ready to back it with substan-tial financing.

"Management resources are the limiting factor, not money," he said. "As far as money is concerned, we can raise any amount. That would not restrict our investments in The company's plans, which coincide with a restructuring of its existing operations in

Europe, are due partly to fear that the European Community would erect new barriers to

Japanese exports. "If Mitsubishi doesn't go into

Europe now, it will face restrictions on outsiders, Mr Kolzumi said. The company had revenues of Y13,365bn (\$107.8bn) in the year to March 31 and its cash and short-term investments total Y1,704 bn. Sales in Europe are about

Recently, several Japanese car manufacturers have said they are re-examining plans to set up assembly plants in the EC because of uncertainties about conditions in its planned single market. The companies include Mitsubishi Motors, in which Mitsubishi Corporation has a 10 per cent interest. Mr Kolzumi said his com-

pany was urging Mitsublshi Motors to invest in a European assembly plant because it feared EC curbs on Japanese car imports. However, Mitsubi-shi Motors' management was preoccupied with production ventures in the US and Asia. Mr Koizumi said Mitsubishi Corporation was prepared to

was discussing plans to link with Federal Express, the US freight forwarding company, and to buy warehouses in Europe.

It would participate in projects through a newly formed

investment company, which would be owned by its eight subsidiaries in Europe. The investment company would provide 70 per cent of the ini-tial funding for a project, with a subsidiary investing the rest. If the projects succeeded, the investment company would sell its stake to its subsidiary at a commercial price. If the ventures failed, they would be invest in acquisitions, start-up written off.

Mitsnbishi Corporation already has one joint venture in the UK, Dia Plastics, which was set up last year. The company, which makes moulded plastic television cabinets, is owned 70 per cent by Mitsubishi Corporation and 30 per cent by Mitsubishi Plastics.

The investment company will be run by Mitsubishi Europe, a management service unit which is to be given expanded authority over the group's European businesses. In future, the unit will control all Misubishi's operations in Europe, which previously reported individually to the group's headquarters in Tokyò.

Mr Kolzumi said Mitsubishi Corporation had decided to invest in new businesses because its traditional finance and marketing activities were declining. Japanese exporters which had previously relied on it to provide such services were increasingly performing them themselves.

The bears pick up George's scent

If Wall Street can drop by close to 4 per cent in the week that its favourite candidate wins the election, then one can only tremble at the thought of what might have happened if Mr Dukakis had won a surprise victory. A 3 per cent fall in the value of the dollar against the D-Mark and a jump in US long bond rates to over 9 per cent is a dramatic response; and while it could be interpreted as a resounding vote of no confi-dence in the next president, it says a lot more about the cur-rent volatile state of the world's financial markets than about Mr Bush's policies, however uncertain they may be.

The knee-jerk reaction of the foraign suchange markets – according to popular conspiracy theory – reflected a belief that there was an unspohen international agreement to help-Mr Bush win the White House by keeping the dollar stable ahead of the election. Now that this has been achieved the central bankers are retiring to the sidelines until they are confident that Mr Bush has demonstrated that he has the right stuff to solve America's chronic twin deficits. Even if there was soms substance to this line of argument, there was never any chance that the President-elect would unveil a coherent bud-get strategy until next year at the earliest, and the idea that the other G-7 countries would suddenly stop supporting the dollar the day after the elec-tion, implies that international monetary co-operation is more idiosyncratic than imagined.

US economy

But while last week's tumble BUS white ast week's tunible in its share prices was triggered by the unexpectedly sharp drop in the dollar and the consequent jump in long-term US interest rates—both of which could easily be reversed over the next couple of months - Wall Street has every right to be nervous about the longer term outlook The US economy is entering the seventh year of its second longest post-war expansion and, despite last year's stock market crash, the SAP 500 has each of the last six years. Even after last week's fall the stock market is still 8.4 per cent up on the year and one probably has to go back to the last cen-tury to find a period when the market rose for seven years in a row, let alone eight. In five out of the last six times that a Republican president was elected the stock market has fallen in the following year and on the basis that almost every US post-war recession has

LIS Colle US Federal Reserve's 1981 82 84 86 88

occurred within 18 months of a presidential election, then it is hard to be bullish about the outlook for share prices in

Nevertheless, the bulls and the bears are as far apart as ever on Wall Street with Goldman Sachs, for instance, recommending a conservative 40 per cent exposure to the equity market, while Shearson Lehman is recommending its climate remain fully invested with ents remain fully invested with 65 per cent in stocks. Given that over the last 60 years US share prices have risen on average by no more than 10 per cent per annum, and that investors can lock in a safe 9 per cent per annum just hy buying US Government bonds, it is hard to argue a convincing case for equities over bonds.

Profit growth

There are plenty of negatives. The rate of growth of corporate profits has peaked and the Dow Jones Industrial average would almost certainly not be above 2000 were it not for fact that US and foreign corporations have emerged as by far the biggest investors on wall Street - a highly unchar-acteristic role. Over the last couple of years, the corporate sector has reduced the supply of equities by around \$140bn per annum, but according to Goldman Sachs the figure this year will be over \$200bn, or the equivalent of 10 per cent of the value of the stocks on the New York Stock Exchange. The sheer scale of the recent wave unsustainable, and when one of the leading experts in the LBO field justifies its involve-ment in the \$20bn plus battle for RJR Nabisco because of the need to "defend its turf", it is probably time to tiptoe to the

However, there are plenty of well-known Wall Street firms that still argue that the market will be higher 12 months from now. Despite the robust Octo-ber employment data, this

group believes that economic growth has slowed to a more sustainable 2% per cent per annum and the earnings on the S&P500 should rise by another 10 per cent, to \$27 per share, in 1989. Inflationary pressures remain subdued and, provided that the consumer continues to behave, the recent slowdown in domestic demand will soon m domestic densiti will soon result in a renewed improvement in the trade deficit although it is probably too early to expect this to show up in the September trade figures, due on Wednesday.

Recession fears The combination of the

Gramm-Rudman deficit reduction act and continued eco-nomic growth will solve the budget deficit in time for Mr Bush to run again in 1992, and if oil prices remain soft and the dollar firms, the Fed could begin easing monetary policy again. However, this scenario under which equities are driven higher by long bond rates falling below 8 per cent next year, remains very much a dream case. The current reality is far less

reassuring particularly for for-eign investors. The US econ-omy is delicately balanced and unless Mr Bush is going to renege on his very public com-mitment not to raise taxes, his mitment not to raise taxes, his policy options are severely limited. With unemployment at its lowest level in 14 years, the economy cannot grow any faster for fear of igniting the wage cost pressures which are already visible. Meanwhile, the new Administration cannot risk letting the economy slip into a recession. Not only is the budget deficit unusually high for this late stage in the economic cycle, but after six years of expansion the corporate sector is surprisingly rate sector is surprisingly heavily indebted by traditional standards. Interest expense of the non-financial corporate sector is equivalent to 35 per cent of cash flow, whereas at the bottom of the last recession, when cash flow was depressed, the ratio peaked at 30 per cent. The danger is that any down-turn will be far deeper and more prolonged than would be the case if the US government and the corporate sector was more soundly financed. Last week's reaction in the

Last week's reaction in the foreign exchange markets reflects a very real concern that the necessary steps to correct the US budget and trade imbalances will be delayed for fear of precipitating a recession. This may well prove incorrect, but until the markets sense otherwise it is hard to make a convincing case for to make a convincing case for Wall Street.

Strike wave threatens to cripple Brazil

By Ivo Dawnay in Rlo de Janeiro

BRAZILIAN road transport, from lorries and buses to pas-senger cars, will grind to a halt within 15 days if a pay strike by an estimated 42,000 workers at the state-owned oil com-

pany, Petrobras, is not resolved rapidly.

The stoppage, which began on Thursday, has hit all but two of the company's refineries and represents the most seri-ous challenge yet to the Government. Last week, Brazil's industrial

relations climate worsened dramatically after army units killed three workers and injured about 40 others when evicting striking steelworkers from the Volta Redonda mill in Rio de Janeiro state. Elsewhere in the state

- Brazil's worst hit - hospi-tals and schools have been closed for weeks, as supplies of electricity, domestic gas and water have been hit in a series of public sector disputes.

As voters go to the polls to elect 4,400 municipal governments tomorrow, the adminis-tration of President Jose Sarney has been warned that supplies of diesal, the main fuel for bus and truck trans-port, could be exhausted

within days. Stocks of petrol and sugar-alcobol fuels, used in cars, will last, at best, 15 days, and prob-

At the weekend, Mr Joao Batista de Abreu, Planning Minister, appeared on nation-wide television to appeal to the oil company's employees. "Petrobras was born of patriotism and the struggles of our people; its employees do not have the right to threaten those same people by cutting off their gas, petrol and alco-hol," he said.

In fact, the Petrobras work-force are convinced that provi-sions in the recently enacted constitution extend the right to take industrial action to essential public sector services. The strike was ordered by senior union officials last week

after a long-awaited Supreme Labour Court judgment offered salary rises of just under 70 per cent, substantially below the figure sought by workers.

The dispute poses a serious dilemma for the Government,

already on the defensive fol-lowing the deaths at Volta Redonda. Wage restraint is a central plank in the tripartite "social pact," recently negotiated with employers and unions in a bid to reduce inflation, now more than 27 per cent a month. .

It is also viewed by the eco-

nomics ministries as an essen tial element in the continuing struggle to reduce public sector sxpenditure, almost universally regarded as the chief cause of inflation. But with strong support for the stoppage by both white and bine collar workers, there seems little alternative to a set-

tlement. Venezuela's oil revenues to fall, Page 3

Bankers seek rescue plan

SECTION III FINANCIAL TIMES

Despite signs of economic recovery. Malaysia faces complex political divisions. But, as

Roger Matthews reports, the Government's upbeat economic

predictions, encouraged by firmer commodity prices, could help to ease the rising tide of opposition

Democracy under strain

economically and politically in a way which could not have a way which could not have been forecast three years ago. Much of the change is unplan-ned, not all of it landable, but at least part of it is probably beneficial in the longer term. Malaysia, it must be remembered, was born one of the world's luckier countries. In natural resources it is a Rolls Royce of a country compared with the square-wheeled hity-cles of Central Africa. Whatever is planted invariably grows. And if it cannot be

grown, Malaysia digs it up or drills for it. Thus for it.

Thus, it effortlessly tops the
world league in rubber exports,
is still just leading the way in
palm oil and tin, is number. three in cocoa and is in the second tier of oil producers.

Every country, of course, has a downside and in Malaysia's case, according to some senior politicians, that has been Britain. Not Mrs Margaret Thatcher's Britain, which has now achieved something akin to most favoured nation status in Kuala Lumpur, but the Britain of the bad old days of

It is the former colonial masters who are blamed for saddling Malaysia with its complex tion, aspects of which are at

try's most sensitive political and economic issues.

Some 55 per cent of Malay-sia's citizens are Malays, or bumiputras, "the sons of the soil". They are predominant in the political and rural arenas. The Chinese, who number about 33 per cent, are typically overseas Chinese, and, as ever, are to be found mostly in the cities and in business. Then there are some 6 per cent Indi-ans, who appear to be propor-tionately over-represented in the law and the media.

It is a tricky mix, especially as race has often tended to be identified by joh. It is that which the Prime Minister since 1981, Dr Mahathir Mohamad, has been trying more vigor-ously than his predecessors to change, and in so doing has indirectly helped to create the current uncertainties.

Since he was a a young man Mahathir has wanted to force the pace of change. Malays were more actively urged both verbally and through govern-ment policies to achieve an economic status more in keep-

ing with their assertive politi-cal role. Objectively, intellectually, it

was not a policy with which the other races took issue,

even though it often rankles at

a personal level. Rather it has

Old and new: Petronas and tha former colonial secretariat

been the manner of its applica-tion which has caused the greatest controversy within and outside the Malay community. That, and the inextricably interlinked personality of Dr

On first sight, Malaysia is looking good economically, but very unhappy politically. Gross National Product will grow this year by nearly eight per cent, but the Malays are more divided than they have been at any time since independence from Britain in 1963. And unhappy Malays make for unhappy Chinese and Indians. The need to cheer everyone up The need to cheer everyone up has led to some economic rethinking by the government which, aided by the good fortune of sharply higher commodity prices, could help to lighten the political gloom.

The severity of the 1984-85 recession also contributed Dr. recession also contributed. Dr Mahathir's over ambitious rush into heavy industry has

been checked as a consequence of poor management and ever

more costly yen loans. Reforms

have been forced on the loss-making steel and motor industries, the bloated, heavily Malay bureaucracy has been slimmed, public spending is partially under control again, a more seriously managed privatisation programme has been launched, corporate taxes cut, and more attractive terms offered to foreign investors, all auggesting the first blush of a Thatcherite dawn. But what is good for the private sector should also be especially good for the Chinese, and therein lies the rub.

Since 1970, the year after communal riots shook Malaysia's easy self-confidence, a New Economic Policy has been in force. Its main aim was to eradicate poverty and give the .55 per cent Malays 30 per cent of the country's corporate assets by 1990. Its policy of positive discrimination worked tolerably so long as the national cake was getter bigger every year and it was not per-

SOUTH CHINA SEA PENINSULAR MALAYSIA Pinano Kueta Terenggamu CELEBES SEA SARAWAK Sibu **SUMATERA** KALIMANTAN

Malaysia

ceived as robbing Chinese Peter to pay Malay Paul. But it was also accompanied by a big increase in direct government involvement in a wide range of industries and services.

The recession stopped the practical application of the NEP in its tracks and ensured that it would fall well short of its goals at the end of the de. The uncertainty over what form the NEP will take after 1990 continues to depress local investor confidence and also creates doubts in the minds of some foreign companies. But at the same time the government is coming to see the positive benefits the country is enjoying from a more welcoming attitude to foreign capital and what is still in the pipeline as the more industrialised countries to the east seek new manufacturing hases. Squaring the circle of a less regulated economy with greater bumiputra involvement has been made even more diffihas been made even more diffi-cult by the long and bitter struggle for the leadership of the Malay community. Dr Mahathir can be abrasive and his haste meant that he some-

ers would have liked. These factors contributed to an unprecedented challenge for the presidency of the United Malays National Organisation, which heads the ruling coalition and by convention pro-vides the Prime Minister.

Since April 1987, when Dr Mahathir narrowly won the party elections from Tunku Razaleigh Hamzah, the former

Trade and Industry Minister, the battle has continued to be fought, trailing in its wake a series of individual and institutional victims hut leaving the main contestants largely unscathed.

Elder statesmen, such as Tunku Abdul Rahman, the country's first Prime Minister, have openly accused Dr es consulted less than oth-Mahathir of treading the path to dictatorsbip. He cites a string of examples from government attacks on the judiciary which led to the sacking of three Supreme Court judges, the muzzling of the media tough new laws covering offi-cial secrets, and the use of the Internal Security Act to jail

New Umno which replaced the legally disbarred old Umno. The Malay community, however, still appears very divided opponents without trial. Dr Mabatbir refutes the which, theoretically, could put charges and cites recent by-

THE EVIDENCE noted in the final quarter of last year that the Malaysian economy was at last emerging strongly from the 1985-86 recession has been fully confirmed during the first nine months of 1988.

In mid-1987 a government which had learned to be cautious in its prognostications was still sticking to a 2 per cent growth forecast for the year. Even the most hullish private analysts could not envisage much more than 3 per

omy actually grew last year by 4.7 per cent and has maintained its momentum to the extent that Mr Daim Zainuddin, the Finance Minister, in his budget speech last month confidently predicted 7.4 per cent for the full year. It is tempting to conclude

from this that Malaysia is now back oo the course it set itself four years of this decade when growth rates of 7 per cent were accepted almost as a oational

However, caution is still advisable. Although there are to the past 12 months' economic performance, Malaysia remains highly vulnerable to fluctuations in world commodity prices and to international and domestic reaction to the inability of the Malay political leadership to re-establish the communal harmony which served the country so effec-tively for most of the 30 years since independence from

But, in the short term at least, there are no obvious reasons why Malaysia should not be able to sustain a 5-7 per cent growth rate. The commodities sector again looks remarkably buoyaot. Prices for rubber have jumped by more 50 per cent this year due in large part to the increased demand for

The US drought has helped pusb paim oil prices significantly higher, while timber prices have climbed over 10 per cent and tin bas firmed. Despite the volatility and current weakness of oil prices Maleysia is this year expecting to produce an average of 540,000 b/d, a rise of 8.5 per ceot over last year's figure of 497,000 b/d.

More encouragingly for the longer term is Malaysia's

Growth rate of 7.4 per cent confidently predicted this year

Signs of continuing economic recovery

industrial output which has at last overtaken the commodities sector in terms of percentage of gross national product. Although the industrial sector is still dominated by textiles and semi-conductors the government is making more con-vincing efforts to attract a ment and to take advantage of the relocation of industry from

Japan, Talwan and Singapore. The increase of more than 30 per cent in manufectured exports registered last year has been largely sustained during the first half of 1988 and despite some slowing in the

latter part of the year is still expected to produce a 12-month rise of more than 30 per cent.

have risen this year by nearly 56 per cent but perhaps more important is the 23 per cent increase in intermediate goods, some 75 per cent of which were destined for the manufacturing The impact of this increased domestic demand on the cur-

place in the economy and the

competitive edge currently enjoyed by industry in over-

seas markets due to improved

productivity and some decline in the value of the ringgit.

This also shows through in import figures which in the first seven months of this year rose by more than 36 per cent compared with e rise of just 6.5

per cent in the corresponding

Imports of investment goods

period last year.

rent account has been substantially eased by the country's strong exporting performance and it seems likely that Malaysia will remain nerrowly in surplus for the next two to three years. The forecast for this year is for a surplus of about \$1.2hn, somewhat less than four per cent of GDP. Six years ago the corresponding deficit was more than 13 per cent of GDP.

Tha long term capital account is expected, however, to remain in deficit as the government continues to make early repayment of expensive yen-denominated foreign debt.

The Finance Ministry is forecasting a 25 per cent increase this year in net corporate investment to \$682m and durthe year prepaid some \$973m of foreign debt which stood at \$20bn at the start of the year. The overall balance of payments is expected to show a modest surplus of about \$370m which will push np reserves to \$7.7bn, the equivalent of nearly six months imports.

It can be argued that this important improvement in Melaysia's international finances is largely due to good fortune. This explanation is less convincingly argued on

the domestic front where the reputation of Mr Dalm Zainud-din as Minister of Finance The share of manufactures in total Malaysian export earnings has risen from 31 per cent appears to be undergoing an at in 1984 to over 48 per cent this year reflecting the steady restructuring which is taking least partial revision. He is credited with leading a

serious attempt to bring gov-arnment expenditure under control and there are now indications that state intervention in industry will be diminished to the benefit of the private

But with e substantial public sector deficit last year of more than \$2.5bn - about 9 per cent of GDP, compared with a

THE STRUGGLE for the political leadership of the

majority Malay community in

Malaysia has now been run-ning for two years and shows little sign of abating. During this time, Prime Min-ister Dr Mahathir Mohamad's

grip on the premiership has not been seriously weakened, but neither has he been able

finally to choke off the chal-

Just over a year ago the Prime Minister said that it was

impossible for a government to function effectively if all the

time it was having to look over

its shoulder to see who was supporting it.
"We cannot afford it," he said. "A developing country needs a firm hand if it is going

The firm hand was duly applied, selectively and at some cost to the country's

strong economic recovery dur-ing the past 18 months.

The collapse in commodity prices signalled the Malaysian recession in 1985-86, and their resurgence has again pulled the country out of trouble.

There is a lot of truth in the

claim that the Malaysian com-modity sector thrives on other

modity sector thrives on other peopla's misfortunes.

For instance, planters are unlikely to forget the collapse of the price of palm oll to M\$400 a tonne in 1986 — well below the production cost of M\$550. Tanks at domestic ports were overflowing with nearly Im tonnes of palm oil because of the world giot in edible oils.

To cut costs. Malaysian To cut costs, Malaysian planters were forced to cease applying fertilisers and, as a

But it was the severe drought in India that changed the picture. When its full impact became known, late last year, palm oil prices ahot up to over tha M\$1,300 mark. India is the biggest buyer of Malaysian palm oil, importing about 1m tonnes a year. As New Delhi began to recover from the drought in the middle of this year, a similar disaster hit the US, sending soybean prices soaring with palm of prices moving up in tandem.

The rubber experience was even mora dramatic. Tha worldwide AIDS concern has led to a strong demand for medical gloves and condoms in recent years. Latex concentrate

is used to make these products. Last April and May, foreign and domestic demand for latex concentrate increased dramatically. The price of later exceeded all expectations at one stage it was fetching premiums of more than M\$5 a kilo over RSS (ribbed smoke sheet) one rubber, the hedging grade.

Traditionally, the premium is between 50 cents and M\$1. Malaysia, which supplies 70

Fortunately, overseas buyers
have readily accepted rubberwood for furniture and decorative products

tive products.

Until recently, rubberwood was largely used for fuel. With 1.9m hectares under rubber the potential export revenue from this source is substantial. So the authorities are considering planting rubber trees in their re-afforestation programme. Such "rubber forests" would

serve a dual purpose. When rubher prices are high, they could be tapped for their latex.
Otherwise, they would be harvested for their wood.

The sharp fall in the price of oil, a major source of income for Malaysia, is a big worry for the authorities. The Government of the sharp fall in the price of the authorities.

ment had projected an average price of \$18.50 a bsrrel for Malaysian oil for this year but, for the first eight months, the average weighted spot price

was \$16.38 a barrel. This has largely neutralised the 8.5 per cent increase in crude oil production to 540,000 h/d.

Next year, the Government is planning to increase output to 562,000 h/d, and is projecting an average price of \$14 a bar-

rel.
"It's difficult to predict oil prices. Given the inability of Opec to curb outpot among its members and the less favourable world economic picture, oil prices may go down helow \$10," says a senior treasury official. He did not reckon Malaysia's planned increase in out-put would affect world prices,

as "Malaysia is a relatively small player in the market." Sioce Malaysia started exporting liquid gas to Japan in 1983 from its gas fields off Sarawak, exports of this com-modity have been growing. Exports in 1983 totalled 1.8m tonnes and are expected to reach 6.2m tonnes this year and 6.4m tonnes in 1989. Petronas, the national oll company, has a 20-year contract to supply 6m tonnes of liquefied natural gas to two Tokyo pub-

lic utilities.

sharing agreements are more attractive than those signed in the mid-1970s, reflecting the increased risks and lower oil

prices.
To date, Petronas has issued 18 production sharing coo-tracts, covering 187,000 sq km, equivalent to sbout 35 per cent

of the country's demarcated exploration acreage. Until 1985, exploration and development work was confined to the traditional areas off Sarawak, Sabah and Trengganu, all operated by Shell and Exxon. But the new contracts have attracted interest from French, Canadian, Italian, Japanese, South Korean and Taiwanese groups all seeking oil in the Straits of Malacca and

offshore Kelantan and Pahang.
"The stage is set for an exciting period of wildcatting," says Tan Sri Azizan Ahidin, the Petronas president. He expects foreign contractors to drill 30 exploration wells a year on average over the next four years, compared with 10 wells last year.

Malaysia's current proven oil reserves are estimated at 3.2bn barrels, while its gas reserves are put at 54 trillion cubic feet, equivalent to three times its oil

Wong Sulong

Wong Sulong reports on some difficult choices over crops

The planters' dilemma

"I HAVE met many a planter who tells me he regrets chop-ping down his rubber trees," says Dr Lim Keng Yaik, Malay-sia's Minister of Primary Industries. This neatly sums up the dilemma facing Malay-sian plantation owners: how to achieve the the right commodity mix on their estates.

Whether the final choice is rubber, oil palm, cocca or cocc-nuts, it is likely to involve a 25-year investment and there-fore is a crucially important decision for farmers. Achieving the right mix is doubly impor-tant given the vagaries of com-modity prices and the increasing competition from neighbouring Indonesia and Thailand.

It was an easy decision to make in the 1970s, when culti-vating palm oil was three to five times more profitable than rubber. Millions of acres of land for rubber were converted into oil palm estates. On most plantations as much as 70 per cent of the land is now devoted to oil palm, so much so that rubber is regarded as a smallholders crop without a future. In the early 1980s, demand switched to cocoa which was then fetching three to four times the price for oil palm. The east Malaysian state of Sabah, with its rich volcanic soils, was ideal for cocoa and soon became the focus of the "chocolate rush."

Today it is rubber which is the favoured crop, providing as good a return as oil palm, while cocoa is losing money.

However, as Dr Lim says, "in future it is likely to be the suitability of the soil which determines the type of crop grown."

Mr Kenneth Eales, a long-time discretion of the soil which determines the suitable of the soil which determines the type of crop grown."

time plantation director at Consolidated Plantations, Malaysia's third largest plantation company and part of the Sime Darby Group, does not regret his company's heavy switch

into oil palm.

"Looking back over 17 years, the period when we switched to oil palm, there has been only one year, and that was last year, when profit per hect-are was better for rubber than

it wrong for part of a 25-year cycle, but our decision to switch to oil palm must be judged over time," he says. Consolidated Plantations

experience with cocoa (it has 18,800 acres or 12 per cent of its total planted acreage under the crop) has been a disappointment and it says it is no longer planning to increase its cocoa

While planters worry about the right commodity mix, Malaysia's corporate planners wished they owned such plantations as part of their corpo-rate portfolio. In the buoyant years of the early 1980s, when businessmen-turned-speculators were making a killing on

tors were making a killing on the stock and property mar-kets, plantations were regarded as staid, low-paying business. That perception changed with the 1985-86 recession. Even during the period of recession Malaysian planta-tions were returning a profit tions were returning a profit. In fact, most plantation companies have a low gearing and are cash-rich. The government, for its part,

ple, yet cost-effective in trans-

is searching for a fourth export crop. So far, it has had little success. Possibilities ranged from tropical fruits and horticulture, to rattan and pepper. As a leader in tropical agriculture, Malaysian planters have introduced, over the years, a wide variety of innovations that have benefited the indus-try. Some, like tissue culture, technically specified rubbers and super yielding ciones, are the product of years of pains-taking research. Others are simple, yet effective. They include:

include:

The barn owl which was introduced to kill snakes on oil palm estates. The snakes were first introduced to get rid of rats, which eat the palm fruits.

The pollinating weevil.
Originally from West Africa, it
was introduced by Unilever on
its estates in Sabah, and has since been universally used on Malaysian estates to improve pollination and fruit yields. ■ The bullock cart. It is sim-

which has replaced the knife developed by Henry Ridley, a porting oil palm fruits from hilly estates along narrow

paths to the mills. It has also provided work for the buffa-loes, which, because of mechanisation, are increasingly becoming redundant on paddy fields.

■ The electric tapping knife

pioneer in the rubber industry,

during the 1920s.

Rainguards. These plastic covers, the most recent innovation, are wrapped around rub-ber tree trunks just above the tapping area. They allow the trees to be tapped even during rainy days, and, hence, help increase production.

and the second s Local flexibility. Global resources.

From rubber to resort hotels. From palm oil to petroleum. Malaysia offers plentiful opportunities for trade and investment. To take advantage of them, you need a bank that can respond to local market conditions.

Founded over 120 years ago, and with 36 offices throughout Peninsular Malaysia, Sabah, and Sarawak, HongkongBank is Malaysia's longestestablished and largest international bank. The HongkongBank group's vast experience and indepth knowledge enables us to make fast decisions in this complex market.

Wong Sulong on the banking sector's turnaround

Poised for an upturn

A RETURN to healthy balance sheets under the watchful eye of the increasingly powerful their total gross salaries on central bank is the priority task facing Malaysia's financial

sector over the next few years.
The worst has elresdy ed – Malaysian banks suffered from heavy exposure to the collapsed share and prop-erty markets during the 1985-86 recession. Four banks had to be bailed out with hefty gov-ernment injection of funds.

Now, with the economy recovering strongly, the financial sector is poised to benefit. An added bonus is the prevalling low deposit rates, averaging around 3 per cent (the lowest in 20 years), while average lending rates are about 9 per cent. This has led to criticisms from consumer groups that the banks are making excessive profits at the depositors'

As a result, there has been s marked shift out of fixed deposits into savings deposits as well as government papers and equities as the public eks new investment opportureturns. The recent imposition of a five per cent withholding tax on interest on fixed deposits is expected to accelerate the

During the first half of this year, the hanking system recorded a resource gap of M\$3.751bn with deposits declining by M\$379m, while loans rose by M\$3.372bn. The loan deposit ratio rose sharply to 94 per cent at the end of June compared with 89 per cent in

December last year Bankers have defended the high interest margin by claiming that they bave to cover the overhang effect of non-performing loans. A survey by Bank Negara, the central bank, showed that in 1986 commercial banks had to provide 2.8 per cent of the interest margin for bad debt provision and interest in suspense. In the case of finance companies, the

provision was 4.5 per cent. While coverage for bad loans and interest in suspension may be inevitable, the central bank feels that staff costs and overheads are too high, and that lax cost controls during the earlier period of prosperity has been a major factor behind

declining profitability.
To cut costs and increase banks to restrict wage staff training and education.

Profitability in the banking system is being rapidly restored. Bank Negara said the sector incurred s pre-tax loss of M\$64m in 1985 and M\$224m in 1986, but recovered strongly to register a pre-tax profit of M\$565m last year. However, this is still below the 1984 figure of M\$1bn.

Curbing staff costs and the decline in overheads have contributed to the return to profitability, but the main factor remains the sharp decline in interest payments ou deposits.

The monetary authorities are also turning their attention to teckling the problem of non-performing loans. The cen-tral bank feels that unless this

Consumer groups have become Increasingly critical of banks' excessive

profits. As a result, there has been a shift out of fixed deposits into savings deposits, government papers and equities

problem is resolved it could be a drag, not only to the banking sector, but also on government efforts to stimulate new invest-

Provisions for interest in suspense and bad and doubtful debts rose by 70 per cent in 1986 and another 33 per cent last year to M\$9bn - 12.7 per cent of total loans outstanding. However, with the economic

ry and improved liquidity in the corporate sector, the quantity of provisions is being steadily reduced. In some instances, business people. who had substantial non-performing loans, have not only been able to re-service their debts, but have also been able to provide additional security for new loans to finance busi ness expansion.

The Government feels that many heavily-indebted businesses would have a chance to recover if creditor banks helped them by restructuring their loans. Most financial institutions now have special rehabilitation units to study clients' problems and propose restructuring schemes for non-

performing loans. Listed companies such as Promet and United Motor Works have succeeded in rescheduling their debts and are operating on a stronger financial footing, while Faber Merlin and Mslaysian Resources have announced proposals to convert debt to

To help the Malay business To help the Malay businessmen who are heavily in debt to the banks, Bank Negara and the Malaysian Industrial Development Finance is setting up a M\$500m Enterprise Rehabilitation Fund to provide seed capital to ailing, but viable Malay businesses.

As Malaysia moves towards a more industrialised society, functions and arees of operations between various financial institutions are begin-ning to overlsp. The largest of the country's finance compa-nies and merchant banks can now marsbal deposits and loans equivalent to that of a

medium-size commercial bank. To encourage fairer competi-tion in terms of cost of funds, the differential in the statutory reserve requirement.

Banks' statutory reserves are now only 0.5 per cent higher than finance companies and merchant banks compared with 2.5 percent in 1985. The larger finance companies are allowed to participate in the interbank market. Com-mercial banks and finance companies are also allowed to participate in stock broking, alongside merchant banks

Having sorted out the nonperforming loans crisis in the banking system, and the 1986 M\$1bn scandal in the Deposit Taking Co-operatives, Bank Negara has now been given the task of re-organising the frag-mented and problem-ridden insurance industry,

Parliament amended the Insurance Act in March to transfer regulation of the insurance sector from the Finance Ministry to the cen-

The insurance sector's difficulties have arisen largely because of the sector's weak and highly fragmented structure with an over-sized, poorly trained intermediary sector (insurance agents) and weak

There are 60 insurance companies in Malaysia with assets totalling M\$6.3bn, about equal to those of the country's 12 merchant banks. The 39 commercial banks have total assets

The insurance sector accounts for only 3 per cent of total assets in Malaysia's finan-cial system, compared with 9 per cent in Australia, 11 per cent in Japan and 15 per cent

The 60 insurance companies compete for a total gross premium base of M\$2bn. To earn the premium, the companies have to offer high commissions to their agents. For every one ringgit collected in premium, 50 cents goes on operating costs and agents' commission.

"High pressure selling, misleading consumers on their

rights and henefits and absconding with premiums – all these are bistant examples which have led to Malaysian consumers' increasing disen-chantment with the industry," says Tan Sri Jaffar Hussein, the central bank governor director general of insurance.

A major curse in the industry, he says, is fraud, particularly in motor insurance. In 1987, total claims on motor insurance alone amounted to more than M\$500m. Motor insurance is the only area in which insurance companies

In order to grow, the market needs to improve its net retention capacity. More effec-tive risk pooling measures must be developed in order to enhance the retention of pre-mium," says Tan Sri Jaffar.

As a gesture towards this end, the Government, in its 1989 budget, allowed oil companies to double the deduction on their insurance premiums on imported cargo if such insurance is taken with a Malay-sian-incorporated company.

"The party is over. The days of smooth talk, fast cars and easy living are over," Tan Sri Jaffar told insurance execu-tives recently, indicating that some far-ranging reforms are on the horizon.

He said the central bank would impose on the industry the rule of Emas (earnings, management quality, asset quality, and solvency).

Stock and commodity markets

Battered and bruised but wise after the event

Exchange (KLSE) and the Kuala Lumpur Commodity Exchange (KLCE) have come a long way since their incorporation in 1973 and 1960, respectively. Both have undergone

their baptism of fire and have emerged chastened but wiser. The KLSE, together with its "twin", the Singapore Stock Exchange, were closed for four days in late 1985 as a result of the market crisis following the collapse of Pan-Electric Indus-

With the benefit of this lesson, the two exchanges decided to ride the storm during the equities crash last October, taking e drop of more than 40 per cent in their market capialisation, rather than to shut doors, which the Hong Kong stock exchange did.

The KLCE was also closed for 18 months as a result of a

massive default in its palm oil futures in March 1984. It was relaunched in October 1985 under a completely new set of rules designed to prevent a similar recurrence. With nearly 300 countries listed under eight sections, and

with a market capitalisation of \$35bn, the KLSE ranks as one of the leading securities market in the Asian region. Unlike many other Asian Bources, the KLSE has a large

plantation section, a reflection of Malaysia's s status as a The KLSE has a large

plantation section, a reflection of Malaysia's status as a major commodity producer

major commodity producer. This year there has been a gradual recovery from last year's world stock market crash, By early November the KLSE composite index of 83 countries had risen to 347 points compared with 261 points at the end of last year, an increase of 33 per cent.

The nature of the players on the KLSE is fast-changing. Until 1985, the market was largely dominated by individu-als but today the Governmentowned National Equity Corpo-ration is one of the biggest par-

Since 1985 corporisation of securities has also been gaining momentum. Six banks have now taken majority stakes in stockbroking firms. A landmark development

will take place later this month when Rashid Hussein Berhad, the largest of the Malaysian stockbroking firms, issues its listing prospectus.

It will be the first securities firm in the South East Asia to get an exchange listing. RHB will have a paid-up capital of 60m ringgit, small by western standards but the biggest among Malaysian stock bro-

RHB is known for its inter-national contacts. It has suc-cessfully placed large parcels of Sime Darby, Consolidated Plantations and United Engineers Malaysia with overseas

clients.

Mr Rashi Hussein, the senior partner in RHB, feels that for the KLSE to grow, it must attract more foreign investments, something which RHB

intends to do.

Malaysian stocks are familiar with British and Hong Kong investors, but are hardly known in the US and Japan. The successful launching of the \$96m Malaysia Fund ou the New York Stock Exchange was hailed as a giant step in the right direction, but its timing was unfortunate coming just a few months before the October

Kuala Lumpur composite index

Money on call: dealers on the Kuala Lumpur Stock Exchange

industry, the Government recently allowed foreigners to buy a holding of up to 49 per cent in local stockbrokers, up from 30 per cent. So far, only one foreign stockbroker, W I Carr, has taken a 30 per cent stake in a Malaysian stockbroking company, although several are currently negotia-

Major projects planned by the KLSE over the next year include the introduction of a Central Depository System, a trading support, a second board and property unit trusts.

The Central Depository system will reduce the movement of share scripts, thereby reducing the risks of loss and fraud. The trading support system is aimed at enhancing the efficiency of the present trading system with semi-automatic trading, real time price reporting and market surveillance. ing and market surveillance.

The second board will cater for small and medium-sized companies with growth poten-tial, but which do not qualify for the main board. use idea behind the property ever, some activity in the SMR Unit Trust is to ease the crippling financial burden of property developers and common in the system. There is, however, some activity in the SMR 20 contract. the current property glut. Com-mercial International Merchant Bankers is expected to be the first on the market with a M\$100m property trust to be manged by Australian consul-

The KLCE is set to become the dominant multi-commodity and futures market in Sonth East Asia. It currently trades-in six futures — crude palm oil, palm kernel oil, RSS one rubber, SMR 20 rubber, tin and cocoa. Its CPO contract, its first, remains the anchor contract for the exchange.

Total turnover for last year was 131,411 lots of 25 tonnes each - or a daily turnover of 541 lots. This is three times more than the turnover in

Buoyed by volatile prices, as a result of droughts in India and the US, trading in CPO futures was very active this year. Average daily turnover

for the first eight months

exceeded 800 lots.

The tin contract, introduced in October last year, is proving to be another success. It is currently trading at more than 200 lots of 5 tonnes each daily. The gradual depletion of the world tin overhang and the steady improvement in prices have stimulated interest.

The other contracts have proven to be less successful The palm kernel contract is temporarily suspended as participants could not agree on its contract terms. The rubber contracts have been substantially revised but dealers still prefer to trade outside the exchange under the old whispering system. There is, how-

duced in August and so far its performance has been disappointing, with average daily turnover at less than 30 lots. This is largely due to the depressed prices brought about by a world glut, and also the absence of foreign participants.

KLCE officials however are not unduly worried about the low turnover, saying, like the tin contract, it would take time before volume builds up. Both the tin and cocoa contracts are designated in US dol-lars to attract foreign particlpation and to allow for arbitrage.

At the moment, the tin con-tract is the only one of its kind in the world, while the cocoa contract is the only one in the Asian time zone, and therefore complements cocoa trading in London and New York.

For a comple of months before last year's meeting of Commonwealth heads of government in Vancouvar, the ernment in Vancouvar, the Foreign Ministry in Kuala Lumpur had been engaged at the request of the Prime Minis the request of the crime samp-ter, on a study of the costs and benefits of remaining a mem-ber of the organisation. Given Dr Mahathir Moha-

mad's known lack of enthusimac's known tack of enthusiasm for the Commonwealth
the implication was that Maiaysia might just decide to pull
out unless more tangible reasons could be found for stayingin. It was therefore no smallsurprise when it was
announced that Malaysia, far
from pulling out, would host
the next such meeting evers. the next such meeting expec-ted to be held in the second

half of October 1989. The presence in Kuala Lumpur nf such an array of regional and world leaders will not do any political harm to Dr Roger Matthews on Kuala Lumpur's widening role in foreign affairs

Mahathir's new internationalism

allow Malaysia an additional opportunity to concentrate the visitors' minds on those issues which it considers particularly important. Malaysia has feit for some years that Common-wealth meetings tend to spend far too much time on generalities rather than the specifics which could be of most value to developing countries.

Canada, as distinct from Britain, is credited with taking Third World Issues seriously and Malaysia hopes that the main thrust of next year's gathering will be directed towards economic matters and allow Malaysia an additional

gathering. Will be directed towards economic matters and will only subsequently turn to political questions. It is anxious to see progress made in such areas as scientific development and technology transfer and would welcome the establishment of a fund pre-

cisely for that purpose.

Mrs Margaret Thatcher, the British Prime Minister, appears to have played a major role in Mahathir and, according to to have played a major role in Foreign Ministry officials, may achieving Dr Mahathir's change of attitude to the Com-monwealth. In Kuala Lumpur she is is regarded as "someone with whom you can do busi-

with whom you can do business".

Malaysia is still far from persuaded that the 1992 establishment of a singla European market will not be far more harmful to exporters in the developing world than is presently admitted. "We want to address this issue in very specific terms because we know that in certain areas some that in certain areas some countries presently exporting into Europe may be cut off," said a Foreign Ministry official. But whatever Malaysia may

gain in practical terms from the Commonwealth meeting is likely to be secondary to the political benefits perceived by Dr Mahathir.
When he returned to Kuala

Lumpur earlier this year from chairing the United Nations conference on drugs in Geneva it was to a massed hero's wel-come at the airport. When last month Malaysia won one of the rotating seats on the UN Secnrity Council the Prime Minis-ter's instinct was to declare a celebratory national boliday. but was eventually content. with calling just a one-day

which theoretically it should

be well equipped to fulfil.
While the cornerstone of its

The Security Council seat,

foreign policy rests on its mem-bership of the Association of South East Asian Nations, Malaysia is also a member of the Non-Aligned Movement and the Islamic Conference Organi-sation. As such its concerns range from more immediately local issues such as Kampu-

Malaysia's decision to host the next Commonwealth conference, its role in the Vietnamese refugee issue and its recently won seat on the UN Security Council should ensure it a more visible International profile

It is a role

Malaysia is also largely free from troubling bilateral issues, enjoying generally good rela-tions with all its immediate neighbours. The sensitive relationship with Singapore bas improved over the past 12 months with both sides striving to be more aware of each

Among its other four Asean

partners, Malaysia admits to bilateral difficulties only with the Phillipines. According to the Foreign Ministry that rela-tionship can never be described as "fully normal" while Manila's historic claim to Sabah (part of east Malay-sia) remains written into the

Phillipines constitution. President Marcos said in 1977 that the relevant clause would be repealed and Mrs Corazon Aquino has subsequently repeated the pledge but the necessary legislation is still stuck in the senate. Malaysia says it is asking for nothing more than the removal of the single offending clause and once this is achieved believes progress could be made in tackling outstanding issues sucb as the limits of their respective territorial waters. anti-smuggling measures and the status of an estimated 130,000 Filipinos who are in

Sabah illegally.
However, a satisfactory resolution of this issue could well stimulate the long-standing claim by Brunei to that slice of Malaysian territory which splits its tiny land area into two and which the Foreign

Ministry in Kuala Lumpur is far less enthusiastic to discuss.

A potentially more explosive territorial dispute exists over the Spratleys, a widely scat-tered chain of islands in the South China Sea to which Malaysla bas a psrtial claim, emphasised by its small military presence on a couple of outcrops. There was a clash earlier in the year between China and Vietnam, and the

Phillipines also has an interest.
The importance of the Spratleys is almost exclusively economic with all the claimants motivated mainly by the possible presence of hydrocarbons. Malaysia believes that it is vital for the competing interests of the four countries to be resolved through hilateral negotiations and was encouraged by China's statement that

it would not resort to force.

Malaysia's proximity to Vietnam has over the past 12 years also made it a natural target for refugees fleeing by boat, some 270,000 of whom have passed through the country during that time. About 12,000 still remain and Malaysia now says it wisbes to develop Pedong island off its east coast

where many are housed The preparatory meeting of the UN-sponsored international conference on Indochinese ref-ugees is due to be held in Kuala Lumpur early next year and in the run-up to it Malaysia has established firmer bilateral contacts with Vietnam.

Vietnam has expressed a willingness to receive those refugees who wish to return home but the number in that category can be counted on one hand with the overwhelming majority determined to find a bome in the US. Canada. Australia or France. At the same time the Vietnamese government has told Malaysia that it will strive to prevent any further illegal outflow and expand the scope of the orderly departure programme.

There is no sign as yet whether the contact Malaysia has established with Vietnam on the problem of the boat peo ple might eventually be of a value on the Kampuchean issue on which Kuala Lumpur continues to work closely with its Asean partners, particularly

The current problems accompanying the Soviet withdrawal from Afghanistan underline how vital it is, in Malaysian eyes, for the Vietnamese military pull-out from Kampuchea to be accompanied by a framework for a durable political

A tall military order

DURING THE parliamentary debate on the budget at the end of October, Mr Lee Lam Thye, the acting Leader of the Opposition, damanded that Malaysia's intended 21bn arms purchase from Britain should be opened up to the public

A SA CALLES AND A CALLES AND A

Studentier Liversh

"The Malaysian public who." are the taxpayers have the right to be fully informed about the proposed arms deal, the details of the purchase, the air worthiness of the new fighter planes, the actual costs and other information which does not breach defence does not breach defence secrets," he said.

Mr Lee failed to see the logic or nacessity for the govern-ment to spend such a substantial sum when it could be better utilised on education, housing and health care, unless Malaysia aspired to be a regional military power. Ha was particularly concerned about the choice of the Tor-nado aircraft at a cost he esti-

mated of M\$100m each.
Although there is no chance of the details of deal being made public — Mr Lee'e speech was not even reported in the local media — it does nonethe-less remain one of the more intriguing arms sales packages of recent years. So far all that has been

signed by Malaysia's Prima Minister Dr Mahathir Moha-Minister Dr Mahathir Mohamad and the UK's Mrs Margaret Thatcher is a memorandum of understanding with both the final composition of the package and the precise manner of payment still to be manner of payment still to be military personnel and no

However, it seems probable that the purchase will involve 8-12 Tornados, a refurbished Oberon class conventional submarine, Rapier missiles, artilery, and sophisticated commu-nications equipment.

Countertrade will account

for a large part of the deal, but there is also a cash element. Britain will take from Malaysia oil and gas (as in the far bigger sale to Saudi Arabia) together with other commodities such

as rubber and palm oil. Deliveries and payments will be spread over at least 10 years. For Britain the sale represented something of a coup, especially in light of its recent troubled relations with Malaysia, while also providing a

possibility of being able to consider significant capital expen-

As a result, he said, Malaysia now needed to replace and upgrade existing equipment to the point where it could again defend its strategic interests. Next it wanted to plug some gaps which had appeared and perhaps introduce elements of

He said that for the past few years the Ministry of Defence had bean studying various options and assessing the aircraft on offer, including the F-16, the Hawk 200 and the Mirage. It had still not com-pleted its assessment of the F-16 and was not, therefore, in a position to say whether it

Malaysia's £1bn arms deal with the UK is one of the more intriguing deals of recent years

springboard into the South East Asian market where there are prospects of several other promising sales. For Malaysia the terms offered by Britain provided the opportunity to catch up some of the lost ground caused by the clamp on defence spending as a result of the recession. the recession.

Dato Abang Abu Bakar, tha deputy Defence Minister, said during that period the defence budget had been pared back to the point where there was just walficient funds to continue

was superior to the Tornado in certain roles and whether Mal-aysia might still be contem-plating a purchase.

"It was particularly important for us to upgrade our air defence role but we were also interested in a single package, government-to-government," said the deputy minister. "The UK made us an attractive offer, both in the suitability of equip-ment and the aspect of coun-tertrade."

added the Malaysia would be paying for it over a 10 year period which meant an annual allocation of M\$500,000 or little more than £100m. "It will also provide us with new outlets for our commodities, the chance to penetrate new markets, and thus will also

help to build up our own econ-omy," be said. The size of the package may contract or expand according to the performance of the Malaysian economy over the coming years. In an ideal world, Malaysia might have liked to purchase up to 34 Tornados. However the upper limit would be 24, split between 16 of the IDS, or ground attack/interdiction version, four of the ADV or air defence variant, and four ECR or electronic combat and

Although the basic cost of each aircraft is about £20m this more than doubles when the whole package including weapons systems and spares is added up. The training of pilots added up. The training of pilots and navigators, plus ground crews for this highly sophisticated aircraft, is both lengthy and expensive, with most of it having to be carried out in Britain. It could be nearly three years before Malaysia's first Tornado becomes operational

Thair presence scarcaly alters the strategic balance in the region but the capacity of the ground attack version of the Tornado to hug the contours of the ground makes its extremely difficult to detect and therefora to defend against, a characteristic which will have been noted by Malaysia's neighbours.

It will be even longer before the country's first submarine puts to sea. Dato Abang said that it would take some 18 months to refurbish the submarine and he estimated that it could take five years to train the Malaysia meets the year. staff. Malaysia needs the ves-sel, with hopefully more to fol-low, to protect its strategic interests and Exclusive Ecointerests and Exclusive Eco-nomic Zone, particularly in the South China Sea where there are competing claims.

Assuming that there are no damaging hitches — political, technical or financial — Britain's role as the major

arms supplier to Malaysia seems likely to continue well into the next century and has the potential for substantial expansion. Some estimates suggest that the value of tha present package to Britain is much closer to £2bn than the £1bn quoted and, if the Malaysian economy performs well, could grow significantly

GUARANTEED WATER-GUARANTEED FINANCE

By the end of this century over four million Malaysian people will enjoy a water supply scheme engineered by one British company -

The project encompasses the original research, design, construction, testing, commissioning and training. The 135 separate schemes embrace the building of five dams, thirteen operations centres, three training centres and the installation of thousands of kilometres of iron and steel pipe work.

The disciplines required for this £425 million contract are diverse and exacting, but could not be utilised without Biwater's particular skill project management.

MALAYSIA HAS sounded the retreat from its disastrous heavy industrialisation programme, launched in the early 1980s with the aim of propelling it to the front ranks of industrial nations by 2000.

Dr Mahathir Mohamad, the Prime Minister, is determined to successfully treat the financial haemorrhage of some of his pet projects. National pride has been hruised. But the road to recovery has to begin with an admission of mistakes.

Malaysia is returning to the well-tried path of resourcebased, consumer and export-oriented industries. It is once again assiduously wooing foreign capital and know-how, a policy which is already begin-ning to yield impressive results. If the political hierarchy does not change course in mid-stream and the policy is sustained then Malaysia could well join the ranks of the newly industrialising countries

of South East Asia. There is national consensus that the economic future lies in industrialisation. Given a small domestic market of only 17m people the economy has to

be export-oriented. The efficient commodity sector will remain the vital core of the economy for many years to come, but it is unlikely to be able to generate enough jobs

for a yoong populatioo with increasingly high expectations.

Malaysia's manufacturing sector has performed extremely well in recent years and has been hy far the most dynamic sector since independence, a fact which is seldom recognised by foreign observ-ers or many Malaysians them-

The manufacturing sector, which this year accounted for 24 per cent of gross domestic produce this year compared with 20 per cent in 1984, has now replaced agriculture as the higgest single component of gross domestic produce.

According to a treasury economic report, the manufactur-ing index, which rose by 12.5 per cent in 1987 remains firmly on the upward trend, having already registered an impressive 17 per cent rise in the first

seven months of this year. The star performers have heen the ruhber-based industries (helped partly hy the mushrooming of rubber gloves increased by 43 per cent, basic iron and steel (up 30 per cent) and the electrical and electronic industries (up 25 per cent). Output of construction related materials also recorded increases over the same period for the first time in three years in response to the mild recovery in the depressed construction sector.

Buoyed by strong external demand, exports of manufac-tured goods grew hy 33 per cent in 1987 to 20.2bn ringgit; the treasury expects a hefty 30 per cent increase to 26.3hn ringgit this year, equal to 48 per cent of total exports.

Io acticipation of a less favourable global economy, manufactured exports for 1989 are expected to slowdown, but the government is still projecting a 19 per cent increase to 31.3bn ringgit.

A closer examination of the performance of manufactured export shows that it has a very narrow base. Last year, more than 60 per cent of the export in this category comprised electrical and electronic goods and textiles. The authorities and textues. The authorities acknowledge this dependence on the fortunes of the world computer industry, and textile quotas in the West, and are encouraging diversification into such priority areas as food and agro-based industries.

Private investment is picking np strongly in response to the economic recovery and the tions and incentives over the

Betweeo Jaouary and August, the Malaysian Industrial Development Authority (Mida) approved 428 manufac turing projects with a total equity of 6.6hn ringgit, compared with 183 projects with a

TOURISM

Picture postcard pleasures

MALAYSIA HAS plenty to offer for the business traveller looking for a hrief break from a gruelling schedule, or the tour-ist seeking in a couple of weeks to experience a little variety. Tioman Island, off the east coast of Malaysia, can be

Singapore (40 minutes) or Kuala Lumpur (70 minutes), although flights may be heavily hooked at weekends and during school holidays. It and unring school holidays. It is also possible to travel by hydrofoil from Mersing. The more adventurous and budget conscious go by converted fishing boats which takes about four hours, also from Mersing. The island is a delight for those seeking the rarely-real-ised holiday brochure illustration of almost empty palmfringed beaches, coral reefs, huscious sunsets and an affable local population. Diversions are few. The swimming is good as is the snorkelling. Waterskiing is prohibited. There is a neat hut sometimes viciously narrow nine-hole golf course which places an enormous premium on a capacity to hit the hall straight for 150 yards. Anything off line, especially from the elevated tees, is swallowed by the jungle and the sixth green is a perverse doughnut with a bunker in the ceotre. During the week the course is scarcely used and the terrace of the clubhouse is an

down. Clubs are available for hire. The one hotel on the island is the Tioman Island Resort, a-low-level central block with chalets grouped around gar-dens to the side and rear. It is pleasantly adequate and can arrange boat trips around the island to nearby coves, or to the waterfall. For the budget traveller there are a number of beachside establishments offer ing basic accommodation at very reasonable prices. If your local video shop still has a copy of South Pacific, rent it.

ideal site to watch the sun go

Fraser's Hill, at just under 5,000 feet, is for those who wish

to retreat from the heat and humidity, and perhaps get a gentle reminder of the British Empire. The hill station was huilt in 1910 and is a couple of

hours north of Kuala Lumpur. There is a modern hotel, but it is far more pleasant to stay in one of the British-built hun-galows complete with brass fitvides the meals. The hungalows vary in quality and upkeep. A year ago "Rompin" was among the best. After the heat of Kuala Lumpur it is pleasant to be able to walk briskly and there is a very forgiving nine-hole golf course to restore morale after the pun-

The tourism potential of Sabah and Sarawak, the two Malaysian states which share Borneo with Indonesia, is still largely untapped. But if you wish to return to the beach in a different location try the galows complete with brass fit-tings, old English china, open both Kuala Lumpur and Singalog fires in the evening and a pore. Until a couple of months resident housekeeper who pro- ago the hotel could only be ago the hotel could only be reached via the Sarawak River and although the construction of a hridge has opened up the road ronte it is still preferable to go by water. Italian banking learns to live with party games

John Wyles in Rome examines the appointment procedures affecting Italy's banking industry

wo years ago Luigi Coccioli's job as President of the Banco di Napoli, Italy's seventh largest bank, was hanging by a thread. In November 1986, he seemed likely to fall victim to the flashing swords of italy's two main soverning par-Italy's two main governing par-ties, the Christian Democrats and the Socialists as they fought an untidy battle to share out Italy's top banking jobs among their pla-

In November 1988, Professor Coccioli'a tenure still faces imminent political cancellation, but his is by no means the longest death scene in Italian banking. Some occupants of the top jobs in savings banks have not been reconfirmed for ten years or more, and the presidents of such other notable institutions as San Paolo di Torino, Banco di Sicilia and Monte dei Paschi di Siena are all working on borrowed

For the past six months, the coalition government headed by Christian Democrat Ciriaco De Mita has been struggling to reach internal agreement over appointments to these banks and around

30-odd other, lesser, credit insti-

The exercise – known as "lot-tizazione" in Italy – resembles the automn of 1986 except that the Socialist Party, strengthened by subsequent electoral suc-cesses, is pressing even harder for a relaxation of the Christian Democrat grip on banking and other jobs subject to political nomination. "How can a party

nomination. "How can a party with 35 per cent of the popular vote defend its control of 88 per cent of the top hanking jobs?" is the rhetorical Socialist cry.

Appointed for five years in 1983 having previously been president of Istitute San Paolo di Torino, President Corcioli chemid have President Coccioli should have been reconfirmed a year later for technical reasons. Having survived a Socialist bid for his job in 1986 he again feels himself being pushed towards the exit despite, he says, having improved the bank's capital position, irrelitabil-ity and international presence. True, his appointment was made on the basis of a party label. -. Social Democratic - but he says this was more a matter of convenience. I was regarded as the Bank of Italy's choice and they

defended me two years ago." That the top positions in Italian banking should be subject to such turbulence is not universally regarded as healthy for a system which is suffering no little anxiety about the sharper competition threatened by the arrival of the European Community's 1992 internal market deadline. The banking system cannot go on being the object of party

Prime minister De Mita: struggling to agree bank board changes

games," says Mr Lorenzo Nebi, spokesman for the Republican Party which has not been above making its own bid for banking jobs in the past, but now casti-gates "the negative weight of the

parties on the system."

The Bank of Italy has a weighty advisory influence in the nominating process of bankers and actually supplies the political parties with a choice of candidates for each job in the savings banks sector. banks sector - their political suitability is assumed, the Bank is concerned only with their professional attributes. Given their regional roots and identities, the savings banks are

nonetheless more vulnerable to political influence. The last two years have seen the controversial failures of regional savings banks in Cala-bria, the Molise and Prato,

through a dangerous mix of politics and bad banking.

Filling top banking jobs on the basis of party affiliation has parallels, alsewhere in Western Ricooe, but it is more permesisted. Surope, but it is more pervasisive in Italy and more inefficient, because the futures of so many managers are left hanging indefi-

The state controls around 90 per cent of the banking sector

Luigi Coccioli claims that a party man heading a business of Banco di Napoli's size is of much less use to the parties than his equivalent at a regional savings bank. "We have frozen recruit-ment for the past four years so we can't offer jobs, loans of a decent size need more than one signature and there is not much that can be done to enhance any individual's career." he says.

> this week. Bad news could further depress an already weakening dollar.
> The figures will show the scale of the deficit faced by

President-elect George Bush and his administration. The

research company, is for a

cent, respectively. There is also a stream of

consensus of analysts' forecasts, compiled by MMS International, the financial

Nevertheless, the issue of political control is becoming mextricably caught up in the debate about the future structure and ownership of Italian banking following the government's adop-tion of a legislative bill for trans-forming the public banks and savings banks into joint stock companies. The proposal does not envisage that the state will sur-

render its control of these banks. Senator Guido Carli, a past governor of the Bank of Italy, ads a shade of opinion arguing not only for progressive privati-sation but also for a more tolerant approach to industrial companies taking control of banks — a prospect which is anathema to the central bank. Senator Carli argues that political behaviour is moving beyond the pale and that the parties are using their pres-ent privileges in an ettempt "to preserve their electoral positions by acquiring support through the exercise of economic power."

As far as the Christian Demo-crats and the Socialists are concerned, such strictures seem to be falling on deaf ears. The latest forecast is that they may succeed in settling the most urgent appointments by the end of the month. If not, nothing will be decided until after the Christian Democrat party congress in Janu-

still have some time to wait before his fate - reappointment to a second term or reluctant redundancy - is decided. Should it be the latter, he can draw some comfort from the truth of his observation that "the only rule never broken in the past is that someone with experi-

Bush adds to his legacy of inconsistencies

By Anthony Harris in Washington

The campaign Mr Bush fought is, of course, the problem, both in the markets and in Congress. Mr Bush's lack of candour went far beyond even normal electioneer-ing standards. His political opponents (who seem to include his Senate majority leader Robert Dole) want to confront him with his inconsistencies and make him squirm. The markets simply wish to know what they should disbe-

The three undertakings which were the core of his economic campaign are not only inconsis-tent, but each is hard to swallow on its own. They are: no defence cuts; a flexible freeze on the total Federal budget; and no tax increases.

There are ambiguities and loopholes in all three, but Mr Bush will be hampered in exploiting them by the fact that he has been a loyal member of the out-going Administration. It is much easier to make drastic policy changes when you can denounce your predecessor. The most embarrassing inheritance from President Reagan is the defence programme, so that is the logical place to begin. Defence expenditure has been frozen in real terms for two years now, and the official and Congressional projections show its remaining frozen; but in fact this apparent freeze has been achieved by window-

ressing. It is a programme of defence on the instalment plan, and the instalments on the weapons systems now in development will rise rapidly. A freeze in real terms can only be achieved by massive cuts in these programmes, estimated at \$300bn-350bn in the next five years. The present Defence Secretary, Frank Carlncci, has been quite open about the fact that unless whole programmes are cancelled this would mean reducing active

On top of this, a large new problem has emerged. The ancient plants that make the nuclear explosives and short-lived triggers for the US deterrent are at present sbut down. Massive problems with safety and environmental pollution have been revealed. If they cannot be reopened within, say, a year, America will embark on an accidental form of unilateral disarmament. But the cost of putting them right, which is not at present in any budget, is put as high as \$100bn.

in the light of all this, the

rumoured provision of 2 per cent real growth in the budget which President Reagan will present next January - the "lame duck"

That is why the flexible freeze is itself generally regarded as unachievable - not a genuine programme, but simply a device to keep up the pressure on Con-gress controlled by the opposi-tion. "Keeping their feet to the fire" is the Washington cliche for this strategy, and it has nothing to do with warm slippers.

The trouble is that Congress wants to roast Mr Busb's feet in front of a fire of his own promises; and the cliche for that situation is eridlock

-	US BUDGET GAP (\$bn)								
	Gramm- Rudman	CBO baseline"	2% defence increase	Gap					
1990	100	136	12	48					
1991	64	131	24	91					
1992	28	126	36	144					
1993	0	121	48	169					

* CBO projections are based on an elitiming for a possible recession.

hudget, as it is known - does not look like a sacrificial offering, designed to help Mr Bush show that be is kinder and gentler, though that is the fashionable

In theory, of course, a flexible freeze could make room for such defence costs by cutting other programmes. But which programmes? Given the inevitable rise in debt servicing costs, and the relentless inflation of medical expenses, the cuts would have to be massive; but eight years of President Reagan have not left very much to cut.

On the other hand, these sams advisers seem keen on opening soms new exemptions - for personal saving and for industrial investment, and possibly for civilian research. Such cuts would be expensive, and would be against the spirit of the Reagan tax reforms, which aimed for fiscal neutrality; that is the downside of an Administration with no economic ideology.

Resentment over the campaign itself, it is true, will possibly fade quite quickly; name-calling is nothing new in US politics. What will not fade is the struggle for power between the Congress and the Administration, which is an almost permanent feature of US politics. This is normal even when the two sides represent the same political party; but when they do not, even the truce which normally greets a new President, his "honeymoon", may prove to be as shortlived as the Bush bull by the fact that the flexible freeze strategy might be inadequate, even if it could be achieved. Even the optimists who advise Mr Bush have limited their claims to the idea that such a freeze would balance the federal Budget by

1995, in short, Mr Bush is not even intending to stick to the Gramm-Rudman timetable, whose credibility was in any case undermined with the 'fix' last year, which combined softer disci-plines with deferred payments to produce more manageable sums in the short term, but more difficult ones in the long term.

If defence cannot be stabilised.

and other programmes also have built-in growth, then the deficit cannot be tackled without tax increases, however they may be disguised. That is the conclusion of everyone outsids the Bush team who-has studied the problem, including the bipartisan. Economic Commission. The market's problem here is that while on the spending side it finds it difficult to believe that Mr Bush means what he says, it is afraid that on taxes he may try to live up to his adopted Clint Eastwood

There are in fact some helpful ambiguities here. Mr Bush has already made it clear that he does not regard charges for health benefits as taxes; and a case can also be made for a further increase in the social security tax, since the system will plunge into heavy deficit about twenty years from now.

vate and occupational retirement schemes to seek answers to the question of whether these can relieve the pressure on public pension programmes. Invitations to take part in the sindly years sent in September to national experts on private pensions in 13 countries including Britain. The OECD plans a conference on the study's findings in the autumn of 1989.

More reliance on private and occupational schemes is the

occupational schemes is the

Pension Scheme, reducing the cost of Serps to the Exchaquer to an estimated £13hn at constant 1985 values in 2033 from £25.5bn forecast previously.

In organising its study, the

OECD has been careful to stress that it is not a policy making body. It also has expressed some reservations about private pensions, fearing that they promote social inequality. But often in the past, issues that the OECD has raised have become embedded in national policies and influenced a wide variety of its member states .through peer group example or pressure.

G7 Priority

Mr Jacob Frenkel, the IMF's charismatic economic counsel-lor and director of research, was in London on Friday to remind us that peer group pressure was how the Group of Seven major industrial nations have tried to realise their ambitions for coordinating eco-

ammitions for coordinating eco-nomic policy.

Addressing a meeting organ-ised by the Chicago Mercantile Exchange, Mr Frenkel stressed that currency intervention is not the be-all and end-all of G7 cooperation. It should be an interim stage only in the devel-opment of coordination from crisis management into a medi-um-term programme with which the seven would tackle the problems facing the world

economy.

But Mr Frenkel stressed that policies have to be good to make coordination work. No prizes for guessing Mr Fren-kel's choice of the most pressing issue: it is the US budget deficit that warrants the highest priority treatment by Mr George Bush, the President-

TWO NEW varieties of similar rating, shifting the asset-backed securities emphasis from the financial launched in the last two weeks strength of the guarantor to one to finance loans from a the structure of the security Chicago bank and the other to finance shop mortgages for a New England-based retailer – have reopened the debate on the future for these securities in the Euromarkets.

Numerous problems remain paper neither understand nor vhich suggest that it will be ears and not months until tures but are persuaded to invest as a result of sophistiwhich suggest that it will be years and not months until they reach the levels of accepof asset-backed paper in the Euromarkets is that the financial engineering known to the scarcity of missing the issue or for fear of missing the latest investment bandwagon. cial engineering know-how behind these complex structures is concentrated in the

Many European and Japanese banks are now making agencies need a wealth of progress in this area but it was financial and historical data US house, Bankers Trust, which last week successfully brought a US corporate bor-rower to a market which has been traumatised by the thought of similar industrial

credits since the shock of the RJR Nabisco buy-out. The key to the success of the issue for Stop & Shop was the credit enbancement, secured via a guarantee from Financial Security Assurance and also on the mortgages of Stop & Shop's shop premises. Despite recent worries about event risk, the triple-A credit rating which the guarantee lends the issue and the high absolute yield seemed to appeal to many investors in

Europe and in the Far East. However, the limited availability and readiness of guarantors to back these deals could present difficulties. While many insurance companies seem keen to receive substantial premiums for providing such guarantees, financial insurance remains a small and specialised department in most companies and their capacity to underwrite the structures is also limited. The number of such companies carrying a top

credit rating is also small.

If this becomes a problem, financial engineers will probahly concentrate on ensuring that the particular construc-tion of the issue can attain a

CP offers attractions to balance sheet shrinkers

FOR ALL the innovation and effort invested in the past 12 months to develop the assetbacked commercial paper mar-ket, there is precious little

paper outstanding.
For many potential issuers, the long lead time required to set up the programmes and the hefty transaction costs, such as back-up bank financing, make asset-backed CP too expensive to be attractive.
Only for those horrowers

determined to abrink their balance sheets or expand their investor base does asset-backed paper provide a more attrac-

tive option.

Merrill Lynch, arranger of many asset-backad CP pro-grammes in tha US, will launch a CP programme with a new twist — a currency swap. The programme, likely to total \$100m to \$150m, is backed by Australia's State of Victoria Housing Bonds.

Financing mortgage assets with CP may prove to be more cost-effective than using bonds or floating-rate notes because the CP can be paid as the mortgages pre-pay.

Nomura recently added a

twist to the CP market by rejigging a structure already used to generate floating-rate notes. It set up a special pur-

which are \$115.4m of Japanese hank-guaranteed ex-warrant hank-guaranteed ex-warrant lems with back-up financing bonds. Express Finance can for a programme, which issue up to \$95m in three-received the blessing of the ratissue up to \$95m in three-month CP.

The problem occurs when long-term assets are used to back what is by definition a short-term product. The major credit rating agencies require back-up bank facilities for topflight ratings.
After all, there may be suffi-

cient cash flow from underlying assets such as mortgages to make quarterly interest payments, but how is the borrower to pay for maturing commer-cial paper that the investor chooses not to roll over? The difficulties of putting together structures that will

satisfy all the relevant parties

were well illustrated by two deals announced earlier this

Last February, Morgan Guaranty announced a \$350m Euro-CP programme for Mortgage Asset Eurosecurities (MAES), a special purpose company set up to fund mortgages generated by CIBC Mortgage. The deal was stened last week.

The deal was signed last week, after 8½ months attempting to find a structure that satisfied the painstaking and sometimes conflicting requirements of the

stood to have run into probing agencies, for United Mortgage Corporation, a special purpose company set up by Learnington Spa Building Soci-ety. Banks initially banked at providing funds for such an unfamiliar horrower, essentially a warehouse for mortgages originated by Leaming ton Spa, and Barings has had to approach the banks a second

Credit Suisse First Boston packaged European receivables of BB-rated Union Carbide into a special purpose company called Hifin. Hifin is backed by a letter of credit from Credit Suisse, which not only provides the liquidity guarantee but gives the CP the bank's A-1+/P-1 commercial paper

rating. Yet, while the structure yields benefits to Union Car-hide by removing the receiv-ables from its balance sheet, tha Crédit Suisse guarantee means the issue is not in a true sense securitised. The claim of investors is ultimately on the Swiss bank rather than the underlying receivables.

Mortgage-backed market enters positive period

gage-backed issues were trading at margins 40 basis points or more above interbank rates. Last week, margins had come down to the high 20s or less -an unmistakable sign of success in the floating-rate note market. All outstanding issues are trading above issue price.

The investor base — a year ago confined almost exclusively to banks — has broad-

sively to banks — has broad-ened significantly.

Now, the £4bn-plus market can count as regular investors, companies investing liquidity, foreign banks hitherto unin-volved in the sterling markets, and institutional and pension fund investors.

A recent \$500m issue, simed

A recent £500m issue, aimed at establishing a market benchmark, appears to have been absorbed with relative ease.

That said, the recent reduction in margins over Libor has been almost matched in other

sectors of the UK floating-rate note market, as vouched by the success of Crédit Suisse First Boston's deal for the Leeds Permanent Building Society last

The inverse yield curve in sterling due to the shortage of

ON THE FACE of it, the is encouraging managers of market in UK mortgage-backed securities is booming.

At the turn of the year, mortin floaters.

Yet the real problem for the UK mortgage-backed securities market is not a lack of, or unreliable, demand, but a pau-city of supply. The extent to which more favourable borrowing terms can draw new issues into the market is limited, par-ticularly if, as seems likely, the slow pace of new mortgage

This means a constraint on the market's growth which could well continue for the next 12 months and possibly

The largest potential source of new supply is the estab-lished mortgage lenders; build-ing societies and commercial banks, which could reduce capital costs by moving loans of their balance sheets. The growth of the market so far has been due almost entirely to the specialist mort-

gage lenders.
The limited size of their balance sheets, means these firms

the best known of which are
The Mortgage Corporation,
Household Mortgage Corporation and National Home Loans - must securitise to survive.

squeeze because, unlike the huilding societies, they have no access to cheaper retail funds. With mortgage rates at 12% per cent and interbank rates at just over 12, there is precious little profit in the business for them at present.
If the screw were turned tighter, they would suffer badly, particularly in a general

slowdown of mortgage lending. This is one factor leading the specialist lenders to offer new products to house-buyers. HMC has one which fixes the rate on the mortgage for three years. In this way, they hope to free themselves from being hostage to a simple interest rate rela-tionship, which their competitors can control.

Hence, securitising other types of mortgage products is now one priority in the months

The thinking of firms like CSFB and Salomon Brothers is csrs and salomon brothers is also moving along two other tracks: simplify the process of issuing conventional floating-rate paper and expand the investor base further by devel-oping fixed-tate bonds — the first has already been issued — and foreign-currency denomiand foreign-currency denominated paper.

Merrill Lynch Begins Market Making in US dollar Japanese Equity Warrants.

Merrill Lynch International & Co. announces that from Monday 14 November 1988 it will be making markets in US dollar denominated Japanese equity warrants. Our prices are available on Reuters pages, MLVA-Z and MLWA-D.

Please contact one of the following representatives on our London trading desk by telephoning 01-867 3980:

Marco Roccia Paul Day Rainer Frey Carol Pannell **Eddie Spencer Anthony Watson**

Or our institutional sales offices in London, Paris, Frankfurt, Geneva and Zurich or one of our 22 private client offices in 18 European locations.

Merrill Lynch International & Co. is a member of The Securities Association.

An AXA Group, Caisse des Dépôts Investment.

The Grande Arche Offices, a privileged and remarkably unique location in the heart of la Défense. 35 floors of office space, a total of 40.000 square meters to be leased to companies in the service sector.

Such companies will enjoy the prestige of an internationally recognised address, the advantages of an exceptional location and especially well-planned offices. In 1989, the eyes of the world will be on the spectacular bicentennial celebrations of the French Revolution. And the Grande Arche is certain to attract widespread media attention which will also focus. on the companies which give it its vitality. There is no question that in record time the Grande Arche Offices will be on a par with such internationally renowned locations as Rockefeller Center and the World Trade

Center. An address with a

powerfull prestige image.
The location of the Grande
Arche Offices, in the centre of
the new "Tête Défense"
complex, offers the impressive
impact of an unusual new
construction, proximity to
existing services (a major
shopping centre, restaurants,
hotels, convention centre, etc.),
and an exceptional communications network leading

directly to the Grande Arche.
Overall purity of line sets
the style for the outstandingly
functional design of the office
section. But as seeing is
believing, it's well worth a visit
to discover the vast lobby overlooking Paris, the superbly
executed interior decor, the
bold innovations created by
the young designers engaged
by the AXA Group, and the
uniquely practical office
spaces which are quickly and
easily divisible with the simple

addition of partition walls.

Thus, floor surface can vary from 10 m² to more than 180 m² to suit your requirements.

The Grande Arche Offices also feature the most advanced safety and technical applications required in ultrasophisticated office buildings: total autonomy vis-à-vis the monument, and computensed management together ensure fully rationalised charges.

These features, and the special distinction conferred by the monument itself, make the Grande Arche Offices a totality unique location for companies in the service sector: a prestigious address for forward-looking companies.

For complete information about the Grande Arche Offices, or to arrange for an on-site viewing, phone August Thouard at 133-1) 42.65.54.07.

Bush enters a friendless world

LESS THAN a week after are desperately needed after becoming the most powerful man in the world, Mr George Bush may be feeling strangely impotent and friendless as he returns from his fishing holiday in Florida this morning.

With US equity investors edding their voices on Friday to the bond and currency markets' catcalls against the incoming Bush administration. the President Elect could be forgiven for wondering what on earth he had done to deserve such churlish treatment from his erstwhile friends on Wall Street.

A bill of indictment could easily be drawn up, divided perhaps into three broad sections: promises, policies and power. Despite the vacuous-ness of the election campaign, there have been rash promises aplenty, ranging from "read my lips, no new taxes" to Mr Bush's vow to "make America a kinder and gentler nation." This innocent-sounding phrase, which was significantly the only one of his cam-

paign slogans that Mr Bush chose to repeat in his victory

speech on Tuesday night, is already being seized upon by

word for an open season of

spending programmes in child-

emocrats as the watch-

more than a decade of social decay, as anyone who has been to New York recently will realise. But they are hardly going to be welcomed by the finan-cial markets, especially when coupled with Mr Bush's commitments on taxes and mili-

tary spending.
As Mr David Hale of Kemper Financial Services observes, "the new spending agenda certainly won't create a kinder and gentler bond market." More serious than mere

promises, however, have been the risky policy actions taken in the last few months to ensure a Republican victory regardless of the long-term costs. The most important of these was the international dollar support operation which we described three months ago as the Dow-Nikkei-Bush stan-

As many analysts noted in the summer, the decision to let the dollar rise to unsustainable levels on the back of perverse and short-lived bullish ment was ominously similar to the attempt last year to hold up the dollar's value by intervention - a Canute-like action which led directly to the crash

of Black Monday. Of course, history will only see the pre-election policies in this unflattering light if it Some of these programmes surge in the dollar actually

was a departure from economic reality. Despite the 10 per cent collapse of the US currency in the past month, it is not yet possible to be conclusive on

this point. Many Wall Street analysts believe that the US trade deficif would stay on a clearly declining trend, even if the dol-lar remained above Y130. Indeed, the consensus forecast for Thursday's trade deficit is "only" \$10.5bn on the traditional cost insurance freight (c-if) basis, compared with \$12.2bn the previous month, and Salomon Brothers, for instance, believes the deficit will be as low as \$9.8bn.

But even if the trade deficits did return to their downward trend, the dollar defence policy pursued before the election and now seemingly abandoned raises another, even more troubling, question. Are the new president and his advisers, led by Mr James Baker, the new Secretary of State, becoming over-confident about their power to control the markets influence economic

This seemingly abstract question has a practical appli-cation. During the past few years, Mr Baker and the people around him have been extremely successful in steering the US economy along a narrow channel between the Scylla of inflation and the Charybdis of recession.

The danger now is that they will become overconfident at the precise moment when the the perils are greatest. That moment is approaching because incipient inflation is starting to develop in the US economy and spreading to the labour market.

This was the clear message of the recent employment fig-ures, which have shown nonfarm compensation advancing at annualised rates of 5.7 per cent in the last three months and 49 per cent in the last

With the economy now at full employment, this underly-ing inflation, which is already back up to the levels last seen in 1982, is likely to creep steadily upwards, even if the Fed achieves its objective of slowing the GNP growth rate

to around 2 per cent.

This has always happened in the past when the labour market has reached full employment. But what lies ahead is not just a typical period of,full employment. For, whereas the economy's resources are now almost fully utilised, their outbut comes nowhere near satisfying the US economy's aggre-

gate demand.
That is essentially the meaning of the huge budget and trade deficits which eventually have to be closed. A few years ago, a central banker would have been sacked for suggesting as Fed governors regularly do today, that he could fine tune his way out of such dilemmas by targeting a GNP growth rate which was high enough to sustain employment, but just low enough to prevent inflation taking off.

In those days, of course, memories were still fresh of the stagilation which had its roots in a similar period of long-term economic overheating in the US in late 1960s. We all know today that the monetarists were wrong in their cen-

Institution to the money supply was certainly not the main cause of the inflation of the 1970s. Nevertheless, there was a germ of truth in their paranoid theories about fine tuning and their generalised fears about the inflationary blas in government economic power. In the next few years we may learn again how big a germ that was.

Merrill Lynch International will begin market making in Japanese equity warrants today, becoming the first firm to enter that volatile sector since the stock market crash of October 1987, Norma Cohen

The firm will begin by making markets in 200 issues, placing it at about the middle of the group of nine existing mar-ket makers in that sector, Merrill said it has made a "significant investment" in new dealing and risk management.

Anatole Kaletsky

UK GILTS

Inflation can be a small problem...

THOSE WITH faith in the predictive power of markets would be pleased with the state of the gilt-edged securities mar-ket. In the week before the Bank of England produced its latest quarterly review of the UK economy, the gills market decided that inflation was a problem after all.

With the release on last Thursday of the Bank's November Bulletin, it found out that the Bank thinks so too. By comparison with the Treasury's view of the world, as displayed in the Autumn Statement, the Bank is relatively downbeat.

Where the Treasury sees a seamless and and almost painless slowing down of the rate of growth in the UK, the Bank sees risks. It appears to sub-scribe to the view that everything has to go right for the economy to behave in the way the Treasury foresees it turn-

Significantly, but not unex-pectedly, given that the Bank is after all a central bank, inflation is the key worry in Threadneedle Street. There are, however, differences between the Bank and the

Treasury.
The Bank says the UK's rate of underlying inflation has risen and is now above 5 per cent; the Treasury says it has remained stable around 4% to 4% per cent for many years. If the starting point is higher then maybe the ending point is

too.
The Treasury said the Gov-ernment's actuary, for the pur-pose of forecasting National

UK gilts yields Related as par (%) Nov 11,1968 9.0 Nov 4,1988 10 years 20 30 Source: Warburg Securities

Insuranca contributions. believes average earnings will rise by 8% per cent this year and moderate to 7% per cent next year. The Bank does not, and the risks are all one way

and that is upwards. In its general asses the economy, the Bank made it clear that it was uneasily con-tent with the current level of interest rates. It thinks they will work to slow consumers expenditure while leaving investment spending relatively unscathed, but — and there are always buts with the Bank it could not be sure.

In any event, the market was probably right to conclude that there was no hint of interest rates rising. The line was that the 12 per cent bank base rate was here to stay for some time. There was no suggestion that rates could fall in the near term. That suggests that if money markets are looking for

a New Year's cut in rates, as some were suggesting on Fri-day, then they might do well to

think again. In its assessment, the Bank said that the optimistic sce-nario for inflation (and by extention interest rate falls) was: some narrowing in profit margins, smaller pay rises, and exchange rate stability.

The market should be clear on one thing there is nothing in the bulletin to suggest that the Bank is at all confident that any of these precondi-tions with the exception of the exchange rate over which ithas some say, exists. The exchange rate still matters and if it falters badly rates will

The Bank is particularly bearish on pay settlements. In its economic commentary it points to the rise in underlying whole economy earnings in the year to August to 9% per cent and explains it by reference to the tightening in the labour market over the autumn, considerable elith charteness, and siderable skill shortages, and the deterioration in inflation.

Most of the increase in earnings over that 12-month period was due, it said, to higher set-tlements, not to overtime and bonuses. This "wage drift" has had a minimal impact on earnings; overtime accounted for about a ½ to ½ a percentage point of whole economy earnings growth in the third quar-

 Mr Cecil Parkinson, Energy Secretary, appears to have ics. At the Institute of Directors last week, he devoted his whole address to the British economy. As Mr Lawson knows, the road between the office of Energy Secretary and

Chancellor is well worn. Mr Parkinson said some-thing of interest to the gilts market, apropos the latest fore-cast for a £10tm debt repay-ment this year.

**

Westwell P

I am sure I would be forgiven for. . . telling you a true story about a conversation that took place in a rather special room in No 10 Downing Street, when somebody promoted the notion that another 17 years of repayment of the national debt at that rate would totally eliminate the national debt. And the Prime Minister's eyes gleamed and she said: "Only 17 years."

Milan SE smartens up for latest offering

Manage Hole

Simon Holley

EUROMARKE URNOVER (Se)

INTERNATIONAL investors' fears about the settlements capacity of the Milan Stock Exchange have prompted fully to design its latest privatisa-tion so that it can be settled through two international clearers, Euroclear and Cedel Mediobanca, Italy's mostly state-owned merchant bank, is to be one of the largest offer-ings of Euro-equities since the stock market crash last year.

The international reputation of the Milan Stock Exchange, where the shares will trade. was severely damaged in 1986 after a serious backlog of deals went unsettled for months. While the Italian Government has gone a long way toward solving the settlements problem via use of Monte Titoli, the clearing house, Crédit Suisse First Boston, which is adviser on the offering, urged that international share purchases be able to be cleared through

other agencies.
Shares in Mediobanca will be sold to Italian and international investors at a discount of at least 4 per cent from cur-

rent market value.

Market value will be computed as the average of the price on the 15 business days before the sale, which takes place on November 21 to November 25. The sala will take place in two tranches, with roughly 40 per cent of the shares to be sold to existing shareholders in Italy and the remainder to be sold in Italy and abroad through five invest-

The 27.13m shares to be sold to the public - representing 50 per cent of Mediobanca's total shares - are now owned by tbree state-owned banks: Banca Commerciale Italiana. Credito Italiano and Banco di Roma. The banks' combined stake will be cut to 25 per cent.

In addition, Mediobanca's "private shareholders," who include Italian industrialists such as Mr Gianni Agnelli of Flat, Mr Leopoldo Pirelli of Pirelli Tyre and Mr Raul Gardini of Ferruzzi, will purchase

Their stake will be increased from 18.6 per cent to 25 per

Korea sets timetable for financial markets reform

A REVISED schedule to speed

A REVISED schedule to speed up liberalisation of the South Korean financial markets has been unveiled by the Ministry of Finance.

Although not yet final, it offers a number of new opportunities next vear to foreign investors interested in South Korean equities, and proposes a limited opening of the stock market to foreigners in 1990.

Under the proposal, the Government will lift restrictions on the issuing by South Korean companies of convertible Eurobonds. This will enable companies to repatriate funds raised provided they are used to pay off bank debt. Companies were previously required nies were previously required to invest foreign funds abroad, for example, in building facto-ries, which reduce the number

Machinery, the indebted South Korean company, may require a change in the law restricting cross-boldings by big businesses in subsidiaries. Negotiations between the Government and Mr Kim Woo Chong, chairman of the Daewoo Group, have not yet been concluded. Mr Kim is asking the Government to authorize a the Government to authorise a Won 200bn (\$288.6m) capital

increase by the state-owned Korea Development Bank, taking its stake in the subsidiary from 33 to 49 per cent, which Mr Kim says was guaranteed

mr Aim says was guaranteed years ago in a rescue for another shipyard.

He has proposed that the Daewoo Group and the KDB jointly invest a further Won 300hn each in the unit so that it can and its dependence on it can end its dependence on shipbuilding by diversifying into other industries.

More cash

sought for

unit rescue

By Maggle Ford in Seoul

A RESCUE plan for Daewoo Shipbuilding and Heavy Machinery,the indebted South

Daewoo

The Government, conscious of criticism of favouritism in past rescue plans, is believed to have requested Daewoo to sell off profit-making sections of the group such as the Hilton Hotel, a finance company and a chemicals subsidiary in order to reduce the shipbuilding subsidiary's debt, believed to have reached \$20n.

For the past few years gov-ernment policy has been to reduce cross holdings within large conglomerates by forcing companies to list on the stock exchange. The Daewoo pro-posal will therefore require a change in the law if it is accepted. The Daewoo subsidiary is a private company.

Foreign exposure to the loss-making shipbuilder is believed to total around \$30m, all guaranteed by the stateowned Korea Export Import Bank. Local debts have accumulated due to the company's takeover of an ailing state-owned shipbuilder in 1979, along with its failure to reconp payment from US Lines, the American shipping company which went bankrupt

Premier, which includes Sonth African Breweries, is controlled by Anglo American The company has a full order book, but many of its contracts are believed to be at unprofitable prices.

KKR agrees to Nabisco committee's buy-out rules

KOHLBERG KRAVIS Roberts. the US leveraged buy-out firm, said it agreed to certain rules and procedures set by RJR Nabisco's special committee for the submission of proposals to acquire the US food and tabases considerates.

tobacco conglomerate.

It added that it had extended its \$90 per share takeover offer to December 5, and said that no significant number of RJR. shares had been tendered to it under its offer. The new procedures require all acquisition proposals to be submitted to RJR Nabisco on November 18. Kohlberg Kravis said its

offer was originally due to expire on November 25. It said the extension of tha bid reflects the imposition of the board rules earlier this week. Shearson Lehman Hutton, which has made a rival bid for RJR alongside senior RJR man-agement, also said it was will-ing to comply with the proce-

committee. Gordon Cramb adds from Tokyo: Mitsubishi Corporation, Japan's biggest trading house, has denied speculation in New York thet it was planning to enter the bidding contest for

dures set down by the special

RJR Nabisco.
Analysts also doubted that Analysts also doubted that, if a Japanese bidder did emerge, it would be from the ranks of the country's general traders, which dominate commercial activity in Japan but have a conservative reputation and in expanding abroad have and, in expanding abroad, have made only modest acquisitions.

"We are not involved in this takeover," a Mitsubishi official said in Tokyo in response to market rumours that it was preparing an offer of \$106 per share for the US tobacco and foods group.

Hero plans corporate reshape

By John Wicks in Zurich

HERO, the Swiss-owned foodstuffs concern, has proposed a corporate reorganisa-tion in view of its growing activities abroad. This foresees the conversion of parent company Hero Conserven Lenz-burg into a financial holding unit named Hero.

This new company, which will remain in the town of Lenzburg, will no longer have an operational function. Its subsidiaries, Traitafina and Hero Fleischwaren Lenzburg, will be merged into a single company, which will then assume the name Hero Conserven Lenzburg and operate the group's Swiss plants in Lenz-

burgand Frauenfeld. The parent company, which will ask sbareboldera for approval of its plans at an extraordinary general meeting to be beld on November 29, says its combined function as a bolding and operating company was increasingly unsuitable in view of the growth of foreign subsidiaries and its intentions to expand abroad,

"particularly by acquisitions within the European Commu-

nity."
The disadvantages, a letter to sharebolders explains, are to be found in the fields of organisation, management, administration, finances and taxes.
At the same time, share capi

tal of the Jersey company Hero Finance is to be doubled to £25m (\$45.3m). The St Helier affiliate is to concentrate on supplying funds for the long-term financing of foreign subsidiaries.

Turkey broadens bond market to cut inflation

By Jim Bodgener in Ankara

TURKEY is planning to introduce medium-term to long-term floating rate domes-tic bonds to cut down on the inflationary impact of its beavy domestic borrowing, according to a senior official at the weekend. The bonds will be indexed to inflation, which reached 86.4 per cent in the year to the end of October.

The Government first started auctions of bonds along with open market operations in 1985. However, at present these only have short-term maturities in line with market preferences.

Rolling over the bonds is a beavy burden for a government already hard-pressed by

an exceptionally severe external debt servicing load of

\$7.3bn in 1987. Government bonds and bills accounted for TL2,100bn (\$1.23bn) of the total TL3,900bn paid out in interest in the first

half of the year. The bonds will be indexed against inflation rates on six monthly averages. To over-come market preferences for near-term instruments, the Turkish treasury and central bank are also planning to offer incentives for the new floating rate bonds, probably by easing the mandatory liquidity ratios of banks that take them up, said the official.

Profits jump 29% at Air New Zealand

By Dai Hayward in Wellington

AIR NEW ZEALAND, which is being offered for sale by the New Zealand Government, lifted first-balf profit by 29 per

cent to NZ\$25.5m (US\$16.5m). This points to an operating profit for the full year of more than N2\$75m, which would be ahead of predictions, Bids for the airline close this week.

The increased profit for the half year was achieved despite fierce competition from Ansett NZ on domestic routes. Demand on the airline's international routes has increased but there has been a decline in domestic travel.

Mountleigh could be Lord Young Looking to improve stock market rating facing outright bid by Italian interests

By Paul Cheeseright, Property Correspondent

MOUNTLEIGH, the property company built up by Mr Tony Clegg, is likely this week to face a takeover bid from Italian financial interests represented by Mr Florio Fiorini and Mr Giancarlo Parretti,

Mr Parretti has been putting intense pressure on Mountleigh for the last three weeks to sell Galerias Preciados, the loss-making Sapnish department store chain it bought a

ear ago. Mr Fiorini, through SASEA Holding, bis Geneva-based company, bas recently bought a package of London properties from Mountleigh and announced last week that it would control over 7 per cent of Mountleigb equity by the end of the year.

Tbis weekend Mr Parretti has made it clear to Moun-tleigh that he is prepared to pay between £300m and £350m for Galerias Preciados, or about double the amount Mountleigh paid in the first

Aberfoyle

improvement

pared with charges of £31,000.

Turnover for the six months to June 30 rose to £3.84m (£3.44m). Earnings were 1.2p

(1.22p) per 8p share, but there is no interim dividend due to

continued problems over remit-

tance status of the subsidiaries

in Zimbabwe.

place. in the event of this offer

Somic surges to £90,000 midway

being unacceptable, Moun-

tleigh has been informed, then it is likely that a fullscale bid

would be made for the whole of the Mountleigh equity.

Any such bid would be con tested by Mr John Duggan, the chief executive installed by Mr Clegg last month, unless the

price was pitched at an oputrageously high level. Such a price would have to be in the

range of 300p a share, com-pared with last Friday's closing

pared with last Friday's closing market price of 174p.

These moves follow repeated denials from Mountleigh that any talks were in progress

about Galerias Preciados. The first direct contact from the

Parretti interests was appar-

icate time for the company. Mr Duggan has been engaged on

an extensive exercise to reduce borrowings, while Mr Clegg apparently acting unilaterally had been engaged in talks to take over Wembley. Mr Dug-

gan is said to have put his foot down over price.

But the moves come at a del

ently last Thursday evening.

First balf pre-tax profits at Despite a lower than forecast Aberfoyle Holdings improved from £898,000 to £929,000. The turnover, margins were maintained at Somic, kraft paper increase was largely due to £144,000 interest received comspinner and weaver, with profits ahead in the six months to

The taxable surplus rose to £90,361 (£64,442) on turnover virtually static at £1.64m.
Trading profit was lifted to £57,593 (£31.454). Earnings worked out at 2.937p (2.094p). The interim dividend is raised to 1p (0.75p).

surprised by advice on Elders bid By Lisa Wood

LORD YOUNG, the Trade and Industry Secretary, was sur-prised when Sir Gordon Bor-rie, the Director Ganeral of Fair Trading, advised him to refer Elders IXL's £1.6bn bid for Scottish & Newcastle to the Monopolies and Mergers Com-mission, his department con-

firmed yesterday.

Lord Young announced on
Thursday his decision to refer the bid to the MMC. This was despite littla geographical overlap between the two com-panies and a combined market share of the beer market of less than 25 per cent.

Elders provoked a row on Thursday after it took its stake in S&N from 14.1 per cent to 23.6 per cent in a short period after the MMC reference was announced, and, prior to making normal undertakings that it would not increase its stake.

S&N met the DTI on Friday to press its demands that these deals should be unscrambled. The DTI, which had first said it could not, and then it would not unscramble the deals, is looking at the matter again.

A DTI spokeswoman said Lord Young was not an expert on the brewing industry and had understood Sir Gordon's recommendation when it was explained in the context of an existing MMC inquiry into the

This major inquiry, which reports in February, is looking at the system of tied pubs whereby the majority of brewers own pubs in which their brands are sold. A merged

S&N and Courage, owned by Elders, would have created one of the largest blocks of tied houses in the UK.

Lord Young, in an interview published in The Sunday Times yesterday, said he had thought the Elders' bld would be graved through and Was be waved through and was snrprised when Sir Gordon advised him to refer it. The Department of Trade

and Industry later denied that Lord Yonng's statement suggested some confusion over his merger policy, on which he gave a detailed statement recently.

Vanessa Houlder on Hestair's latest moves which mean another change in profile

Spider' at the same time as temporary copy typists, and manufactures baby buggies as well as garbage trucks, it is tempting to assume it is managed by a maverick with a decidedly whimsical sense of humour.

Yet for the ex-management consultants who have built up Hestair since the early 1970s, it merely exemplifies the virtues of the mini-conglomerate. This motley spread of interests that includes toya, nursery prod-ucts, stationery, vehicles and employment agencies, have, with varying degrees of suc-cess, helped steady the com-pany when it has hit turbulent markets in the last ten years.

Now Hastair is poised to change its profile. It is on the verge of narrowing its focus from three divisions to two, through a proposed manage-ment buyout of its vehicle engineering division. It is also contemplating the flotation of its US employment agency interests and a build up of its consumer products interests.

If so, it will be just the latest upheavals in a company that

has David Hargreaves, a man-agement consultant, took over the company, then a loss-making angineer. In a rash of acquisitions, Mr Hargreaves transformed it into a fast-moving and fashionable mini-con-glomerate until in 1978, a number of its markets collapsed,

tipping it abruptly into loss. No sooner had it recovered than in 1983 It bid £4m for Duple International, a coach-building company. The deal proved disastrous. The under-lying problems in the acquisition were exacerbated by the turmoil inflicted on the market

CHRISTY HUNT, now a maker

Christy Hunt lifts

profits to near £4m

HEN A company for Hestair's specialised markets Webster the vehicles by deregulation, privavehicles by deregulation, priva-tisation and the cancellation of bus grants. Once again, the company went, for a chort time, into loss.

Although there have been no further shocks, some rapid and far reaching changes have taken place since then. Pre-tax profits burched from £2.7m in 1983-84 down to £1.8m in 1984-85 and then rapidly up to the £13.3m scored for the year to January 1988.

Whereas in 1983-84 engineering was 51 per cent of the busi-ness and services was 17 per cent, by this year that ratio was virtually reversed. This shift was achieved through a string of acquisitions of US employment agencies taken against a backdrop of persis-tently sluggish markets for the vehicle engineering division.

Until now, that is. For the catalyst for the proposed vehicle engineering sale is that the division has clawed its way back to a healthy level of profit. Now, flush with its larg-est ever order announced last week, the division's management are anxious to take con-

trol of its business.

So why does Hestair want to sell? In part, it is because the about half that achieved on average by the employment services and consumer products divisions. It also does not draw on the same type of marketing skills as the other two

But perhaps the most press ing reason for the divestment is Hestair's stockmarket rating, which it believes is depressed by the generally low-ly-rated and volatile engineering interests. Mr Dermot Coleman, of BZW agrees: a

1984 85 86 87 88

Stockmarket values have also inspired Hestair's idea of also inspired Heatan's alea of floating its US employment agency business in the next eighteen months. Hestair's US employment agencies have grown hand over fist since it grown hand over list since it first moved into the US in 1987 and are on target, with the help of a few further deals, to become the sixth largest US agency in terms of sales. With US employment agencies trading on multiples in their high teens, Hestair could hope to raise \$40m. \$50m from the sale raise \$40m - \$60m from the sale even though it would keep a major stake in its business. Such a move would also help raise the profile of the US busi-ness. This consists of 170

branches in 7 companies, spread round the US. From next February, these will all trade under the Talent Tree name - a mova that should save costs and boost its marketing drive.

1984 85 86 87 88 A third benefit from a flota-tion is that it would provide share options that could be an incentive to the US staff. Mr Richard Raworth, deputy chairman, says that a option scheme in Hestair shares has been considered but the com-

pany is seen as too remote from the US business to provide a direct incentive.
Yet another spur to the flotation of part of its employment
agency business is this would
automatically whittle down the share of employment services-now two thirds of its business. This is important, Mr Raworth argues, because of their cycli-cal nature. Although tempo-rary help has become a far more integral part of a work-force than it used to be, Hes-tair is still mindful of the recession at the turn of the

recession at the turn of the decade when most employment agencies plunged into loss.

As part of this drive to broaden the base of the business, Hestali plans to build up its consumer products division. At the core of this division is Kiddicraft, maker of solid and sensible toys for toddlers.

Bought in 1976 for £36,000 ff has grown, until last year it made trading profits of £1m. Another longstanding part of this division is Hestair Hope, seller of stationery and related gifts - such as decorated writing paper - to schools and high

Hestair has decided to build on both these businesses. This summer it bought Andrews-Maclaren, the baby buggy maker, with the intention of amassing more manufactured. street retailers. amassing more manufacturers of nursery equipment, such as high chairs and cots. It is now close to an acquisition in the UK and it is also planning to expand into continental Europe. The arosion of the trade barriers in Europe could bring substantial benefits to this division, says Mr Raworth A larger market is vital, for example, to justify the extra costs associated with more modern materials and techniques for making baby bug-

Likewise, Hestair is trying to build up the consumer statio-nery side, as the educational supply part of the business is facing tough competition. A first step in this process was taken ten days ago when Hestair bought HC, a photo frame and framed art company, from Intercraft in the US for £12.5m

The new look Hestair will have nearly as many profits coming from consumar products as from employment agen-cies and which will be spread evenly around the UK, the US and, eventually, Europe.

Nevertheless, these moves are likely to go down well in the City. Hestair is perceived as having a strong balance sheet and a flair for shrewd and inexpensive deals. It would also calm worries about overexposure to employment agen-cies. Last, but not least, it should change Bestair's image which is still dominated by the erratic if colourful fortunes of its fire engines and refuse

wasting let

(p. jame, 193)

stately edifices, that London had far nobler squares and that Persia's Shiraz could boast costlier fountains, albeit not cooler ones. What was it that singled Madrid out for special praise? Having built up considerable interest, the renowned travel-

ler and adventurer positively bawled out his convictions: "The population! Within a mud wall scarcely one league and a half in circuit, are contained 200,000 human beings, cer-200,000 human beings, certainly forming the most extraordinary vital mass to be found in the entire world; and be it always remembered that this mass is strictly Spanish."

The people have not changed in the past 150 years. For sheer energy it is hard to heat the energy it is hard to beat the Spanish capital.

In no other working city are there traffic jams at 2am as there are along the Castellana Avenue when the summer terraces are in full swing.

It was fitting that when the 17th century Hapsburgs decided that Madrid should be the nation's capital, Spain was at the time gripped by the exuberance, indolence, inventiveness and decadence of the baroque age. Madrid, say the city's aficionados, was to be a baroque masked ball and the ball is as alive in today's zippy business capital as it was in business capital as it was in

the 17th century.

This is as plausible as any other characterisation of the city; there are developers ntown on the Castellana Avenue who are creating one Rockefeller Plaza after another. The mood is of a fast growing capital at the heart of a fast growing nation. Multinationals are in Madrid in force, many with their headquarters on the Castellana Avenue.

The leafy wide honleyard.

on the Castellana Avenue.

The leafy, wide boulevard, home to the Commerce and the Economy secretariats and to the Industry ministry as well as to energetic summer terraces and late night traffic jams, is without a doubt the decision axis of Spain as far as business is concerned. All the central offices of the major foreign banks are in Madrid and so are the headquarters of more than one-third of Spain's

large companies.
The city is the headquarters of the five companies which

AS A BUSINESS CENTRE

had the highest 1985 earnings in Spain and of the five with the greatest number of employ-ees; of the five Spanish compa-nies that invested most heavily in research and development, three are based in Madrid and of the five that invested most

of the five that invested most in fixed assets, four have their headquarters in the city.

A tour of business Madrid takes the visitor through the head offices of Telefonica, Iheria, the Corte Ingles department store chain, IBM Spain and the utilities Endesa, Iberduero and Hidroeletrica. Add to that the fact that more than to that the fact that more than 70 per cent of Spain's insur-ance, petroleum, construction and public relations sectors are stationed in Madrid and that the city's stock exchange handles 80 per cent of all national dealings and you can see why expense account restaurants are packed.

None of this should in fact be surprising. Madrid is Spain's geographical heart, its communications centre and its political, financial and administrative centre. To call it a communications . centre requires a little imagination -

as is often the case in Spain. The only motorway out of Madrid is a two-lane affair and it goes some 50 miles in the wrong direction - towards underdeveloped, north west Galicia which is the last place in which bullish business peo-

ple are interested.

Barcelona is linked by motorway to Valencia, the French frontier and the Basque country but not to Madrid. The Madrid-Barcelona shuttle is a nightmare and even phoning Spain's second city at peak hours is well nigh impossible. Nevertheless all the national Nevertheless all the national roads, with their meagre lighting and their excess of juggernants, do fan out of Madrid and Barajas is far and away Spain's most important international and domestic airport.

Despite all the communica-tions shortcomings (a lot of money is currently being spent to improve them) you can travel more quickly from Madrid to more places in Spain than from anywhere else in the country - which is exactly why Philip II, that prudent centralist chose to move his court to the physical heart of Spain.

Madrid's status as a political centre has survived the post-Franco rush to decentralise. Catalans and Basques, for example, who make a point of running their own affairs, are the first to admit, and to complain, that the big, and all to often the small, decisions are still made in Madrid.

The central administration in Madrid employs 100,000 and all the leaders of the national political parties are elected to parliament on Madrid lists. Madrid has a long tradition behind it as a city of office seekers and dispensers. Its own economic boom, however, is a recent phenomenon. Madrid was where one ohtained favours - but fortunes used to be made elsewhere.

ing suburbs were designated a After the Spanish Civil War, Francoism made a concerted attempt to lure industry away from the Basque Country and Catalonia, which were politi-cally suspect areas. Thus an industrial belt emerged in the Southern suburbs of the city and industry came from nowhere to represent 20 per cent of the Madrid region's GDP - against 4.5 per cent con-

tributed by construction and a

government of Madrid province. The Community, by way of its own agencies such as IMADE, the Madrid Develop-ment Board, has laid down a set of priorities to increase the supply of industrial space. The industrial profile of Madrid in the next decade will be shaped

drid Transportation Center/Madrid Business Park - Las Rozas/Urban Zones In

less hy the heavy, labour intensive industries of the southern suhurbs and more hy the advanced industries sited in the North and East of the city. The technological park of Tres Cantos, home of AT&T's Euro-

pean venture, is a key aspect of this development. An essential aspect of industrial Madrid is that the city and the Community are utterly confident about the leading role that the region will play in advanced industries. The Tres Cantos park alone represents 50 per cent of the investment in Spain's scientific and tech-nological sector. Half of Spain's most advanced technical schools are in the Madrid area. Already Madrid is reaping

the riches of these develop-

ments. It has long overtaken the Basque country in per cap-ita income and is at the top of

the table together with Cata-lonia and the tourist playground of Mallorca. With 12 per cent of the national population, the Mad-rid region contributes 16.7 per

cent of Spain's GDP and the proportion is growing. With its 5m inhabitants, 3m in the city proper, the Madrid region is booming, hungry for consumer goods and obsessed with fads.

The people that Mr Borrow marvelled at are having in Madrid today the time of their lives. The city is noisy, has appalling traffic problems and can be very polluted (Ernest Hemingway's description of a "mountain town" where the air was "actively pleasurable to hreathe" is a sick joke) but it is traffentable. indisputably fun. and as the baroque masked ball contin-ues, so there is a ready awareness that anything can happen.

TRES CANTOS

Eyesore becomes a showpiece

TRES CANTOS is a sort of Phoenix Conceived as a housing estate, it stood for years as an emblem of a Madrid that had stood still. Now revamped as a technological showpiece it is being halled as proof that the city is reborn and rising. In the 1960s Tres Cantos was

signated a dormitory town but as as the first tower blocks went up recession set in and ensured that much of it remained empty.

The would-be satellite town,
20 minutes' drive north of Mad-

rid, was an eyesore for motor-ists driving to their weekend cottages and the ski slopes of the Guadarrama sierra. Now 20 years later, and in a wholly different economic climate, the same area has been turned into an industrial nucleus of mainly research and development public and pri-yate ventures that incorporates

its own technology park. Hightech companies are competing for locations and the prime site is occupied by AT&T. The grandiose scheme of the twilight years of Francoism had originally envisaged 100,000 in the custom-built new town. When work began, the housing estate had already been scaled down to 30.000

inhabitants and in the event only 12,000 moved in The arrival of the US giant changed the prospects of the virtual ghost town overnight. Four years ago AT&T initialled a joint venture with Telefonica and chose Tres Cantos as the site of a \$200m plant dedicated to the design and manufacture of intergrated circuits for the European market. It was said that the new plant would act as a magnet

for other high-tech projects but, just in case, the Madrid authorities have left nothing to chance. They have created the industrial estate and the tech-nology park with intention of leading likely companies into AT&T's magnetic zone of influence. The US multinational did not come cheaply to Tres Can-tos. State subsidies for the plant amounted to \$60m and soft credits were worth a fur-ther \$70m. Telefonica itself, as the venture partner, provided 20 per cent of the equity and the Tres Cantos land area was

giveaway. Similar handouts lie behind the rush to bask in the shade of AT&T's umbrella. Companies setting up at Tres Cantos are eligible for pon-returnable subsidies of up to 30 per cent of fixed asset investment in addi-tion to a 99 per cent import duty discount on capital goods from the EC and a further 99 per cent municipal excise taxes discount on the establishment of industrial activities. The specific aim of the estate

and the park is to attract R&D activity and all ventures that fall within this sphere have access to a second group of administration subsidies and soft credits.

There is a third set of incentives for projects that are tuned to Spain's National Electronic and Computer Science Plan (PEIN), to the Research Promotion Plan for the Pharmaceutical Industry and to European initiatives such as the Eureka and the Esprit pro-

The gestures and, particu-larly, the incentives and the almighty AT&T magnet are producing the goods. Virtually all of the park's 42 greenfield plots, with surface areas varying between 2,600 sq metres and 10,400 sq metres, have been sold and Tres Cantos SA, the agency set up by the Mad rid regional government to pro-mote them, is now acquiring

housing developments at the Tres Cantos replacing the initial tower block

Campo de la Naciones

Trade fair plans boosted

MADRID IS something of an oddity among capital cities because it tends to end very

tion of about 40,000 and the industrial estate, comprising

more than 150 ultra modern companies, will be providing 10,000 skilled jobs.

Tom Burns

City limits mean exactly that and asphalt immediately gives way to the emptiness of the Meseta plateau. It is precisely on one of these dramatic urban edges, to the north east, where the manicured gardens of the expensive Conde de Orgaz suburb give way to a brown scrub-land that is home to sheep searching for subsistence nourishment, that the grandly titled Campo de la Naciones, the Field of Nations, is to be

The project is an emblem of Madrid's burried expansion and of its seemingly endless growth ambitions.

Competing plans for the development will be reviewed this month by the city authorities. Common to all the proposals is the inclusion of two hotels, a conference building equipped to hold 20,000, an international business centre,

In advance of the final plans for the future field, earth mov-ing has started on a substan-tial corner of it. This area, occupying 22 per cent of the Campo's 4.3m sq metres has been designated as the site of a trade fair complex and, if its construction keeps to schedule, will be fully equipped to entice exhibitors away from the likes of Birmingham and Lyons, in

Mr Ignacio Solana, chairman of Recintos Feriales Madrilenos, Refemasa, the company that will run the complex, expects there will be a heightened competitive tension as the Madrid Exhibition Centre opens but he also believes that demand is growing strongly and that there will be enough

The type of fair that Mr Solana wants to stage will be "a professional one and more

Star events of Madrid's cur-rent annual fair calendar are an international tourism fair -Fitur - which attracts about 3,000 exhibitors from more than 100 countries and a somewhat smaller event - SIMO international - dedicated to office equipment and computers. Mr Solana, naturally, would like to see several more fairs of this calibre coming to the new centre.

The existing optimism over the project is based on the suc-cess so far of Madrid's participation, with limited facilities, in the fair circuit.

The city was a late starter in the industry for it was not until a specific city fairs agency, the Instituto Ferial de Madrid (IFEMA) was created in 1960 that serious promotional work was undertaken. In its first year of operation, IFEMA organised 17 fairs. In 1986, a record year, 35 fairs were staged in Madrid drawing 13,000 exhibitors, 2,300 of them

non-Spanish, and 2m visitors. Fair activity in Madrid has an accumulated annual growth an accumulated annual growth rate of 20 per cent. The new centre will complement the two existing fair sites, one at the northern end of the Castellana Avenue and the other set in the Casa de Campo park, and will double the available exhibition space. Mr Solana's plans at Refemasa allow for an area of 105000 so metres for area of 105,000 sq metres for technical installations and a further 30,000 sq metres for exhibitors' and visitors' ser-

vices, thus making the new complex only slightly smaller than Birmingham's. Considerable emphasis is placed on the characteristics of the centre. Essentially, it will be a flexible exhibition zone composed of eight units that can be used individually or combined to form a single

Two of the units will be just over 5,400 sq metres, a further two will be 10,800 sq metres and and the final four will be major one of 16,200 units. The idea is that any product, of any size, value or nature can be exhibited and that each unit has its own complete back-up services. The structure, within the Campo, is set in a park of its own with 300,000 sq metres of parking space (enough for 12,000 vehicles in addition to 100 trailers and 150 buses) and

In all the exhibition centre will have nearly four miles of internal roads which will have three entry points, two of them on the main Madrid ring road and the third linking the cen-

a further 200,000 sq metres of

tre directly to the airport.

Created in 1986, the funding and sponsorship of Refemasa illustrates the manner in which Madrid officialdom is determined to push and promote the city for all it is worth. The break down of initial pts

5bn (£239m) outlay had the Madrid Council and the Comu-nidad de Madrid, the regional executive providing pta 2bn apiece. The Madrid Chamber of

Commerce and Industry and the Madrid savings bank provided 10 per cent of the equity and pta 500m each.

Initial forecasts indicate that about pta 15bn will have been invested in the project before the first exhibition opens for visitors.

In terms of attracting visi-tors and creating jobs, the lay-out is according to Refemasa's backers cheap at the price. They point to Birmingham and the positive impact that that centre has had on the city. The larger Campo venture, with its extremely ambitious planning. indicates that the exhibition

MADRID BUSINESS 3

of much building, there are still leafy parts to the city of Madrid

Setting up in the city can mean facing a bewildering bureaucracy

How to cut through the red tape

CONTACTS and PERSONAL networking skills are very important everywhere but in Madrid they may be more necessary than in other business

Mr Nidardo Cuadrado, a Spaniard who runs the Madrid branch of a major US consultancy firm, says the main problem foreign businessmen face in the city is that "the rules of the game are not clear".

Sted

म् १८८ म् इ स्टब्स्ट स्टब्स्ट

100 EV

20 to 1

100

. F.

A foreigner arrives expecting clear legal guidelines for business activity but rapidly finds a bewildering bureau cracy. Even fairly simple operations, such as importing personal belongings, can become nightmanes and starting up an office means a wearying pilgrimage through government departments. In Mr Cuadrado'a experience every major business entering Spain ends up sooner rather than later being represented by one of the three or four major law firms

A timely telephone call to the right person means cutting through miles of

red tape.

If they are wise, new arrivals, big or small, will also listen carefully to what foreign bankers resident in Spain have

to say. Some listen, for example, to Mr Courtney Worthington, a former member of the State Department and a senior executive of a US bank in Madrid for the past eight years. He spends much preaching the value of networking to foreign businessmen setting up in the Spanish capital. He tells the story of a newly-arrived American acquain-tance whom he cautioned against buy-

ing companies in Spain using only bal-ance sheet data. When the would-be huyer protested that the figures he was examining had been audited by a top international firm, Mr. Worthington entreated him to "ask around" before

making any purchases "Accountants are not the high priests of business in Spain and it is naive to assume that accounting standards here are the same as in the UK and the US," says Mr Worthington.

"Balance sheets in Spain can be creatively put together for the taxman."

The complaint is common. Madrid consultant Mr Joe Franklin, a retired general who used to be the senior repre-sentative of US forces in Spain, warns clients against "coming cold" when

they arrive to do business.

"Investors receive a lot of conflicting information here and a thorough groundwork before arrival, with a properly established network, is essential,"

Mr Alfredo Fraile, one of Spain's top networkers, conceiles that standards are different and that "balance sheets can be cosmetic.

· A consultant to major market makers in Spain such as the Kuwait Investment Office (KIO), Mr Fraile argues that aside from book-keeping, the situation is not too different in Spain than else-where. In Madrid the edge comes with a good image and the right introductions just as it does in Paris, London and New York, Mr Fraile, who was once the sias and groomed him for stardom, opens doors and so does rival net-worker Mr Julio Feo who was Prime

Minister Felipe Gonzalez's chief of staff for five years before he turned to con-

sultancy work. Whether the need to network is greater in Madrid than in other capitals may be an open question but it there is a consensus that reliable information is at a premium. Professionals such as Mr Fraile and Mr Feo can save much time when it comes to "asking around".

Introductions and personal relationships are a vital part of business life in Madrid and every foreigner working in the city soon that realises that he might well be ignorant about much of what is really happening.

Recent financial difficulties experienced by major Spanish companies, such as the electrical utility Fecsa or the chemical group Explosivos Rio Tinto, infurlated foreign creditors. The latter had, unwisely, believed published information while some other domestic institutions had been tipped off and were in the clear when the real figures were revealed.

According to hroker Mr Francesc Guardans, "insider information has been and remains an institution."

Mr Guardans returned recently to Madrid after nearly 10 years on Wall Street and he found that little had changed: "Half a dozen people here who are in the know call all the shots." Mr Cuadrado, the consultant, believes

that Madrid can be a closed society for foreigners and he is not surprised they are frequently baffled by the city's business environment. Mr Ward Wallace, a US promoter with 20-years experience of Spain agrees: "Spaniards are very

hospitable in everyday life hut when it comes to business they can be extremely reserved." Part of the prob-lem is that there is a lack of forums where foreign and domestic husiness-

men can exchange views.

The US and the British chambers of Commerce in Madrid fail to create a dialogue between Spaniards and foreigners and they are referred to as "jokes" by their expatriate members. Also, Spanish institutions, such as the Employers Confederation, can be less than welcoming to an outsider.

The situation may be becoming easier and more professional. "If you have a good venture, you will get an audience," says Mr Wallace.

Banker Mr Worthington believes that hreaking into Spanish business depends, as it does everywhere, on what you are offering and what people want from you. One sign of change is that the three-hour lunch is shrinking in time. Experienced movers and shakers such as Mr Fraile believe they are on the way out. But what has not changed is the technique of reaching the right person on the telephone.

Inevitably a stonewalling secretary says the object of the quest is reunido, at a meeting. "You have to ring on behalf of a networker, you have to call de parte de so and so, in order to be put through," says Mr Wallace.
Alternatively one skilled foreigner in
Madrid evolved the following tactic for

breaching secretarial defences: "I know he is reunido and that is precisely why I have to speak to him urgently.

Tom Burns

BUSINESSES DEDICATED to helping other businesses start up are a particularly speci-alised niche of the services sector and and a better indicator than most of an area's ness environment.

Such ventures simply did not exist in Madrid until recently hut suddenly they have appeared and seem to be

thriving.
Companies. like Eurobusiness, which was established three years ago, and Lynx-which opened early this year claim to offer much more than a centrally-located office, the use of a fax machine and a 24-hour answering service. Both companies use words-like 'global' and 'total' to describe their services.

The cornerstone of their business is running office hotels". For between £750-£1,500 a month they both provide clients with a presti-giously addressed place of work that is functional yet pleasant and slightly bigger than a cubby hole.

Eurobusiness is uptown on the Castellana which is where multi-nationals and those who work for them live. Lynx is, if OFFICE HOTELS

Businesses wnich can lend a hand

downtown on the same avenue and its offices overlook the

Demand for such temporary offices has sharply increased. Since last year, Eurobusiness has had a waiting list of between seven to 10 companies. These enterprises, mostly foreign, have been marking time for two months and more in the hope of renting one of Eurobusiness'a 17 offices and gaining access to its back-up

Lynx, which has only just opened, has already established a 60 per cent occupancy rate for its 30 offices.

So promising do these ven-tures look that there are at least three other complexes in anything, grander for it is Madrid offering temporary

the secretarial and communications trimmings and several more are said to be in the pipeline. As far as Mr Rodriguez Castanon, a Eurohusiness executive, is concerned, the

LEASED PROPERTY

Lack of space pushes up prices

THOSE WHO lease office space in Madrid are making a forwhat has happened to Spain tune, those who have to rent it for Madrid is the nation's busi-O FIGURES are paying through the nose.

It is a question of supply and demand and it boils down to an Secure Carpeta de 19 space in the Spanish capital.
Comparisons on this issue

between Madrid and other
European cities are embarrassing. The office/inhabitant sq
metre ratio ranges from Frankfurt's high 12 per cent to
Greater London's low 2.64 per
cent. Brussels has 6.12 per cent
and Paris has 3.10 per cent.
Madrid's statistic is 9.81 per
cent. Madrid could live happly
with such a ratio were it to be with such a ratio were it to be a lotus eating, residential gar-den city but of course it is nothing like that and it does not want to be.

The demand for office space in Madrid is demonstrated by the vacancy rates - or rather the lack of them. Unoccupied

ness capital, is to look at rental levels for prime properties. Between 1980 and the end of 1985 rents rose from pta1,200 sq metres/month, exclusive of ser-Comparisons on this issue vice charges, to pta1,900 sq between Madrid and other metres/month. Then every-

The property company Richard Ellis which compiled those figures estimates that demand for rental accommodation in Madrid will remain at a high level and that rental values will continue to increase much faster than the rate of infla-

cent of the total space available in Frankfurt and in Brussels, 3.1 per cent in Paris and 3.5 per cent in Greater London. In Madrid only an average 1.45 per cent of the total available office space has been vacant so far this year.

A way of measuring what

MADRID BUSINESS RENTS Pesetas per sq metre per month .1.900 Dec 1986 2,400 3.000 Sept 1988 4,000

tionists, and to the consternation of builders and specula-tors, the Madrid authorities tematically refused permission to demolish huildings. All that can be done is to gut and refur-bish them, keeping the existing

It is impossible to increase significantly the volume of office accommodation in the city centre. New high rise

city centre. New high rise buildings are growing like beanstalks in the mytown area of the Castellana avenue.

The 46-storey Torre Picasso will begin packing in tenants early next year and earthmoving will soon begin on a Kuwait Investment Office-tunded project to build twin funded project to build twin far this year:

has happened to Madrid so far. To the applause of conservational far this year.

27-storey blocks still further north on the wide and tree-lined road. But the projects fall

There are just more than 3m so metres of office space in Madrid and in spite of the fact that about 300,000 sq metres more are going to come on the market over the next four years, there will continue to be an important deficit of first-

class office accommodation in

short of demand

the city. The estimated gross take-up figure of office space this year will be 150,000 sq metres, up from 115,000 sq metres last year but estimated demand annually for air-conditionsd, centrally located offices is reckoned to be running at 200,000 sq metres per annum. At the end of 1987 there was an unsatisfied demand of approximately 83,000 sq metres and if the present growth rates are maintained the unsatisfied demand figure will stand at

200,000 sq metres by 1991. ...What is likely to happen is that companies are going to move out to the Madrid suburbs. The growth areas in this respect are the north east highway, the N11, to Barcelona which passes by Madrid's international airport and the NI highway heading north and the NVI highway, known as the Corunna road, which is Madrid's north west exit.

The N11 Barcelooa highway has the advantage of airport access but is already heavily huilt no and is unattractive residentially. The N1 and the NVI exits lead towards Madrid's superbly scenic Guadarrama mountain range and are the focal points of large-scale housing projects. housing projects.

Kodak moved its headquarters a 15 miles out of town along the NVI a couple of years ago in what was for Madrid an exceptionally bold move.

The venture has now attracted imitators such as Hewlett Packard and a division of Banco Hispano Americano. When it moved out Kodak was supplying five buses to transport its staff out to work. Now only two buses are required for the majority of the Kodak's employees are living out along the same north west highway within sight of the Guadar rama Sierra, near the better schools and far from the city centre's pollution, its muggers and its traffic chaos.

The trend will almost cer-tainly continue. If Madrid is to live up to its business centre ambitions it will have to.

TORRE PICASSO

The intelligent tower.

wailable from 1st March 1980

CHARLES III, the enlightened Bourbon monarch is generally considered to be the best mayor that Madrid ever had because just about everything that improved the capital's quality of life, from the introduction of regular refuse col-lection to the launching of a lottery and the construction of the Prado, occured during his 18th century reign.

However when it came to putting down city crime, Charles, or rather his minister the Marquis of Squillache, not only failed to control it but created a citizens' mutiny by trying to do so.

Squillache took severe objection to the Madrilenian use of ground length capea which were ostensibly worn hy all because the streets were filthy but which were also a notori-ously good garmeot for disguising muggers and other undesir-

Arguing that as the streets were now cleaner, Squillache ordered a ban on such cape and had tailors stand at street corners with large scissors to cut off the offending extra length of cloth. The result was a revolt, known as the Souillache mutiny, the repeal of the ban, the dismissal of the ill-advised minister and continuing street crime.

Modern mayors and officials have also met with scant success when it comes to policing the city. Every so often there are reports of near rtots in The city is having little success in tackling crime and poverty

Fighting a losing battle

towns, the barrios when police try to arrest drug pedlars and youthful criminals

Leave anything in your car and the window will be smashed and the item stolen. Four out five people you meet will have direct experieoce of a mugging or a break-in. According to the police, virtually all such street crimes are drug related. Reviewing crime and drug abuse earlier this year Ms Ana Tutor, the governor of Madrid, concluded that that there were 8.000 heroin addicts in the city and that 2,000 were responsible for more than 90 per cent of reported crime.

There certainly wera attempta at policing, for arrests more than doubled going from 10,212 in 1986 to 21,864 in 1987 but the effective ness of such action was open to doubt.

Every crime weary Madrilen-ian (statistically 44 oot of every 1,000 inhabitants of the city was a crime victim last year) will tell you that those picked up by police are usually soon back on the atreets.

Ms Tutor admitted that 125 of those arrested in 1987 had been detained between four the year. There were close on reported 15,000 muggings in Madrid last year, a 32 per cent increase, just over 20,000 car thefts, another 32 per cent rise and 41,032 car break-ins, an annual jump of 66 per cent.

Other areas of crime, notably house break-ins which were down by 29 per cent to 9,147, ented a better picture. Vio-

tha dark side well. He gives what money he can to the local young drug addicts to stop them making fund raising sor-ties into the city centre. Another priest, Fr Enrique, whose parish is in the sontharn slum of Vallecas, organises regular demonstrations calling on the authorities

to provide more funds for drug

providing free meals in Madrid. Also, there are six such kitch-

rehabilitation.

Squillache ordered a ban on long capes and put tailors on street corners with scissors to cut the offending cioth - the result was a revolt

lent crime was also down and fewer banks, jewellery shops, pharmacies and petrol stations were robbed.

The principal city safety problem, in the view of Ms Tutor and Mr Juan Barranco, the mayor, is petty theft by youths who need money quickly to buy drugs. Such youths mostly live in the outlying barrios where unemploy-ment and drugs are plentifui.

They and their ghetto-like home areas are a decidedly dark side to Madrid. Fr Eloy, a

there are long queues outside the convent of the Immaculate Conception "It is no longer tramps, and

runaway kids who coma here," says one of the Immaculate Conception's sisters. Juan Jose Beltran, the executive secretary of Caritas, reck-

statue of Don Quixote in Madrid's Plaza d'Espans

Above: Paseo de la Castellano; and, below, the Madrid Stock Exchange building.

It can take time to adjust to the way things are done in Europe's sunniest capital

THE FOREIGNER'S secret to surviving in Europe'a highest and aumniest capital is to not arrive blinkered. When in Madrid, do what the Madrilenos do,

or, at least try.

Although there is a new breed of Spaniard now propelling the old country into the 20th century, the male Spanish yuppie still greases back his hair like an old Franco general, keeps erratic office hours, has never ending lunches and drives like a lunatic. Because Madrilenos refuse to

delegate or keep their secretaries informed, to get appoint-ments one has to either employ local secretary or adopt a I'm-here-see-me now attitude.
"Some Spaniards will think nothing of missing an overseas viaitor," aays a Michael Rourke, a Madrid-based British

insurance broker, "Remember there are four 'yeses' in Spain. In Barcelona 'si' means yes, in Madrid it's maybe, in Seville it's no and in Galicia, all

Even Spaniards who have atudied at Oxbridge or Harvard, like half the current cabl-

Avoid taking a blinkered view

net, have a zest for flaunting national habits which would drive a time and motion man to perpetual manana. Fund manager David Jimenez Blanco, aged 25, admits he is probably typical of most

local businessmen.

T get up at 8.30, take my coffee on the run and get to the office by 9am hecause like most people. I live nearby," he axplains, "Then I might pop out for another coffee before breakfast at 11am. Aperitivos at 1, and at 2pm I either go home or start a business lunch. This will usually last 21/2 bours with coffee, pacharan (the new 'in'

> anis, allegedly half the strength of traditional brandy) and cigars.
> "In Madrid, this is how we really do husiness. Then it's work again from 4 until 8pm. After that it's copus at some-where like Castellana 8, or in

Spanish digestivo of sloe and

the summer the terrazas."
One hour for lunch in Spain s an insult and dining before 10pm is for children only. The latter are a series of

open air summer bars - Madrid freezes in winter - among the middle line of trees in Madrid's main north-south Castellana artery. Here Porsches line the bus lanes as nocturnal bait for Serrano rangers, Madrid's trendy Sloanes. To get around, taxis are numerous but adept at cheat-

ing. Always watch the driver start the meter - especially at the airport. There are some-times small aupplementary charges. If in doubt, ask for a If you are not very rich and staying at the Ritz, then the Palace Hotel (Plaza de las Cor-

tes 7. 429 7551) across the road is always the favourite choice. The buge stained glass cupola domed bar is a magnificent meeting place and the Prado art museum is close hy. By the Serrano-Caatellana

ousiness area is the Castellana Inter-Continental (Castellana 49. 410 0200), still popular with

the Hilton. Uptown near the newest high rise offices is the huge Hotel Melia Castilla which floats majestically in a sea of girlie bars.

By contrast, the venerable Wellington (Velasquez 8. 275 4400), by the lovely Retiro Park, is old fashioned with a surprising garden and swim-ming-pool, whilst the small, modernised Breton (Breton de los Herreros 29. 442 8300) is not far from the new business s. The ageing and economical Victoria (Plaza del Angel 7. 231 4500) is recommended for exploring old Madrid, the tapa bars and the Prado.

For longer stays, estate agent Mr Ramon Alas says pta230.000 (£1,100) per month pays for a central apartment with garage - vital - and pool rising to pta600,000 for a small mansion in the exclusiva northern suburb of La Mora-

Here buying a smallish detached house will cost over pta80m an apartment nearby in equally popular Mirasierra about pta40m and a little more downtown. Agents charge 5 per cent and tiny property ad's in the press are an incompetent jumble.

Claudine Innes, 25, Account Officer with First Chicago has a few tips for long stay sur-

"Est with people you like but wait until Wednesday. The weekend has to be within feeling distance. Spaniards eat lightly. Don't mix your drinks

like they do.
"Dinner begins at 10 and goes on to all hours. It takes getting used to and you musn't always worry about how awful you'll feel in the morning. But I prefer Spain to London. It's more personal. Just because the work isn't 9-5, the people in Spain who have to get some-thing done always do. I trust the people who work here.

In old Madrid, Botin (Cuchilleros 17. 266 4217), in spite of

The second of th

Americans who remember it with greater linguistic ease as the Hilton. Uptown near the newest high rise offices is the meson fare of wood oven roast bahy lamb or suckling pig.
Nearby is Casa Paco (Puerta
Cerrada 11. 266 3166) where you
can sizzle delicious steaks on

scorching platters. A smaller luncheon venue, is La Gran Tasca (Ballesta 1, 231 0044) Then there is Nueva Cocina in Spain plates actually have food on them. For serious business try the Belagua (Hermosilla 4 431 2715) or for more gentle touch seduction the converted stables of El Amparo (Puigcerda 8. 431 6456) and the intimate histro of Viridiana (Fundadores 23, 246 9040). When in Madrid, yon should not miss El Pescador (Jose

Ortega y Gasset 75, 402 1290) or La Trainera (Lagasca 60, 276 8035) where the Atlantic meets The elegant Zalacain (Alvarez de Baena 4. 261 4840) has three Michelin rosettes and

stars and actors at the trendy English-run Armstrongs (Jovel-

lanos 5, 522 4230).
A good place for a rendez-vous (and Angel's excellent cocktails) is the wood panelled Bar Balmoral (Hermosilla 10) with its scattering of retired generals, often with interesting decorations. Or eavesdrop on a tertulia a discussion group, among the literati at the Cafe Gijon (Paseo de Recoletos 21), one of Madrid's famous old cares.

Finance.

Doing business in Milton Keynes

SIR ROBERT McALPINE & basement and ground slab on sons has been awarded a piled foundations. The external finish will be white marble

European cars for the 1990s. This new manufacturing facil-ity is believed to represent the largest ever single investment

largest ever single investment in Britain's motor industry. The professional team con-sists of Posford Duvivier acting on behalf of Ford (UK), and Mouchel and Partners forming part of Balfour Beatty Build-ing's design team.

The work includes the instal-lation of four passenger lifts and the provision of extensive parking facilities.

Planning Design Develop-ment will be acting as employ-ers agents for the project which is due for completion in March 1990.

to a high specification in a ter-race ranging in size from about 2,000 to 3,000 sq ft. The units, due to be completed early in 1989, are to be offered to owner

occupiers. The agents are Weatherall, Green and Smith.

March 1990.

Bank clearing centre

Midland Bank is to move its national cheque clearing cen-tre to Southwark to a giverside site next to the proposed Globe

The clearing centre, currently housed in two buildings near Tower Hill tube, has to process about 3m cheques a

day.

Midland has acquired a 1.2 acre site on a long lease. The new building will provide about 240,000 sq ft of offics space, and has been designed

in sympathy with the neighbouring Globe Theatre. Site clearance is dns to start shortly, and construction is expected to start in spring next year, with completion in 1991. The management contractor is R.M. DOUGLAS, and it is believed the cost is in the region belived the cost is in the region of £30m

The structure will have a reinforced concrete frame on piled foundations. The building will be in traditional brickwork

A drawing of Midland Bank's proposed cheque clearing centre.

Norwich Union headquarters

Contracts totalling £11m have been awarded to four of the WILLMOTT DIXON construction companies. The largest, worth £5m and involving the refurbishment and alteration of an old factory in Norwich, has gone to Bush Gould of Norwich The contract which will wich. The contract, which will provide an office headquarters for the Norwich Union investment department, will last for

Bush Gould is also working on a £253,000 contract to build two shop units at Gorleston for Property International, and on a film contract which will pro-vide an extension to Anglian Windows' central glass works in Norwich.
Willmott Dixon London is engaged on the refurbishment of the ground floor of Faraday, Building North in Carter Lane, EC4 for British Telecom at a cost of £479,000.

The specialist house building company, Willmott Dixon Housing of Shefford in Bed-fordshire, has won a £1.7m con-tract to build council housing for Aylesbnry Vale District

A.E. Symes of Leyton has also been awarded a £1.7m con-tract to refurbish a building in Chapter Street, SWI to form three pentbouse flats for Fin-

West End office building

TROLLOPE & COLLS CONSTRUCTION has been awarded a £10m commercial project in St Martin's Lane, WC2, by Grosvenor Square Properties Group.

The contract is for the construction of a five-storey office building, with a ground floor, lower ground floor and sub-basement.

Behind a traditional, recon-

structed Victorian facade of red-brick and stucco work, will be 73,500 sq ft of office accom-modation, a marble reception area and a large central atrium. The building will be topped with a mansard roof with dormer windows.

Work will commence early in the New Year with completion in two years.

Retailing in Harlow

RMSON CONSTRUCTION has won its largest order. The f8m scheme awarded by Citygrove Developments is for the construction of 220,000 sq ft of retail space at the Harlow Retail Park.

Leading retailers such as

Leading retailers such as Homebase (a Sainsbury group company), Unipart, Allied Car-pets and the ELS furnishing group will move into the build-ings, as will Wimpey, with a drive-in restaurant along with nine industrial users

The whole development at the Harlow Retail Park will comprise 11 separate retail units and three restaurants. with ample car parking and full landscaping. There will also be a seven-screen Odeon cin-ema complex on the site. Work is already under way for com-pletion in early 1990.

- ACROSS
- 1 Change for reading matter (order by Mr Baker?) (4.5) 6 Sign of hesitation when short cover comes round
- 9 Snake taking top off plant 10 Of which litter is composed
- (5.4)
 11 Complaint at beginning of summer, fruit 8 bit short? It
- 12 Bring up the end (4) 14 Fix round books in a raised
- pattern (7) 15 You're well in when you
- make it (7)
 17 Supervisor organising one farm (7)
 19 Man (kind) (7)
 20 Test mark wrong in English and Maths initially (4)
 22 In a smash, winner (i.e. TT)
- is to get into a tangle (10)
 25 Child is after stolen number
- one from a race (9)
 26 This spot shows area of ignorance (5) 27 Run over again cases in
- material (5)
 28 I'm taken to get through
 green after change (9)
- DOWN

 1 Instruments to introduce tax, we hear (5)

- 2 Strange stock exchange
- character is provider of maintenance (3-6) 3 Fear more fixed, it is said, in the mainland (5-5) 4 A collection of Turners
- could be hanging on it (3-4)
 5 There's need to encourage,
 or I shun being schooled (7)
 6 Perhaps drunk above the
- average (4)
 7 It's the church's place to
- give answer in note form (5) 8 Record broken tried to reject as untrue (9) 13 That can go from top to bottom (10)
- 14 Extra course with reference to a new student (9)
 16 Revising again? Rush it in before end of Aug. (2.7)

 18 Boy brought up round the north to do better continu-
- ously (3-4) 19 Forms set with acre (ground) (7)
 21 In order to be classically ele-
- gant (5) 23 Duck down (5) 24 Look up and down (4)

The solution to last Saturday's prize puzzle will be published with names of winners on Sat-urday November 26.

GUIDE TO UNIT TRUST PRICING

THIS THE time shown alongside the four manager's name is the time at which the unit trusts' daily dealing prices are normally set unless another time is indicated by the symbol alongside the individual unit trust name. The symbols are as follows: \$\phi\$ = 0001 to \$1000 hours; \$\phi\$ = 1401 to \$1700 hours; \$\phi\$ = 1701 to midnight.

HISTORICE PRICEMS

The letter H denotes that the managers will deal on a historic price tasis. This means that investors can obtain a firm quotation of the time of dealing. The prices shown are the latest available before publication and may not be the current dealing levels because of an intervesion portfolio revaluation or a switch to 5 forward pricing basis.

Intervening portfolio reratszation or a switch to 5 forward pricing basis. FORWARD PRICING
The letter F devotes that prices are set on a forward basis so that investors can be given no definite price in advance of the purchase or sale being carried out. The prices appearing to the newspaper show the prices at which deals were carried out last Friday. Other explanatory notes are contained to the last column of the FT Unit Trust leformation pages.

Speculative funds flee from the dollar

SPECULATIVE FUNDS fleeing from the dollar are threatening to cause problems for currencies supported by strong economic factors, such as the D-Mark and yen. High yielding currencies.

such as the Australian dollar are also becoming uncomfort-ably strong, and sterling would have similar difficulties if it were not for doubts about the

British economy. These doubts centre on inflation, and were highlighted by warnings in the Bank of England Quarterly Bulletin published last week. This week sees the release of UK data on producer prices; retail sales; money supply and bank lend-ing, which will give further guidance on this subject.

Sterling gained over four cents against the dollar after the US presidential election on Tuesday - rising to the highest level since UK bank base rates began to climb in June - but over the same period lost about 2 pfennigs against the D-Mark. Mr Nigel Lawson, the Chanwish exercise the char-cellor, has to be careful to weigh every word be says at present. The City noticed that Mr Lawson said he is seeking to maintain as great a degree

one can. The words "as one can" were taken to suggest the Chancel-lor could be looking for the opportunity of a slight sterling depreciation, while giving the appearance of talking tough.

On Friday support for the dollar by the Bank of Japan and West German Bundesbank

of exchange rate stability as

failed to prevent the US cur-rency falling to its lowest level against the yen since Decem-ber 1987, and the weakest against the D-Mark since mid-Lack of co-ordinated central bank intervention kept selling pressure on the dollar, but it should be noted that Armistice Day closed several financial centres, and probably limited the action of the monetary

authorities. The US presidential election has been a factor overhanging the dollar for some time, and political factors also had an impact on its Canadian coun-

terpart last week. Federal elections take place in Canada on November 21, and recent opinion polls have shown a very confusing pic-ture. A poll published on Fri-day showed the ruling Conser-vative Party, and opposition Liberals almost level.

Earlier in the week the Bank of Canada supported a weak Canadian dollar, after a poll suggested the Liberals were 12 points in front of the Conservatives, but an even earlier poll showed the Conservative Party 6 points ahead of the Liberals. Very high interest rates are

making the Australian dollar an attractive resting place for an attractive resting place for speculative money at present. The Australian currency rose above 85 US cents on Friday, the highest level for four years.

This took it close to a technical resistance point, but if the Australian dollar breaks through 85.50 US cents the pace of advance could acceler-

Demand for the currency has left it vulnerable to a sudden downward technical correc-tion, but with interest rates at

very high, boosted by several increases in the Australian Reserve Bank's rediscount rate, and by Mr Keating's comments

Short term rates are nudging up towards 15 p.c., and bank lending rates are already at levels between 15.25 p.c. and 16.25 p.c. The high yielding Australian

dollar is starting to prove too attractive for comfort and this has prompted some interven-

MONEY MARKETS

Currency factors set to dominate

the next month or so.

The performance of the dollar and the D-Mark will be particularly important, having a spin off effect on many Euro-

UK clearing hank base lending rate 12 per cent trom August 25 & 26

pean economies including Britain and France. London's financial markets are also waiting for guidance this week on whether higher UK hank base rates have reduced the growth in con-sumer demand and bank lend-

ing.
It this is not the case, and the economy shows further signs of overheating, another rise in base rates is not out of

the question.

The pound rose sharply against the dollar last week, but did not quite manage to keep pace with the D-Mark.

CURRENCY FACTORS are likely to have a major impact on interest rate movements in strength against the dollar, but the picture could change if a weak dollar results in a tightening of the Federal Reserve's monetary policy.

In Frankfurt the Bundesbank will be trying to steer a steady course, keeping interest rates at a high enough level to dampen inflation, but not so high as to push the D-Mark up too sharply against the dollar or the French franc.

There should be few problems in monetary management this month. The Bundesbank drained a little liquidity from the banking system last week, and still allowed a slight decline in the Frankfurt rate

Nevertheless the Bank of France could yet be forced into higher interest rates, if speculative funds continue to be attracted into the D-Mark, wid-ening the gap between the German currency and the franc within the EMS.

WORLD TELECOMMUNICATIONS

London 13 & 14 December 1988

The reduction of long established barriers to competition and the effect of rapid technological change in the world telecommunications industry will be among the issues to be discussed at this important two-day conference. An authoritative panel of speakers includes Professor Bryan Carsberg, Yasuo Otaki, Bjorn Wellenius, Professor Deodato Gagliardi, Sir Eric Sharp and Ake Luadqvist.

Details of how to register can be obtained from: Financial Times Conference Organisation 126 Jermyn Street, London SW1Y 4UJ Tel: 01-925 2323 Fax: 01-925 2125 Telex: 27347 FTCONF G.

TM AMAZED at how much

change we've wrought in the world in the last 20 years," says Robert Noyce. "You don't always realise it when you're in the midst of it. it's like climite midst of it.

hing a mountain. It's only when you get to the top and look down that you say. Wow, that was a long way we

Climbed up."
Robert Noyce, the co-inventor of the integrated circuit and holder of 16 patents for semiconductor devices, methods.

ods, and structures, has been responsible for more of that change than almost anyone else. He was a founder of Fair-

child Semiconductor, one of Silicon Valley's most produc-

tive start-ups. He went on to found intel, where he is now vice-chairman. And he is also the newly appointed chief exec-utive of Sematech, the US

semiconductor industry's research and development consortium. Over a 35-year career, he has been instrumental in

building the \$40bn microchip market that provides the base for today's information tech-

Mr Noyce's warm smile and Mid-West charm belie an inten-

sity and drive that has fired the amhitions of his colleagues.

He loves challenges: the cere-bral "mountaineering"

involved to creating ever den-ser, faster semiconductor chips, or the physical chal-

lenges of his favourite sports, skiing, hang gliding, scuba div-

ing and flying.

But perhaps his greatest challenge will come in leading

challenge will come in leading Sematech's efforts to reclaim the US's premier position in the technology of manufacturing chips. Sematech was formed in 1987 as a consortium of industry members representing the hulk of US semiconductor producers. It is jointly funded by industry and government and involves an extraor-

ment, and involves an extraordinary level of co-operation

between US firms in an effort

to advance technology and fight off competition from

vices. "Finally, it dawned on me that this was just far too important to let somebody else do it. I had to do lt myself."

His appointment has given Sematech a boost of confidence

Lingering doubts about Daimler

ne of the world's most nnwieldy industrial conglomerates, Daim-ler-Benz, seems to be moving once again towards adding to lts hulging portfolio, by taking control of Messerschmitt-Böl-kow-Blohm (MBB), the arms and aerospace manufacturer. After more than 18 months of political and financial manoeuvring, the way was cleared in Bonn last week to give Daimler the protection it

European Airbus project. The takeover would create still more managerial complications for what has already become one of the world's most diversified engineering and technology concerns. With annual sales of over DMS0bn (£25.3bn), the Stuttgart giant will account for more than 3 per cent of the federal repub-lic's gross national product. Little over three years ago it was simply a specialised motor

wants against exchange rate losses from MBB's stake in the

empire, admired around the world for its managerial focus.
Critics of the way Daimler has become steadily more diffuse and complex since 1985 through its takeovers of AEG (industrial electronics), and Dornier (aerospace), are some-times reminded that the new group would still be less than balf the size of General Motors. That is no commendation at all, in view of GM's notorious difficulties in integrating its supposedly "syner-gistic" acquisitions of Hughes Aerospace and Electronic Data Systems - troubles predicted by every observer of the countless diversification disasters which bave occurredon both sides of the Atlantic over the past 30 years. As at GM, the growing reli-

ance of cars, aircraft and all forms of transport on lote-grated electronic control systems and the apparent potential for sharing technol-ogy between them, was one motivation for Daimler's move into industrial electronics (through AEG) and aerospace portfolio notion of reducing Its reliance on the motor indus-

try.
Mr Edzard Reuter, Daimler'e chairman and architect of its dramatic diversification, is proceeding carefully with the proceeding carefully with the crucial process of restructuring his empire into a more sensible order. Under reorganisation announced in late October which also cuts the unwieldy main board from 12 members to eight, parts of AEG, for instance, will shortly be transferred to the newly created Dentsche Aerospace. created Dentsche Aerospace, whose tronhlesome Dornler unit may eventually lose its prized medical systems busi-ness to a more logical part of the group.

Cross-company sensitivities

Despite the immense complexitles and cross-company sensitivities involved, Mr Reuter nevertheless maintains that Daimler needs only "three to five years" to develop a common culture, and an effective process for managing "synergies." This is less than half the time it has taken to integrate much smaller and less complex diversifications, such as Saah's similar "fly-

drive" enterprise.

Even after the restructuring is complete, the sprawling group will still have to be studded with n dense network of co-ordinating committees, unless Daimler can find some bureancracy-free way of man-aging all the linkages between lts various units without destroying their market-re-sponsiveness and motivation.

Such a breakthrough is unlikely, given that it has taken several decades of experience for less diversified multinationals such as Unilever and Procter & Gamble to achieve fairly flexible co-ordi-

nation mechanisms.

Far more probable is that
Daimler will eventually feel forced to simplify the task by divesting some of its least logical parts, with AEG's house-hold appliances at the head of a long list. Some streamlining of its electronics interests may also be forced on it for anti-trust reasons. But even this will leave a construct whose logic remains donbtful for many years to come.

Edzard Reuter must thank his lucky Mercedes star that his is not an American or British congiomerate, prey to the attentions of a break-up spe-

Christopher Lorenz

THE MONDAY INTERVIEW

Always poised for challenge

Louise Kehoe and Jane Rippeteau speak to Robert Noyce, a founder of the semiconductor industry

Despite heing reluctant at the start, Mr Noyce is fully committed to his task. He has been a champion of the US semiconductor industry in its fight against "unfair" foreign competition for over a decade. As a founding member and the first president of the Semiconductor Industry Association, he played a significant part in taking the industry's message to Washington.
Mr Noyce rejects charges

that his industry has turned to protectionism in the controversial semiconductor trade agree saal semiconductor trade agree-ment between the US and Japan. The agreement, now two years old, sets minimum cost-based prices for Japanese memory chips. It "eimply enforces trade laws already on the books," says Mr Noyce. "The agreement is being critic-iesd now because the price of a ised now because the price of a D-ram (dynamic random access

D-rain (dynamic random access memory) chip is high and sup-ply is limited," he says...
"The shortages are because in 1985 and 1986 the Japanese didn't build the capacity they should have for when the upturn came. If the price had hear \$10 (for chip) we report been \$10 (per chip) we never would have dropped ont." Intel along with several other US chipmakers, quit the D-ram market in the mid 1980s, but is now re-entering through a sourcing agreement with Micron Technology of Idaho.

Japan.
Running Sematech was not a job Mr Noyce accepted without reservation. At 61, he claimed he was too old for the job. But after participating in a fruitless year-loug search for e chief executive, he offered his services. "Finally, it dayned on Mr Noyce regards the situation as the emergence of monopoly pricing which the Japanese intended all along. Prices up to about \$5 per chip are fair because "they are at or just above cost. Above \$5, those prices are opportunistic. The only objective of dumping is to establish a monopoly so.
that you can charge higher
prices later on," he says,
A higger problem is the com-

in its dealings with Washing-ton and throughout the US semiconductor industry. "Boh Noyce is the ideal choice to run Sematech," says Mr Charles Sporck, president of petitive pressure Japanese companies are exerting on the chip industry's customers – from mobile radios to robotics National Semiconductor. Mr Sporck began his semiconduc-tor career 30 years ago working controllers to laser printers. "RCA is out of computers; GE is out of consumer electronics. As the Japanese chip away at

these businesses, we lose customers. We must make sure the PC (personal computer) business doesn't go to Japan as well," says Mr Noyce.

Mr Noyce also criticises US trade and industrial policies. Until recently, he claims, the US government has ignored high technology. Japan has focused its attention upon selected "knowledge-hased" industries. Traditional Intel followed." He says that industries. Traditional resource-based industries such as oil, agriculture and forestry have soaked up investment **PERSONAL FILE**

1927 Born Burlington,lowa 1949 Graduated Grinnell College 1953 PhD from MIT 1957 Co-founded Fairchild Semiconductor 1968 Co-founded Intel

and distracted the attention of US policy-makers from the crit-ical industries of the future, he complains. "In the US, the gov-ernment is a regulator of industry, rather than a collabo-

By agreeing to fund Sema-tech and giving more attention to the trade problems of the electronics industry, Washing-ton has woken up to "the Japa-nese threat," says Mr Noyce. His task, over the next few years, will be to keep such interest alive.

While he has not always

While he has not always been optimistic about the future of the US semiconductor industry, he has not lost faith in the entrepreneurial spirit which he helped to foster in US high technology industries. This ability to create new ven-tures provides the US with an

Born in Iowa and educated at Grinnell College in Grinnell, Iowa and at the Massachusetts

Mr Noyce regards Shockley as the "guru, after whom the disciples (also including Gor-don Moore, now chairman of Intel) followed." He says that public attention for his contro-versial racial theories - created a somewhat unusual envi-ronment. "He would open a book and a fire cracker would go off. Or he'd pull roses out of his breast pocket."

But one year turned out to be enough. He and seven other young engineers, known in Silicon Valley as the "Traitorous Eight," left Shockley to form Fairchild Semiconductor. Fair-child's early employees went on to found the semiconductor giants of Silicon Valley —
intel, Advanced Micro Devices
and National Semiconductor.
Noyce and Moore founded
Intel in 1968. The company's
annual revenues have grown

to \$2bn and it is the leading supplier of microprocessors, the "brains" behind personal computers and a host of other electronic inventions.

On reflection, Mr Noyce says that one of his greatest satisfactions is "having developed a meritocracy." Contrasting the electronics firms favourably with his first business experiences under "east coast man-agement," Mr Noyce says of intel and its aggressive cous-ins: "The new companies are based on knowledge, not posi-tion. Position power is not as important as knowledge power. Expertise is recognised. (By necessity) a fast-growing com-pany is always trying to expand its people beyond their experience level." This management style is

no more than an equal partner in the organisation. "I never

position. Position power is not as important' felt superior to anyone in the company. My feeling is, We're all in this together."

He believes that salaries and the believes that salaries are only the believes that the believes that salaries are only the believes that the believes that the believes that the believes that the believes the believes that the believes the believes the believes the believes that the believes th felt superior to anyone in the

created partly "by listening to people and seeking out opinions. People get used to being heard and feeling responsible." He says Intel managers try to convey the feeling among employees that "nobody else is responsible. You are."

Prima donnas are not appreciated at Intal. The commany's temporary incentives to new recruits. A far more important factor in attracting and keep-ing talented people is the "sense of self worth" that entrepreneurial management ciated at Intel. The company's

'The new companies are based on knowledge, not

executives practice "construc-tive confrontation" and nobody engenders.
The usual perks that one would expect to go along with the role of vice chairman of a is beyond challenge. It is an exacting, disciplined atmo-sphere, but one that has hardened the company to the chal-lenges of a highly competitive market place. \$2 billion company are not apparent at Intel. Mr Noyce's office, like those of dozens of Mr Noyce talks of himself as other Intel executives, is a small cubicle separated from others only by shoulder-high

cial spokesman for the indus-try and spends time in Washington trying to improve the industry's relations with the government. Despite taking on the onerous duties of running Sematech, Mr Noyce will retain his position at Intel.

Pictor \$ 5 Th

Harte : "

His guiding force is still felt there. "It is much more difficult to redirect the bullet after the gun has been fired. I like to be involved in determining which direction the gun is pointed," he explains.

with Mr Noyce at Fairchild Lunatic asylum: still part of law's language

By opening Broadmoor in 1863 as the first criminal lunatic asylum the nation was expressing its con-cern that mentally disordered persons who have been involved in serious acts of vio-lence should be appropriately and humanely treated in condi-

tions of adequate security. Exactly 125 years later the same concern is exhibited, but Broadmoor (together with the three other Special Hospitals) has failed to shake off its his-torical associations with the system of criminal justice and the prisoo service.

The therapeutic community of what is now called a Special Hospital is still trammelled by the public's obsessive demands for tight security and for some residual desire to act puni-tively towards those mentally committed the vilest crimes. The Government, spurred on

the Government, spurred on by a highly critical report on the quality of psychiatric services and management provided at Broadmoor Hospital, produced jointly hy the National Health Service Health Advisory Service and the Department of Health's Serial Department of Health's Social Services Inspectorate, announced last week that it is conducting the first full review of the role of the special hospi-

Next year the four special hospitals, which are managed directly by the Department of Health, will edge nearer to the National Health Service when a Special Health Authority will assume direct responsibility, and general managers will be appointed as in the National Health Service. The special hospitals will then still be sep-arate and distinct from the psychlatric hospital in the treatment of the mentally dis-

ordered. Apart from their present formal dissociation from the NHS, the special hospitals most tangihle link with the prison sys-tem is in the representation of

staff on the terms and condi-tions of service.

Although increasing num-bers of ourses are joining the Royal College of Nursing, most are members of the Prison Officers Association which retains sole negotiating rights. This is a residue from the historical link with the criminal justice

JUSTINIAN

nurses genuinely espouse and practice professional standards care and treatment of patients in special hospitals — and many do — the philosophy and ethos of these institutions remains stuhbornly impervious to liberal ideas of how to treat mentally abnormal offenders. Security for the public against the risk of escape by the few dangerous patients to special hospitals is rightly a para-

mount priority. But guarding against escapes is achieved by taking the security on to the perimeter walls and not by inflicting high levels of security within the institution. tution. Greater freedom of movement within the institu-tion could be readily achieved if staff could be made to feel more secure in their work.

A popular saying among medical staff is that half of the population of a special hospital could be safely discharged; the trouble is in knowing which half. The doctors do know generally which of their patients require maximum security facilities. Many patients clearly do not need the high level of security imposed for all and necessary only for the few. The problem is exacerbated by the including of the security inability of the system to effect the prompt discharge of those who no longer need to be held in a special hospital (the average length of stay of a patient in a special hospital is about eight years). Recommended transfers to regional secure units or to general psychiatric hospitals are all too often inor-dinately delayed – a two to three years' wait is not uncom-mon. Thus patients languish unacceptably in special hospi-tals where they have long ceased to be relevant to their

and prison systems. Constant locking and However much individual unlocking of doors, collective

escorting of patients within the institution which detracts from individual attention, and the wearing of prison officer uniwearing of prison officer uni-forms are persistent features of a regime dominated by secu-rity. Industrial action, ordered hy the POA a year ago at Moss Side Special Hospital, which resulted in patients being locked in their rooms for 23 hours a day was a manifest. hours a day was a manifesta-tion of trade union power out of keeping with the therapeutic community.

The challenge to the staff of

special hospital lies in the problem of appropriate treat-ment for mentally disordered offenders. Unlike appendicitis which presents the simple solution of a surgical operation to remove the grumbling appendix, mental disorder is altogether more complex. Some cases of severe depression are treatable by a course of ECT and anti-depressive medication. But mental disorder cov-ers a multitude of conditions, ers a mututate of conditions, some of which can be treated effectively while others only (if at all) over a protracted time scale. During lengthy treatment there continually hovers over the management and staff of the institution the public demand to curtail the patient's

freedom. Reflecting the public opinion about the danger of mentally abnormal offenders, the courts often send such people into prisons rather than give them the benefit of hospital treat-

The Home Secretary can always transfer a prisoner to hospital, but once treatment is concluded the prisoner cannot be discharged as if he were an ordinary patient and returns to complete his prison sentence. In this context the special hos-pitals have been left behind psychiatrically in the methods employed by mental hospitals since 1959 in tackling mental

The conflicting role of the staff between being therapists and custodians, which has been a constant feature of the prison system, continues to infect the special hospitals. The courts for their part continue to endorse the ambivalence of society towards the humane treatment of mentally disordered offenders; the criminal lunatic asylum has not entirely disappeared from the language of the law.
